## Overview

ABSTRACT
The creation of the independent and sovereign nation of the Federated States of Micronesia (FSM) under the Compact of Free Association with the United States caused a growing need for social and economic development planning. Consequently, as in many developing countries, administrators and planners in the FSM, in their quest for social and economic development often contend with incomplete or unavailable information when it is needed.

The 1994 and 2000 FSM Censuses were thus conducted as part of the overall effort to provide current and updated information required for planning and administrative purposes. This report presents basic analysis of the 2000 FSM Census data, including comparison against the 1994 FSM Census.

KIND OF DATA
Census/enumeration data [cen]

UNITS OF ANALYSIS
- Household (both occupied and vacant at the time of the census).

- Individual (usual residents).

## Scope

NOTES
- HOUSEHOLD: Household characteristics, water and sanitation, energy, household equipments.

- INDIVIDUAL: Individual characteristics, education, literacy, fertility, economic activities.

KEYWORDS

# Sampling

## Sampling Procedure

Not applicable as it is a full enumeration.

# Questionnaires

## Overview

The questionnaire comprises two sections on housing and population and is provided as an external resource.
This questionnaire was published in English.

# Data Collection

## Data Collection Dates

| **Start** | **End** | **Cycle** |
|---|---|---|
| 2000-04-04 | 2000-06-01 | Enumeration day |

## Data Collection Mode

Face-to-face [f2f]

## Data Collection Notes

Field workers (crew leaders and enumerators) were hired and trained to carry out the actual enumeration.
Each enumerator was assigned to conduct interviews for every housing unit and household (about 50 housing units on the average) in his or her enumeration district (ED), and fill out a questionnaire for every person in each household. The fieldwork lasted from April 4 through the early part of June.

## Questionnaires

The questionnaire comprises two sections on housing and population and is provided as an external resource.

## Supervision

Field workers (crew leaders and enumerators) were hired and trained to carry out the actual enumeration. Each crew leader was responsible for supervising about 5 enumerators on the average.

# Data Processing

## Data Editing

The census questionnaires were edited and coded. The Preliminary data editing and coding operation were initiated and completed at the state Branch Statistics Offices. Preliminary tables were compiled and disseminated from this operation. The questionnaires were then reviewed (for processability), coded, keyed, and verified for further analysis. Following the verification of the keyed data, specifications and programs were developed for data cleaning. The US Bureau of the Census (USBC) assisted the national and state staff in carrying out the data cleaning and programming activities in Washington D.C. The software used in data cleaning, processing, and table production was the Integrated Micro-computers Processing System (IMPS).

## Other Processing

The software used in data cleaning, processing, and table production was the Integrated Micro-computers Processing System (IMPS).
