

Government of Samoa

SAMOA 2012 LABOUR FORCE SURVEY

International
Labour
Organization

PREFACE

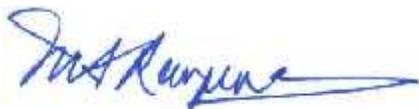

The Samoa Bureau of Statistics (SBS) in collaboration with the Ministry of Commerce, Industry and Labour (MCIL) is pleased to present the final results of the 2012 Samoa Labour Force Survey. This survey is the first of its kind in Samoa based on concepts and definitions outlined by the International Labour Organization (ILO).

The 2012 Samoa Labour Force Survey was conducted as a joint exercise between the Samoa Bureau of Statistics and the Ministry of Commerce, Industry and Labour and was fully funded by the International Labour Organization. Also, the 2012 Samoa Labour Force Survey was implemented simultaneously with the 2012 Samoa School to Work Transition Survey as the two surveys are closely inter-related.

This report provide some insights into employment and labour relations situation in Samoa covering topics such as characteristics of the Working Age Population (WAP), labour force, employment characteristics, participation in subsistence production, informal employment, unemployment characteristics, youth (aged 15 – 29 years) employment and unemployment characteristics, earnings from employment, working hours, occupational safety and equal opportunities for all, and a module on youth school-to-work transition (subject of a separate report). Hence, policy makers, planners and administrators will find this report useful in assisting them to develop, manage and evaluate labour market policies and programmes and to provide information's on hazards at work to enable them to formulate employment and labour related based decisions for the betterment of Samoa.

To conclude, I would like to record our sincere gratitude to those households and individuals selected for this survey for their wholehearted assistance in furnishing the answers to the questions given to them; the village mayors/ village representatives for their never ending support; all the enumerators and supervisors for data collection during the field work and to the staff of both SBS and MCIL that were involved in implementing this survey.

We are also indebted to Ms Leilua Taulealo for providing technical support as a Computer Expert Consultant and to Mr Tite Habiyakare, the regional ILO labour statistician, for providing technical assistance and support.

Muagututi'a S Reupena

Chapter 1: Survey Methodology

Table 1.1: Total households selected by District and Geographic Region

Chapter 2: Education and Training

Table 2.1: Population aged 15 years and above by highest educational level attended and sex, urban-rural areas, and geographic region

Table 2.2: Population aged 15 years and above who ever attended school by age, sex, urban-rural areas and geographic region

Table 2.3: Literacy (rate) by age groups, sex, urban-rural areas, and geographic region

Table 2.4: Average age of enrolment to school, average age of leaving school, and average number of years of schooling for persons aged 15 years and above by sex, urban-rural areas and geographic region

Table 2.5: Population aged 15 years and above who received training by type of training, sex, urban-rural areas, and geographic region

Chapter 3: Economic Activity and the Labour Force

Table 3.1: Distribution of the WAP by current economic activity status, age, sex, and urban-rural areas

Table 3.1.1: Distribution of the WAP by current economic activity status, age, sex – urban

Table 3.1.2: Distribution of the WAP by current economic activity status, age, sex – rural

Table 3.2.1: Distribution of the WAP by current economic activity status, age, sex, and geographic region - AUA

Table 3.2.2: Distribution of the WAP by current economic activity status, age, sex, and geographic region - NWU

Table 3.2.3: Distribution of the WAP by current economic activity status, age, sex, and geographic region - ROU

Table 3.2.4: Distribution of the WAP by current economic activity status, age, sex, and geographic region - SAV

Table 3.3: Total labour force by age group, sex, urban-rural areas, and geographic region

Table 3.4.1: Labour force participation rate by age group, sex, urban-rural areas, and geographic region

Table 3.4.2: Labour force participation rate by completed level of education, sex, urban-rural areas, and geographic region

Chapter 4: Employment

Table 4.1: Employed population by age group, geographic region, sex, urban-rural areas

Table 4.2: Employed population by completed level of education, geographic region, sex, urban-rural areas

Table 4.3: Employed population by geographic region, sex, and urban-rural areas

Table 4.4: Employed population by status in employment, sex, and urban-rural areas

Table 4.5.1: Employed population by occupation, sex, and urban-rural areas

Table 4.5.2: Employed population by industry, sex, and urban-rural areas

Table 4.6.1: Employed population by occupation, status in employment and sex

Table 4.6.2: Employed population by industry, status in employment and sex

Table 4.7.1: Employment-to-population ratio by age group, sex and urban-rural areas

Table 4.7.2: Employment-to-population ratio by completed level of education, sex and urban-rural areas

Table 4.7.3: Employment-to-population ratio by geographical region, sex and urban-rural areas

Table 4.8.1: Proportion of own-account workers and contributing family workers in total employment by main age group, sex, and urban-rural areas

Table 4.8.2: Proportion of own-account workers and contributing family workers in total employment by main age group, geographic region, sex, urban-rural areas

Table 4.9.1: Proportion of paid employees in precarious types of work by main age group, sex, and urban-rural areas

Table 4.9.2: Proportion of paid employees in precarious types of work by main age group, geographic region, sex, and urban-rural areas

Chapter 5: Participation in Subsistence Production

Table 5.1.1: Total population in subsistence production by age group, geographic region and urban-rural areas

Table 5.1.2: Total population in subsistence production by completed level of education, geographic region and urban-rural areas

Table 5.1.3: Total population in subsistence production by type of activity, sex, and urban-rural areas

Table 5.2.1: Proportion of Employed population in subsistence production, by age group, geographic region, sex, urban-rural areas

Table 5.2.2: Proportion of Employed population in subsistence production, by age group, geographic region, sex, urban-rural areas

Table 5.2.3: Proportion of Employed population in subsistence production by geographic region, sex, urban-rural areas

Chapter 6: Informal Employment

Table 6.1: Employed population by occupation, sex, and institutional sector of employment

Table 6.2: Employed population by status in employment, sex, and institutional sector of employment

Table 6.3: Employed population by industry, sex, and institutional sector of employment

Table 6.4: Employed population by geographic region, sex, and institutional sector of employment

Table 6.5: Employed population by completed level of educational, sex, urban-rural areas, and formal-informal employment

Table 6.6: Employed population by age group, sex, urban-rural areas, and formal-informal employment

Table 6.7: Informal employment and IE rate by geographic region, sex, and urban-rural areas

Chapter 7: Unemployment

Table 7.1: Unemployed population by geographic region, sex, and urban-rural areas

Table 7.2: Unemployed population by completed level of education, sex, and urban-rural areas

Table 7.3: Unemployment rates by age group, sex, and urban-rural areas

Table 8.5: Youth unemployment rates by age group, sex, and urban-rural areas

Table 8.6: Youth unemployment rates by geographic region, sex, and urban-rural areas

Table 8.7: Youth unemployment rates by completed level of education, sex, and urban-rural areas

Table 8.8: Unemployed youth by duration in unemployment, sex, urban-rural areas, and geographic region

Table 8.9.1: Youth not in employment and not in education or training, by age groups, geographic region, sex, and urban-rural areas

Table 8.9.2: Youth not in employment and not in education or training, by completed level of education, geographic region, sex, and urban-rural areas

Table 8.10.1: Employed youth in subsistence production by type of activity, sex and urban-rural areas

Table 8.10.2: Employed youth in subsistence production by completed level of education, sex and urban-rural -areas

Table 8.10.3: Employed youth in subsistence production by geographical region, sex and urban-rural areas

Table 8.11.1: Adjusted proportions of employed youth in total adjusted employment by age group, sex and urban-rural areas

Table 8.11.2: Adjusted proportions of employed youth in total adjusted employment by geographic region, sex and urban-rural areas

Chapter 9: Earnings from Employment

Table 9.1: Employed population by frequency of wage payment and sex, urban-rural areas, and geographical region

Table 9.2: Employed population by age-group, sex, and frequency of wage / salary payment

Table 9.3.1: Employed population by occupation, sex and frequency of wage/salary payment

Table 9.3.2: Employed population by industry, sex and frequency of wage/salary payment

Table 9.4.1: Average monthly income from employment (wage and salary) by occupation, sex, urban-rural areas, and geographic region

Table 9.4.2: Average monthly income from employment by industry, sex, urban-rural areas, and geographic region

Table 9.5: Average monthly income from employment (wage/salary) by age group, sex, urban-rural areas

Chapter 10: Working Hours

Table 10.1.1A: Average number of hours worked per week by employed persons in paid job and other economic activities by age group, geographic region, sex, urban-rural areas

Table 10.1.1B: Average number of hours worked per week in paid job by employed persons by age group, geographic region, sex, urban-rural areas

Table 10.1.2A: Average number of hours worked per week by employed persons in paid job and other economic activities by completed level of educational, geographic region, sex, urban-rural areas

Table 10.1.2B: Average number of hours worked per week in paid job by employed persons, by completed level of educational, geographic region, sex, urban-rural areas

Table 10.2.1A: Average number of hours worked per week by employed persons in paid job and other economic activities by occupation, geographic region, sex, urban-rural areas

Table 10.2.1B: Average number of hours worked per week in paid job by employed persons by occupation, geographic region, sex, urban-rural areas

Table 10.2.2A: Average number of hours worked per week in paid job and other economic activities by employed persons by industry, geographic region, sex, urban-rural areas

Table 10.2.2B: Average number of hours worked per week in paid job by employed persons industry, geographic region, sex, urban-rural areas

Table 10.3.1: Persons in excessive hours of work per week by age group, geographic region, sex, and urban-rural areas

Table 10.3.2: Persons in excessive hours of work per week by completed level of educational, geographic region, sex, and urban-rural areas

Chapter 11: Occupational Safety

Table 11.1: Persons aged 15 years and above with occupational injuries and illnesses in the last 12 months by type of injuries, sex, urban-rural areas, and geographic region

Table 11.2: Persons aged 15 years and above with occupational injuries and illnesses in the last 12 months by number of injuries and illness, sex, urban-rural areas, and geographic region

Table 11.3: Persons aged 15 years and above with occupational injuries and illnesses in the last 12 months by age group, sex, urban-rural areas, and geographic region

Table 11.4: Persons aged 15 years and above with occupational injuries and illnesses by number of working days lost in the last 12 months due to injuries and illnesses, sex, and urban-rural areas.

Table 11.5: Number of reported occupational injuries and illnesses in the last 12 months, and rate, by main industry, sex, and urban-rural areas

Table 11.6: Number of reported occupational injuries and illnesses in the last 12 months, by main occupation, sex, and urban-rural areas

Table 11.7: Persons aged 15 years and above with occupational injuries and illnesses in the last 12 months by type of hazard at work, and illness, sex, and urban-rural areas

Chapter 12: Equal Opportunities

Table 12.1: Occupational segregation (within ISCO-08 major groups), by sex, urban-rural areas, and geographic region

Table 12.1.1: Occupational segregation proportions (within ISCO-08 major groups), by sex, urban-rural areas, and geographic region

Table 12.2: Female share of employment in high status occupation (ISCO-08 11,12), by main industry (3 major groups), urban-rural areas, and geographic region

Table 12.3: Proportion and Share of women in wage employment in the non-agricultural sector by geographic region, and urban-rural areas

Table 12.4: Persons aged 15 years and above with disability by type of disability, age groups, sex, urban-rural areas, and geographic region

Table 12.5: Labour force participation rate of persons without and with disabilities, and difference, by age group and sex

Table 12.6: Employment to population ratio of persons without and with disabilities, and difference, by age group and sex

Table 12.7: Unemployment to population ratio of persons without and with disabilities, and difference, by age group and sex

Chapter 13: Social Dialogue

Table 13.1: Trade Unions members (employees only) by age groups, sex, urban-rural areas, and geographic region

Table 13.2: Proportion of paid employees (in total paid employment) whose pay and conditions of employment are directly affected by agreements between their employers and any trade union by age group, sex, urban-rural areas and geographic region

1 METHODOLOGY

1.1 Sampling and Survey Coverage

The sample for the Labour Force Survey 2012 was drawn from the master sample frame of Household Listing from the most recent Population and Housing Census, 2011. The sample was designed to cover 10 percent of the households in both the urban and rural areas. It allows detailed analysis for most indicators at the national level, for urban and rural areas and for each of the four regions of Samoa namely Apia urban Area (AUA), North-West Upolu (NWU), Rest of Upolu (ROU) and Savaii. The first region is located in the urban area, while all others are in the rural areas of Samoa.

In the LFS 2012, a representative probability sample of households was selected in two stages. The first stage involved the selection of clusters or primary sampling units using probability proportional to size (PPS) resulting in a total of 341 clusters of which 119 clusters were selected from AUA, 94 in NWU, 63 in ROU and 65 in Savaii. In the second stage of selection, a fixed number of 5 households were selected systematically from the AUA clusters and a fixed number of 10 households were selected from all the rural regions due to the higher transportation costs in those regions. This resulted in a total of 592 selected households in AUA, 948 in NWU, 617 in ROU and 641 in Savaii or 2,798 sample households in total. Any difference in the final numbers will be due to household found and responding households.

During the LFS, in each of the selected households, **all persons in the household** were interviewed hence the weighting was based on the responding households in the sample or household weights.

1.2 Survey Questionnaire

The 2012 Samoa Labour Force Survey questionnaire was derived from a similar questionnaire designed by ILO specialists based on experiences from other countries. To maintain international comparability, most of the questions were retained such as current activities, characteristics of the main activity and hours of work. However, some questions were modified and altered so that they fit into the local context, such as the classification of education and the participation in the production of goods used by own household.

The eleven sections of the LFS were divided into two parts where the first part was designed to obtain data on household characteristics and composition. The remaining ten sections were designed to collect data on those aged 15 years and above on literacy and education, training, current activities, characteristics of the main job/ activity, hours of work, unemployment, job search, inactive people, occupational injuries and participation in the production of goods for household consumption. A separate section covered issues on the youth school-to-work transition, and they are presented in a separate report.

The questionnaire was pre tested during the supervisors training then during the enumerators training and it was finally tested during the pilot test. The questionnaire was revised rigorously in accordance to the feedback received from each test. By the same token, a field operations manual for supervisors and enumerators was prepared and modified accordingly for field operators to use as a reference during the field work.

1.3 Supervisors and Enumerators

The survey consisted of four field supervisors, one from the Ministry of Commerce, Industry and Labour and three from the Bureau itself. Each was assigned a team to manage and to supervise the field work.

There were thirty two applicants that applied to be enumerators and twenty eight were interviewed. Of this total, twenty enumerators were selected based on strict selection criteria's that were designed by the steering committee.

1.4 Training

A separate training/ discussion was conducted for three days from 10th October 2012 – 12th October 2012 for supervisors to make them aware of the survey tools, to provide support to the enumerators on the field on an ad hoc basis and to discuss any issues arising from the survey questionnaire. Furthermore, members of the steering committee were also invited to attend so that they understood the questionnaire fully.

A two week training of enumerators together with field supervisors followed and was conducted for two weeks from 16th October 2012 – 26th October 2012. Six days were spent on discussing administrative logistics, role of enumerators and supervisors, the training of the questionnaire, reading and understanding household lists and aerial maps designed by the bureau, explaining and clarifying key concepts used in the survey as per ILO definitions and discussing issues arising from the questionnaire. One day was spent on group discussions to identify any additional issues. The remaining two days were spent on practical exercises where one enumerator was an interviewer and the other was the respondent. All other enumerators were encouraged to record the answers of the interview which were discussed after each interview.

On October 27th 2012, a pilot test was conducted in a rural village, Samatau, located approximately 30km from the capital of Apia. Four teams of six comprising of five enumerators and one supervisor were dispersed in the morning and each enumerator was encouraged to interview at least two households. Supervisors were asked to manage the field logistics of its respective team.

The interviewed results from the pilot survey were discussed for four days from 29th October – 1st November. In addition to this, data entry for the pilot survey to test the data entry program designed for the survey started on 30th October and completed on 5th November. The results of which were made known to everyone on 2nd November. Numerous and various aspects of the questionnaire needed improvement which were further reiterated and reemphasized. Furthermore, field work plan and logistics, team allocation and a brief summary of the survey was also done on 2nd November.

1.5 Field Work

A total of four field teams were used for collecting the data during the field work and each team consisted of one supervisor and five enumerators. The field work was conducted for six consecutive weeks from 5th November 2012 – 15th December 2012, where Upolu was enumerated from 5th November 2012 – 5th December 2012 and Savaii was enumerated from 7th December – 15th December 2012. Two field teams were assigned each geographical region to carry out the interviews while the other two teams shared the remaining geographical region in Upolu due to the workload and travelling time. All the field teams enumerated the Savaii region due to travelling time resulting from the geographical scatteredness of the selected households.

1.6 Coding

Due to unforeseen staff turnover and the devastating effects of cyclone Evans towards the end of 2012, the coding of all questionnaires was pushed back to 7th January 2013. In the original plan, the coding was planned to start on 26th October 2012.

A half day training was conducted on the first day to familiarize the coders with some internationally standard coding guidelines such as the ISCO 08 and ISIC R4 and also to remind staff of the necessary skips and the relevant sections to be coded. The in-house coding of questionnaires was done in the eight weeks from 7th January 2013 – 5th March 2013 when the bureau employed four coders. These coders were selected from the pool of enumerators that were used during the field work of the survey.

1.7 Data Entry/ Data Processing

Four data entry operators were hired for a total of seven weeks from 21st January – 8th March 2012 for data entry. Two were retained for a period of one week from 11th March – 15th March for data cleaning and editing. The data entry activity was supervised by a locally hired computer consultant in collaboration with one officer from the bureau.

This local computer consultant was also hired to design a data entry program, a data processing system for the survey and for producing the necessary tables according to the tabulation plan. The Census and Survey Processing System (CSPRO 5.0) package was used for managing both the data entry and data processing which was also used to produce the required tables for the survey.

1.8 Sampling and Other Sources of Errors

All data collected from surveys are subject to error. The survey practices used in carrying out the survey are aimed at minimizing the sources of both sampling and non-sampling errors. Sampling errors arise whenever a sample survey rather than a full census is carried out and are minimized by having an appropriate sample size and sample design. Non-sampling errors can occur at all points of the process. The training and management processes described above will minimize non-sampling errors. However, all data in the publication must be considered best estimates.

2 TERMS AND DEFINITIONS

Reference Period

For the purpose of this survey, three different reference periods were used. (i) three months: used for collecting the household composition and characteristics data, (ii) last seven days: used for collecting data on current activities, hours of work, job search, inactive people and the production of goods, and (iii) last twelve months: used for collecting data on training and occupational injuries.

Working Age Population (WAP) or Employed Population

Refers to all those aged 15 years and above who are either economically active or non-economically active.

$$WAP (15^+ \text{ years}) = EAP + NEAP$$

Labour Force or Economically Active Population (EAP)

Include those of either sex aged 15 years and above who furnish the supply of labour for the production of economic goods and services. In other words, those that can contribute (employed) AND those that are available and are looking to contribute (unemployed) to the production of economic goods and services. (see appendix A)

$$EAP = Employed + Unemployed$$

Not in Labour Force or Non-Economically Active Population (NEAP)

Include those of either sex aged 15 years and above who were outside employment as defined below, and could not meet the criteria to be considered as unemployed, as below indicated.

Unemployed

Is made up of persons aged 15 years and above who did not work and had no job attachment during the reference period, were 'actively' looking for work or ready to start an enterprise during the reference period AND were ready to start work or an enterprise if an opportunity arose (IE: were available). 'Actively' looking for work includes, waiting to be interviewed, submitted or in the process of submitting an application form for employment or looking for employment through the media/ relatives/ friends.

Employed

Is made up of persons ages 15 and above who during the short reference period of a week, contributed for at least 1 hour, to furnish the supply of labour for the production of goods and services for pay (including commission, piece-rate, in kind) or profit. It includes those who had a job or enterprise but were absent from the job or enterprise during the reference period temporarily, such as those who were sick, on vacation or on leave.

Employment to Population Ratio (EPR)

Is the proportion of the working age population that is employed

$$EPR = \frac{Employed}{WAP} * 100$$

Labour Force Participation Rate (LFPR)

Is the proportion of the working age population that is economically active

$$LFPR = \frac{LF}{WAP} * 100$$

Informal Employment

Based on the guidelines recommended by the 17th International Conference of Labour Statisticians, informal employment covers: (i) paid employees in informal jobs (jobs without paid annual or sick or leave), (ii) paid employees in an unregistered enterprise with less than five employees, (iii) own account workers in an unregistered enterprise with less than five employees, (iv) employers in an unregistered enterprise with less than five employees and (v) contributing family workers.

Informal Employment Rate (IER)

Is the proportion of total employment that is in informal employment

$$IER = \frac{\text{Informal Employment}}{\text{Total Employment}} * 100$$

Employment Rate (ER)

Is the proportion of total employment in the total labour force

$$ER = \frac{\text{Total Employment}}{\text{Total LF}} * 100$$

Youth

Refers to all those persons between the ages of 15 – 29 years

Youth Unemployment Rate (YUR)

Is the proportion of those unemployed between ages 15year – 29 years of the total labour force

$$YUR = \frac{\text{Youth Unemployed}}{\text{Total Youth LF}} * 100$$

Own Account Worker/ Self-Employed

Are those individuals who work on their account with one or more partners or relies on unpaid family workers, and **have not** used hired labour of one or more person to work for them in their business on a continuous basis. Members of this group may have engaged one or more persons provided that this is on a **non-continuous basis**.

Employer

Are those who employ one or more worker(s) or a few partners having engaged one or more persons to work for them in their business.

Employees

Are those who received any payment in cash or in kind, or where working for payment in cash or in kind during the reference week; or were temporary absent from a paid work (in cash or in kind); they are also called persons in wage employment.

Unpaid/ Contributing Family Worker

Refers to a person who works without pay in an economic enterprise operated by a related person (usually a person in the same household).

Subsistence Production

For the purpose of this survey, this refers to those people who were 'economically inactive' but were engaged mostly in agricultural and other activities 'only for household use' (*Refer Annex C: LFS Questionnaire, Section K where Kb = 1*) or their agricultural produce was 'mainly for home consumption' even if it could be partly for sale (*Refer Annex C: LFS Questionnaire, Section K where Kb = 2*) or their agricultural produce is 'not harvest' or not 'consumed' (*Refer Annex C: LFS Questionnaire, Section K where K.1b & K.2b = 5*).

Employed in Subsistence Production

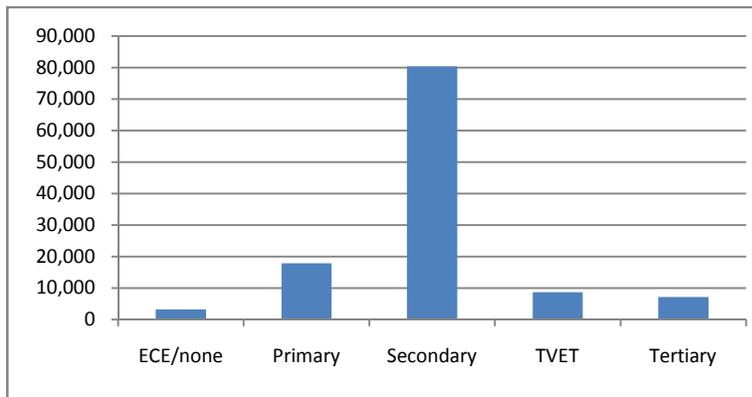

For the purpose of this survey, this refers to those people who were 'economically inactive' or currently unemployed but were engaged in subsistence activities 'mainly for sale' even if it could be for household use (*Refer Annex C: LFS Questionnaire, Section K where K = 3*) or their agricultural produce was 'only for sale' (*Refer Annex C: LFS Questionnaire, Section K where K = 4*).

3 EDUCATION AND TRAINING

3.1 HIGHEST EDUCATION LEVEL ATTENDED

From the estimated total Working Age Population of 117,500, those who have attended secondary education had the highest percentage with 68.4 percent (80,397) followed by primary level with 15.2 percent (17,903). Only 2.8 percent (3,280) had not attended any level of education, or only ECE. There is a sharp decline after secondary level indicating that relatively few people go for further studies after secondary level. (Figure 3.1.1)

Figure 3.1.1: Highest Education Level Attended

Both males and females have high levels of secondary school attendance, at 65.8 percent for males and 71.2 percent for females. (Table 3.1)

Table 3.1.1: WAP by Highest Level of Education Attended by Sex

| Highest Education Level Attended | SAMOA | | Males | | Females | |
|----------------------------------|----------------|--------------|---------------|-------------|---------------|-------------|
| | Number | Percentage | Number | Percentage | Number | Percentage |
| TOTAL | 117,487 | 100.0 | 59,270 | 50.4 | 58,217 | 49.6 |
| ECE/ None | 3,280 | 2.8 | 1,807 | 3.0 | 1,473 | 2.5 |
| Primary | 17,903 | 15.2 | 10,299 | 17.4 | 7,604 | 13.1 |
| Secondary | 80,397 | 68.4 | 38,971 | 65.8 | 41,426 | 71.2 |
| TVET | 8,698 | 7.4 | 4,787 | 8.1 | 3,910 | 6.7 |
| Tertiary | 7,209 | 6.1 | 3,406 | 5.7 | 3,803 | 6.5 |

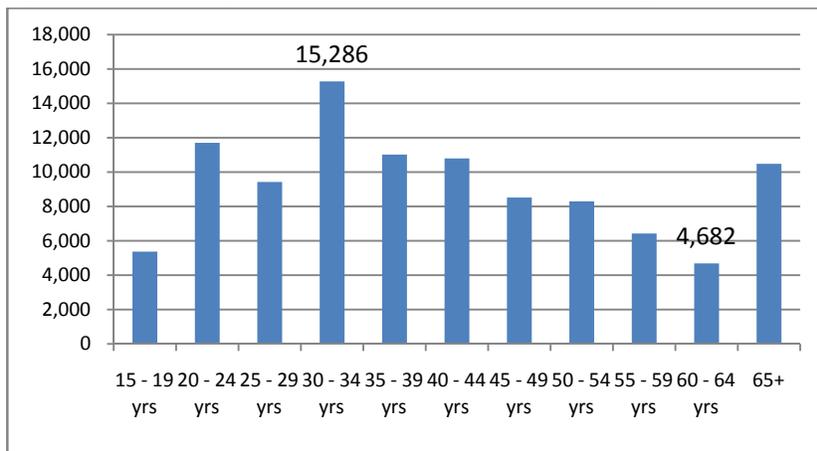

3.2 EVER ATTENDED SCHOOL

For the purpose of this survey, those who were currently attending school during the survey period were excluded from this section. A total of 101,971 people aged 15 and above reported during the survey that they had actually attended school. Of this total 51.0 percent (52,028) were males and 49.0 percent (49,943) were females.

3.2.1: Ever Attended School by Age Group

Those in the age group of 30-34 years had the highest number of people who ever attended school with 15,286 while the lowest number of 4,682 was in the age group of 60-64 years. (Figure 3.2.1.1)

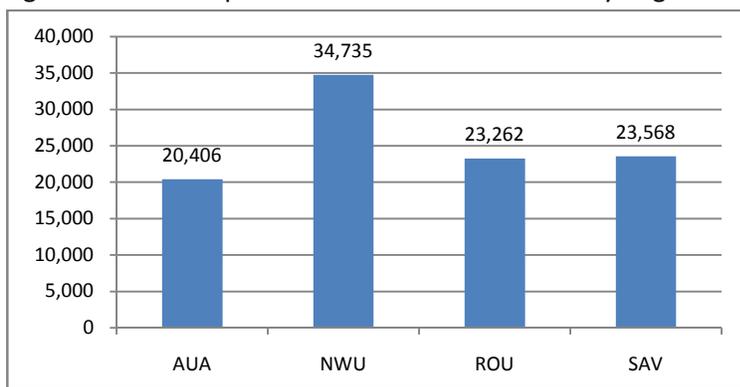

Figure 3.2.1.1: People who Ever Attended School by Age Group

3.2.2: Ever Attended School by Region

At the regional level, NWU had the largest number of people who ever attended school with 34,735. Next is SAV with 23,568 followed by ROU with 23,262 while AUA reported the lowest number of people who ever attended school with 20,406.

Figure 3.2.2.1: People who Ever Attended School by Region

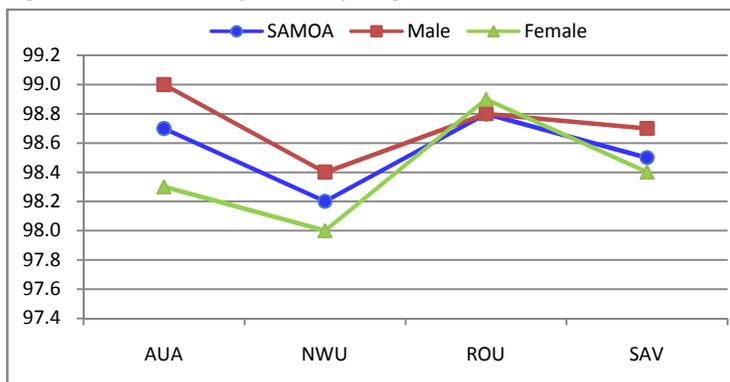

3.3 LITERACY RATE

All household members aged 15 years and above were asked whether they can read a simple sentence, write a simple sentence and understand simple instructions. Overall, the literacy rate for Samoa was reported to be 98.5 percent. Males had a slightly higher rate than females with 98.7 percent and 98.4 percent respectively.

All the age groups reported to have literacy rates above 90 percent; the highest being the age group of 15-19 years with 99.9 percent while the lowest was 91.4 percent from the 65 years and above age group. At the regional level, all regions reported their literacy rates to be 98 percent with the highest being in ROU with 98.8 percent and the lowest in NWU with 98.2 percent. ROU was the only region where females had a higher literacy rate than males as depicted in Figure 3.3.1.

The literacy rate of 15 – 24 years for males and females, a MDG indicator related to completing a full course of primary schooling (MDG indicator number 2.3), was reported to be 99.6 percent.

Figure 3.3.1: Literacy rates by Region and Sex

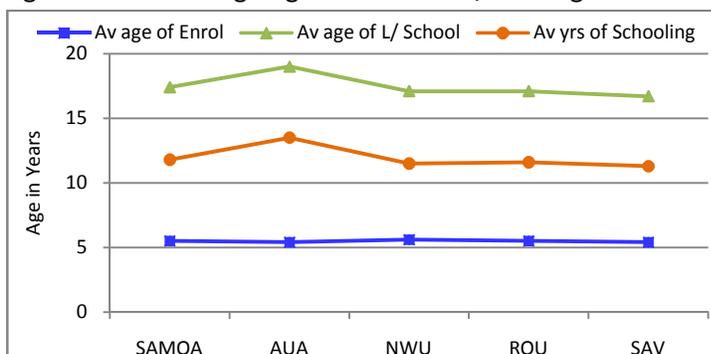

3.4 SCHOOL ENROLMENT

The national average age of enrolment in schooling was 5.5 years for the estimated 117,006 people aged 15 years and above who ever attended school. This was also the national average age of enrolment for both males and females. By region, there is not much difference in the average age of enrolment, ranging from the highest of 5.6 years in NWU to 5.4 years in AUA and SAV, implying that those in NWU seemed to enter school at a slightly later age when compared to the other regions. (Figure 3.4.1).

The average age of those people aged 15 years and above leaving school in Samoa was reported to be 17.4 years. Males tend to leave school at a younger age than females with 17.2 years and 17.5 years respectively. AUA is the only region that showed an average age of leaving school (19.0 years) that is higher than the national average age of 17.4 years. The remaining three regions have average ages below the national average. This implies that students from the rural area tend to leave school at a much younger age than in the urban area. (Figure 3.4.1).

The survey revealed that the national average duration of schooling was 11.8 years. By sex, females stay longer in school with 12.0 years while males stay in school for an average of 11.7 years. Those in AUA stay longer in school with an average of 13.5 years while those in SAV had the least average years of schooling with 11.3 years. (Figure 3.4.1).

Figure: 3.4.1: Average Age of Enrolment/ Leaving School and Years of Schooling by Region

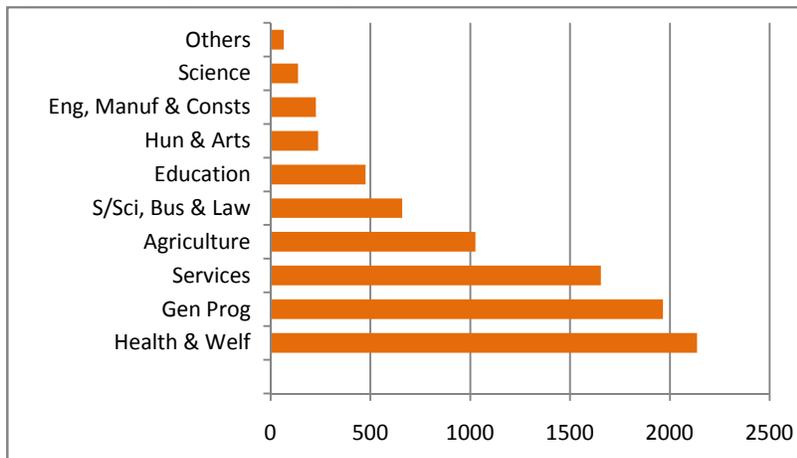

3.5 TRAINING

Training under this section covers those types of training or courses, or seminar or workshops or private lessons that are outside the regular education system. This training includes general programmes, education, humanities and arts, social science, business, law, science, engineering manufacturing, construction, agriculture, health and welfare and services. (This was based on the ISCED97 classification that was used for the labour force survey).

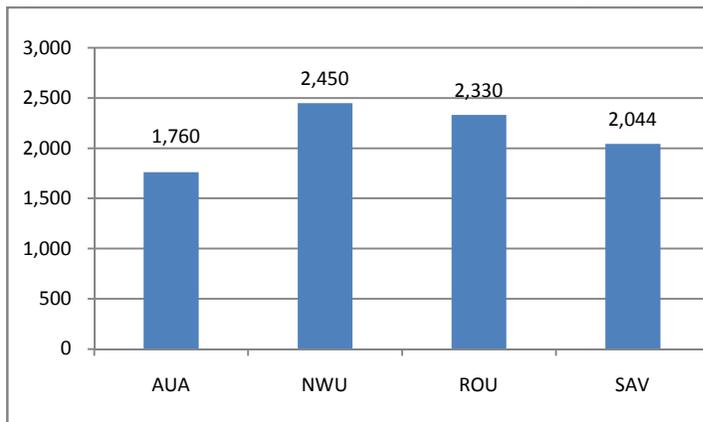

The survey revealed that a total of 8,584 trainings sessions were attended by those aged 15 years and above in the past twelve (12) months. The most attended type of training was health and welfare with 2,137 attendances, followed by general programmes with 1,965 then by services with 1,654. Figure 3.5.1 gives a graphical presentation of the types of trainings attended by those aged 15 years and above as reported by the survey.

Figure 3.5.1: Types of trainings attended

The highest number of these trainees was from NWU with 2,450 while the least of these trainees are from AUA with 1,760. (Figure 3.5.2).

Figure 3.5.2: Number of People Attended Trainings by Geographic Region

4 ECONOMIC ACTIVITY AND THE LABOUR FORCE

4.1 WORKING AGE POPULATION

From the 2012 LFS, the WAP of 15 years and over was estimated to be 117,500 where approximately 93,442 (79.5 percent) are located in the rural area while the remaining 24,045 (20.5 percent) are in the urban area. (Table 4.1.1).

Table 4.1.1: WAP Population by sex and sector

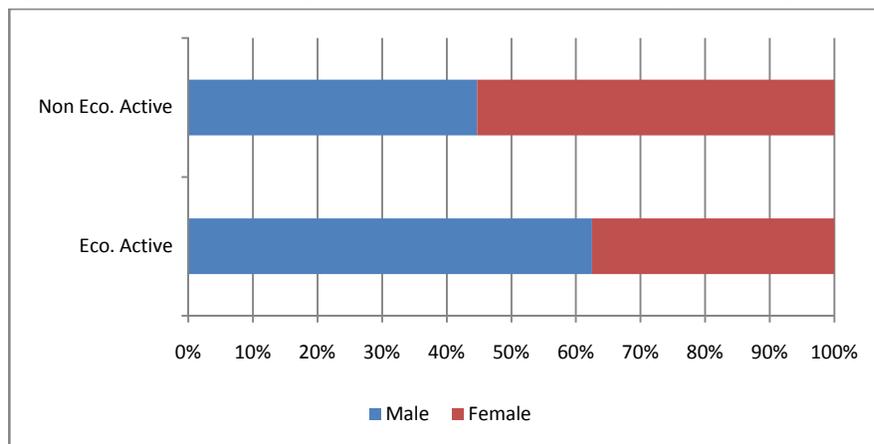

| Sex | WAP | | Urban | | Rural | |
|--------------|----------------|---------------|---------------|-------------|---------------|-------------|
| | Count | Percentage | Count | Percentage | Count | Percentage |
| TOTAL | 117,487 | 100.0% | 24,045 | 20.5 | 93,442 | 79.5 |
| Male | 59,270 | 50.4 | 12,127 | 50.4 | 47,143 | 50.5 |
| Female | 58,217 | 49.6 | 11,918 | 49.6 | 46,299 | 49.5 |

The WAP can be categorized into 2 main groups; Economically Active (Labour Force) and Non-Economically Active (Not in Labour Force). Table 4.1.2 shows that the majority of the WAP are Non Economically Active with 67.8 percent (79,657) while the Economically Active population is less than half of this with only 32.2 percent (37,830).

Table 4.1.2: WAP distribution by Sex

| Sex | SAMOA | Economically Active | Non-Economically Active |
|--------------|----------------|---------------------|-------------------------|
| TOTAL | 117,487 | 37,830 | 79,657 |
| Male | 59,270 | 23,630 | 35,640 |
| Female | 58,217 | 14,200 | 44,017 |

Figure 4.1.1: Economically/ Non Economically Active Population by Sex

4.2 ECONOMICALLY ACTIVE POPULATION (LABOUR FORCE)

The survey estimated the EAP or labour force to be 37,830 where the majority was males with 62.5 percent (23,630) while 37.5 percent were females (14,200). Table 4.2.1 below reveals that the largest number of the labour force is located in NWU with 14,852 (39.3 percent) while the least number is found in ROU with 5,352 (14.1 percent). By sex, the largest number of both males and females in the labour force are from NWU with 9,122 and 5,730 respectively.

By comparison, the labour force from the 2011 population census was estimated at 47,881, but it comprised also all persons engaged in subsistence production, including those producing only or mainly for own consumption, not considered in the 2012 LFS as economically active.

Table 4.2.1: Economically Active Population by Region

| Sex | SAMOA | | AUA | | NWU | | ROU | | SAV | |
|--------------|---------------|--------------|---------------|-------------|---------------|-------------|--------------|-------------|--------------|-------------|
| TOTAL | 37,830 | 100.0 | 11,049 | 29.2 | 14,852 | 39.3 | 5,352 | 14.1 | 6,578 | 17.4 |
| Male | 23,630 | 62.5 | 6,748 | 17.8 | 9,122 | 24.2 | 3,526 | 9.3 | 4,234 | 11.2 |
| Female | 14,200 | 37.5 | 4,302 | 11.4 | 5,730 | 15.1 | 1,826 | 4.8 | 2,344 | 6.2 |

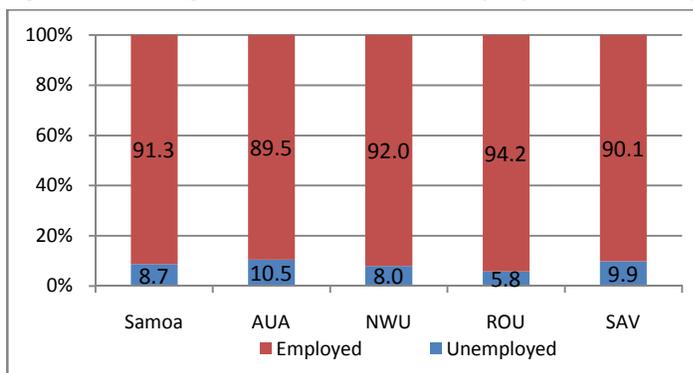

The EAP can be further classified into 2 main categories; employed and unemployed. The LFS revealed that a total of 34,530 and 3,300 of the WAP were employed and unemployed respectively and further indicates that the majority of males are employed when compared to females and this is a similar pattern with unemployed. (Table 4.2.2).

Table 4.2.2: Distribution of the EAP

| Sex | SAMOA | | Employed | | Unemployed | |
|--------------|---------------|--------------|---------------|--------------|--------------|--------------|
| TOTAL | 37,830 | 100.0 | 34,530 | 100.0 | 3,300 | 100.0 |
| Male | 23,630 | 62.5 | 21,787 | 63.1 | 1,843 | 55.8 |
| Female | 14,200 | 37.5 | 12,743 | 38.9 | 1,458 | 44.2 |

Figure 4.2.1 shows the regional distribution of both employed and unemployed population of the EAP. As expected, the AUA region exhibit the highest rate of unemployment (10.5 percent) due to people looking for work while the ROU region exhibit the lowest rate of unemployment with 5.8 percent. By contrast, the ROU region revealed the highest rate of employment with 94.2 percent while the AUA region revealed the lowest with 89.5 percent.

Figure 4.2.1: Regional Distribution of employed and unemployed of the EAP

4.2.1 Labour Force Participation Rate by Region

As revealed by table 4.2.1.1, male participation rate is about 40 percent, and that of females is about 24 percent. By region, AUA has the highest participation rate with 46.0 percent while ROU has the lowest rate with a distant 20.2 percent. Sex wise, the highest participation rate for both males and females were both reported from AUA while the lowest participation rate for both males and females were reported from ROU. Furthermore, more males are active compare to females in all of the regions.

Table 4.2.1.1: LFPR by Region and Sex

| Sex | SAMOA | AUA | NWU | ROU | SAV |
|--------------|-------------|-------------|-------------|-------------|-------------|
| TOTAL | 32.2 | 46.0 | 37.2 | 20.2 | 24.3 |
| Male | 39.9 | 55.6 | 45.7 | 26.1 | 31.0 |
| Female | 24.4 | 36.1 | 28.7 | 14.1 | 17.4 |

4.2.2 Labour Force Participation Rate by Age Group

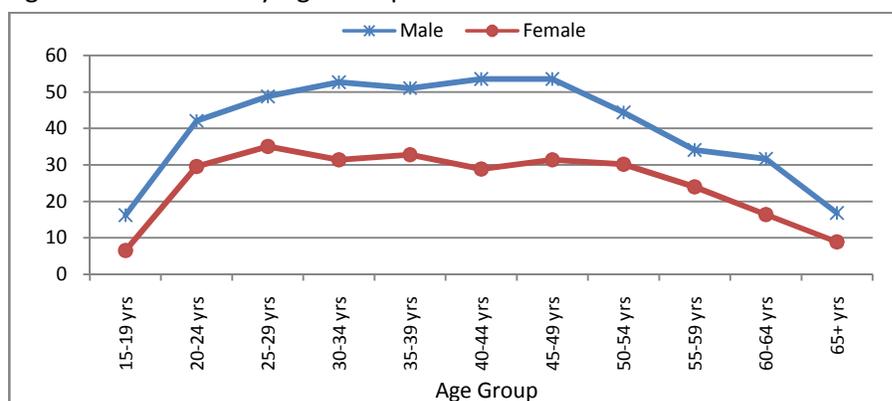

By comparing the labour force participation rate among different age group of the WAP, it was revealed that the activity rate increases together with age group up to 45-49 years and declines thereafter as workers leave the labour force. The highest rate is the age group of 45-49 years with 42.8 percent. It also shows that the highest participation rate for males are both the age groups of 40-44 years and 45-49 years while females has it at the age group of 35-39 years. (Table 4.2.2.1).

Table 4.2.2.1: LFPR by Age Group and Sex

| Age Group | SAMOA | Male | Female |
|--------------------|-------------|-------------|-------------|
| SAMOA | 32.2 | 39.9 | 24.4 |
| 15-19 years | 11.5 | 16.2 | 6.5 |
| 20-24 years | 36.0 | 42.1 | 29.6 |
| 25-29 years | 41.9 | 48.8 | 35.1 |
| 30-34 years | 42.0 | 52.7 | 31.4 |
| 35-39 years | 41.6 | 51.1 | 32.8 |
| 40-44 years | 42.1 | 53.6 | 28.9 |
| 45-49 years | 42.8 | 53.6 | 31.4 |
| 50-54 years | 37.2 | 44.4 | 30.2 |
| 55-59 years | 29.2 | 34.1 | 24.0 |
| 60-64 years | 24.6 | 31.7 | 16.4 |
| 65 years and above | 12.6 | 16.8 | 8.9 |

Figure 4.2.2.1 clearly indicates that the LFPR of males for all the age groups are higher than females. This figure further shows that the participation for men drops quickly from age 50, but the female participation rate is fairly constant from ages 20 through to 54.

Figure 4.2.2.1: LFPR by Age Group and Sex

4.2.3 Labour Force Participation Rate by Completed Level of Education

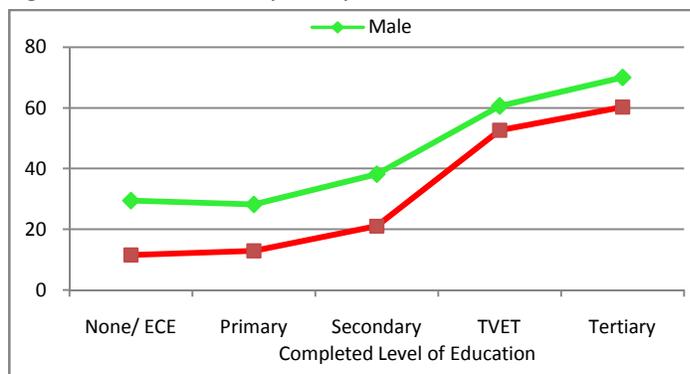

Those who have completed tertiary level had the highest participation rate with 64.9 percent while those who never completed an education level or completed only ECE has the lowest rate with only 21.4 percent. For males, those who have completed tertiary level have the highest rate with 70.1 percent. Similarly, females who have also completed tertiary level have the highest rate with 60.3 percent. (Table 4.2.3.1).

Table 4.2.3.1: LFPR by Completed Level of Education and Sex

| Completed Level of Education | SAMOA | Male | Female |
|------------------------------|-------------|-------------|-------------|
| TOTAL | 32.2 | 39.9 | 24.4 |
| None/ ECE | 21.4 | 29.5 | 11.5 |
| Primary | 21.7 | 28.2 | 12.9 |
| Secondary | 29.4 | 38.2 | 21.0 |
| TVET | 57.0 | 60.7 | 52.6 |
| Tertiary | 64.9 | 70.1 | 60.3 |

It can also be said that the higher the completed level of education, the higher the participation rate, as depicted in Figure 4.2.3.1. It is also interesting to observe that the difference between the male and female participation rates is smallest for the two highest completed levels of education.

Figure: 4.2.3.1: LFPR By Completed Level of Education

4.3 NON-ECONOMICALLY ACTIVE POPULATION (NOT IN LABOUR FORCE)

The Non-Economically Active Population usually consists of students, old aged, disabled people and those engaged in domestic duties. By ILO definition in relation to Samoa's case, those WAP who engaged in subsistence agriculture for consumption 'only' or those who engaged in subsistence agriculture 'mainly' for consumption were considered to be non-economically active or are not in the labour force (see appendix A) and this definition will be used throughout this report.

As can be seen from Table 4.3.1, the total non-economically active population (not in labour force) was reported to be 79,657 (67.8 percent) of whom 44.7 percent were males and 55.3 were females. Furthermore, the majority of the non-economically active population was located in the rural area with 83.9 percent while only 16.3 percent was located in the urban area.

Furthermore, 23.4 percent (8,093) of total employed population were employed in subsistence production only. For the unemployed, 57.7 percent (1,903) were engaged in subsistence production. From the total of 79,657 non-economically active population, more than half or 54.5 percent (43,382) were reported to be engaged in subsistence production.

Table 4.3.1: Activity Status of WAP with subsistence farming, by sex and areas of residence (urban-rural)

| Sex/ Area | SAMOA | Employed | | | Unemployed | | Labour force | | Not in the labour force | |
|---------------|----------------|---------------|--|--|--------------|--|---------------|--|-------------------------|--|
| | | Total | of which employed AND in subsistence production | of which ONLY in subsistence production | Total | of which in subsistence production | Total | of which in subsistence production | Total | of which in subsistence production |
| TOTAL | 117,487 | 34,530 | 13,809 | 8,093 | 3,300 | 1,903 | 37,830 | 23,804 | 79,657 | 43,382 |
| Male | 59,270 | 21,787 | 9,760 | 5,176 | 1,843 | 1,305 | 23,630 | 16,241 | 35,640 | 24,531 |
| Female | 58,217 | 12,743 | 4,049 | 2,917 | 1,457 | 598 | 14,200 | 7,563 | 44,017 | 18,851 |
| Urban | 24,045 | 9,893 | 3,557 | 633 | 1,156 | 617 | 11,049 | 4,807 | 12,996 | 4,622 |
| Rural | 93,442 | 24,637 | 10,252 | 7,460 | 2,144 | 1,286 | 26,781 | 18,997 | 66,661 | 38,760 |

By region, the majority of the Non-Economically Active Population was located in the NWU region with 31.4 percent while AUA constitute only 16.3 percent. The table also revealed that females have a higher proportion of the non-economically active population throughout the country when compared to their male counterpart. (Table 4.3.2).

Table 4.3.2: Economically Inactive Population by Geographical Region

| Geographic Region | Economically Inactive Population | | | | | |
|-------------------|----------------------------------|--------------|---------------|-------------|---------------|-------------|
| | Total | % | Male | % | Female | % |
| SAMOA | 79,657 | 100.0 | 35,640 | 44.7 | 44,017 | 55.3 |
| AUA | 12,996 | 16.3 | 5,380 | 41.4 | 7,616 | 58.6 |
| NWU | 25,052 | 31.4 | 10,836 | 43.2 | 14,217 | 56.8 |
| ROU | 21,080 | 26.5 | 9,995 | 47.4 | 11,085 | 52.6 |
| SAV | 20,529 | 25.8 | 9,430 | 45.9 | 11,099 | 54.1 |

Table 4.3.3 indicates that the highest number of the non-economically active population is made up of those aged between 15-19 years, most of which are students. By contrast, those aged between 60-64 years had the least contribution to the non-economically active population with only 4.5 percent. The table further shows that the non-economically active population are highly concentrated in younger (15-19 years) and older (65 and above) age groups than all the other age groups.

Table 4.3.3: Economically Inactive Population by Sex and Age Group

| Age Group | SAMOA | Male | Female |
|--------------|---------------|---------------|---------------|
| TOTAL | 79,657 | 35,640 | 44,017 |
| 15-19 years | 20.3 | 22.1 | 18.8 |
| 20-24 years | 10.7 | 11.1 | 10.4 |
| 25-29 year | 7.1 | 6.9 | 7.2 |
| 30-34 years | 11.3 | 10.3 | 12.1 |
| 35-39 years | 8.2 | 7.3 | 8.8 |
| 40-44 years | 7.9 | 7.5 | 8.2 |
| 45-49 years | 6.2 | 5.8 | 6.5 |
| 50-54 years | 6.6 | 6.4 | 6.7 |
| 55-59 years | 5.8 | 6.2 | 5.4 |
| 60-64 years | 4.5 | 4.8 | 4.2 |
| 65+ years | 11.6 | 11.6 | 11.7 |

5 EMPLOYMENT

A total of 34,530 persons aged 15 and above were reported to be employed with 21,787 males (63.1 percent) and 12,743 females (36.9 percent). The majority of this total was located in the NWU with 39.6 percent, followed by AUA with 28.7 percent, SAV with 17.1 percent then ROU with 14.6 percent. Moreover, all the regions revealed that employed males were almost as twice as their female counterpart. (Table 5.1)

Table 5.1: Employed Population by Region and Sex

| Sex | SAMOA | | AUA | | NWU | | ROU | | SAV | |
|-------------|---------------|--------------|--------------|-------------|---------------|-------------|--------------|-------------|--------------|-------------|
| TOAL | 34,530 | 100.0 | 9,893 | 28.7 | 13,670 | 39.6 | 5,042 | 14.6 | 5,925 | 17.1 |
| Male | 21,787 | 63.1 | 6,036 | 61.0 | 8,499 | 62.2 | 3,369 | 66.8 | 3,883 | 65.5 |
| Female | 12,743 | 36.9 | 3,857 | 39.0 | 5,171 | 37.8 | 1,673 | 33.2 | 2,042 | 34.5 |

The employment-to-population ratio (EPR), a MDG indicator related to full and productive employment (MDG Indicator number 1.5), stood at 29.4 per cent, and was about 15.0 per cent higher for males (at 36.8 per cent) than for females (21.9 per cent). Furthermore, it was much higher in the urban region with 41.1 per cent and the lowest being in the Savaii region at 21.9 percent.

Table 5.1.0: Employment-to-Population Ratio by Region

| Sex | SAMOA | AUA | NWU | ROU | SAV |
|--------|-------|------|------|------|------|
| Total | 29.4 | 41.1 | 34.3 | 19.1 | 21.9 |
| Male | 36.8 | 49.8 | 42.6 | 24.9 | 28.4 |
| Female | 21.9 | 32.4 | 25.9 | 13.0 | 15.2 |

5.1 Employed population by completed level of education

Those employed persons who completed secondary level of education represent 61.0 percent of total employed population. This is followed by those who completed TVET level with a distant 13.4 percent, tertiary level with 13.2 percent, primary level with 10.4 percent and ECE level or those that never complete any level of education with a mere 2.0 percent. Table 5.1.1 also reveals that those who completed secondary level of education in all the regions have the highest percentage contribution to employment while those who completed only ECE or those who never completed any education level have the least contribution in all of the regions.

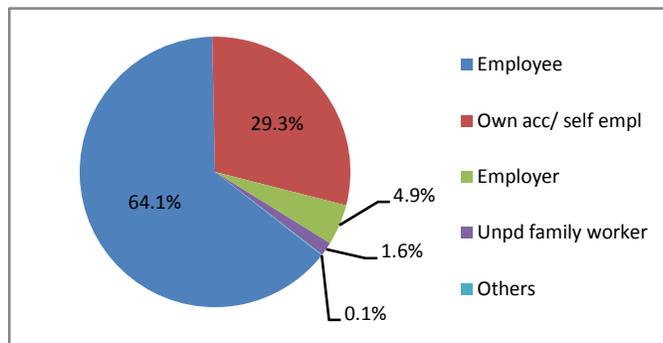

Table 5.1.1: Employed Population by Completed Level of Education and Region

| Completed Level of Education | SAMOA | | AUA | | NWU | | ROU | | SAV | |
|------------------------------|---------------|--------------|--------------|--------------|---------------|--------------|--------------|--------------|--------------|--------------|
| Total | 34,530 | 100.0 | 9,893 | 100.0 | 13,670 | 100.0 | 5,042 | 100.0 | 5,925 | 100.0 |
| None/ ECE | 690 | 2.0 | 383 | 3.9 | 19 | 0.1 | 205 | 4.1 | 84 | 1.4 |
| Primary | 3,606 | 10.4 | 820 | 8.3 | 1,478 | 10.8 | 599 | 11.9 | 710 | 12.0 |
| Secondary | 21,062 | 61.0 | 5,179 | 53.3 | 8,561 | 62.6 | 3,447 | 68.4 | 3,875 | 65.4 |
| TVET | 4,612 | 13.4 | 1,433 | 14.5 | 1,948 | 14.3 | 390 | 7.7 | 842 | 14.2 |
| Tertiary | 4,560 | 13.2 | 2,078 | 21.0 | 1,664 | 12.2 | 402 | 7.9 | 415 | 7.0 |

5.2 Employment Status

Almost two thirds (64.1 percent) of total employment are employees, 29.3 percent are own account workers/ self employed, 4.9 percent are employers and 1.6 percent are contributing unpaid family workers. (Figure 5.2.1) The total of own account workers and contributing family workers, a MDG employment related indicator (MDG Indicator number 1.7), make up 30.9 per cent of total employment. This was previously often referred to as vulnerable employment.

Figure 5.2.1: Employed Population by Status in Employment

As illustrated in Table 5.2.1, most of the employed population is located in the rural area representing almost three quarters (71.3 percent) of total employment. In addition to this, there are more employed males than females in both the urban and rural areas.

Table 5.2.1: Employed Population by Status in Employment and Sector

| Sex | SAMOA | | URBAN | | RURAL | |
|--------------|---------------|--------------|--------------|-------------|---------------|-------------|
| | Count | % | Count | % | Count | % |
| TOTAL | 34,530 | 100.0 | 9,893 | 28.7 | 24,637 | 71.3 |
| Male | 21,787 | 63.1 | 6,036 | 17.5 | 15,751 | 45.6 |
| Female | 12,743 | 36.9 | 3,857 | 11.2 | 8,886 | 25.7 |

5.3 Employment by Occupation

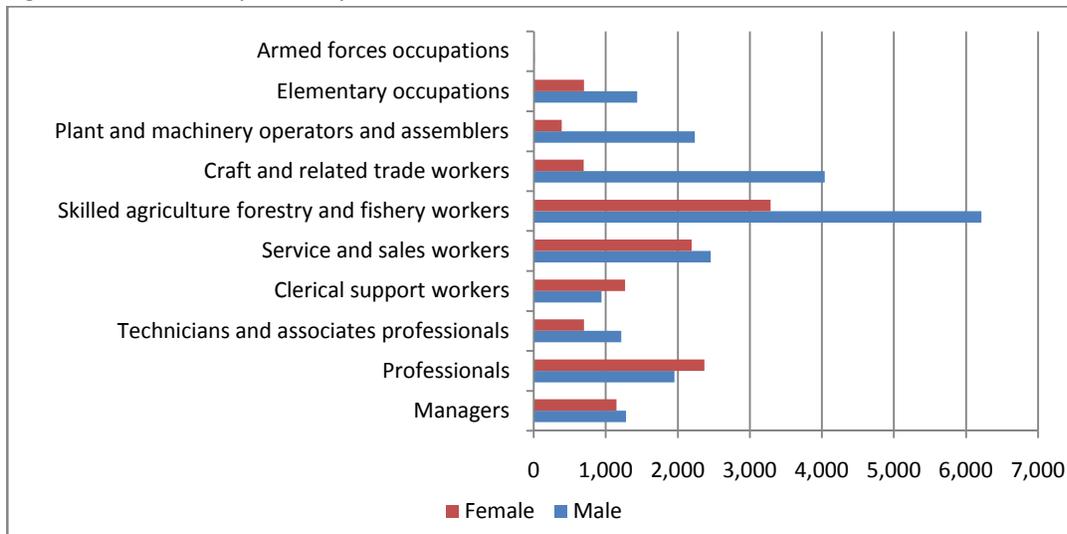

Table 5.3.1: Employed Persons by Occupation and Sex

| Occupation | SAMOA | | Male | | Female | |
|--|---------------|--------------|---------------|--------------|---------------|--------------|
| | Count | % | Count | % | Count | % |
| TOTAL | 34,530 | 100.0 | 21,787 | 100.0 | 12,744 | 100.0 |
| Managers | 2,433 | 7.0 | 1,283 | 5.9 | 1,150 | 9.0 |
| Professionals | 4,323 | 12.5 | 1,955 | 9.0 | 2,369 | 18.6 |
| Technicians and associates professionals | 1,915 | 5.5 | 1,215 | 5.6 | 700 | 5.5 |
| Clerical support workers | 2,211 | 6.4 | 940 | 4.3 | 1,270 | 10.0 |
| Service and sales workers | 4,651 | 13.5 | 2,458 | 11.3 | 2,193 | 17.2 |
| Skilled agriculture forestry and fishery workers | 9,501 | 27.5 | 6,215 | 28.5 | 3,286 | 25.8 |
| Craft and related trade workers | 4,729 | 13.7 | 4,037 | 18.5 | 692 | 5.4 |
| Plant and machinery operators and assemblers | 2,621 | 7.6 | 2,234 | 10.3 | 387 | 3.0 |
| Elementary occupations | 2,135 | 6.2 | 1,438 | 6.6 | 697 | 5.5 |
| Armed forces occupations | 12 | 0.0 | 12 | 0.1 | 0 | 0.0 |

Based on ISCO 08, the majority of the employed population are employed in the skilled agriculture, forestry and fishery worker group with 27.5 percent followed by craft and related trade workers with a distant 13.7 percent which is closely followed by Service and sales workers with 13.5 percent indicating that the top three occupations make up 54.7 percent of the employed population. (Table 5.3.1).

Additionally, more than a quarter (28.5 percent) of the male employed population are in the Skilled agriculture, forestry and fishery worker group and this is the same with females but with a lesser percent of 25.8. Apart from the armed forces occupation group, the other smaller occupational group for males at only 4.3 percent is clerical workers. Females on the other hand had its smallest proportion of only 3.0 percent of its female employed population working in the plant and machinery operators and assemblers group.

Figure 5.3.1.1: Occupation by Sex

Region wise, the majority of the employed population was from NWU with 39.6 percent followed by AUA with 28.7 percent, SAV with 17.1 and ROU with 14.6 percent. (Table 5.3.2).

Table 5.3.2: Employed Population by Region and Sex

| Sex | SAMOA | | AUA | | NWU | | ROU | | SAV | |
|--------------|---------------|--------------|--------------|-------------|---------------|-------------|--------------|-------------|--------------|-------------|
| TOTAL | 34,530 | 100.0 | 9,893 | 28.7 | 13,670 | 39.6 | 5,042 | 14.6 | 5,925 | 17.1 |
| Male | 21,787 | 63.1 | 6,036 | 17.5 | 8,499 | 24.6 | 3,369 | 9.8 | 3,883 | 11.2 |
| Female | 12,743 | 36.9 | 3,857 | 11.2 | 5,171 | 15.0 | 1,673 | 4.8 | 2,042 | 5.9 |

5.4 Employment by Industry

Presented in Table 5.4.1 is the distribution of the employed population by industry (based on ISIC R4) and sex revealing that the top three industries where males are employed in are Activities of households as employers with 24.5 percent, Construction with 9.7 percent and Wholesale and Retail with 9.3 percent constituting 43.5 percent to total male employed population. On the other hand, the top three industries for females are Activities of households as employers with 26.6 percent, Wholesale and retail with 13.6 percent and Education with 12.1 percent constituting more than half (52.3 percent) to total female employed population.

Table 5.4.1 Employed Population by Industry and Sex

| Industry | SAMOA | | Male | | Female | |
|--|---------------|--------------|---------------|--------------|---------------|--------------|
| | No. | % | No. | % | No. | % |

| Activities of households as employers; undifferentiated goods- and services-producing activities of households for own use | 8,735 | 25.3 | 5,348 | 24.5 | 3,387 | 26.6 |
| Activities of extraterritorial orgs & bodies | 50 | 0.1 | 27 | 0.1 | 23 | 0.2 |

6 UNEMPLOYMENT

From the Working Age Population of 117,487, a total of 3,300 persons were reported as being unemployed where 55.8 percent were males and 44.2 percent were females. (Refer Table 6.1). The largest number of the unemployed are from AUA with 35.0 percent (1,156) while the least being from NWU with 9.4 percent (309). This implies that there are more people in AUA that were actively looking and were available for work when an opportunity exists.

Table 6.1: Unemployed population by Region and Sex

| Region | SAMOA | | Male | | Female | |
|--------------|--------------|--------------|--------------|-------------|--------------|-------------|
| TOTAL | 3,300 | 100.0 | 1,843 | 55.8 | 1,457 | 44.2 |
| AUA | 1,156 | 35.0 | 711 | 38.6 | 445 | 30.5 |
| NWU | 1,182 | 25.8 | 623 | 33.8 | 558 | 38.3 |
| ROU | 309 | 9.4 | 157 | 8.5 | 152 | 10.5 |
| SAV | 653 | 19.8 | 351 | 19.1 | 302 | 20.7 |

6.1 Unemployment Rate

At the national level, the survey revealed the unemployment rate to be 8.7 percent where females have a higher rate than males with 10.3 percent and 7.8 percent respectively. Furthermore, both males and females in the urban area have higher unemployment rates than those in the rural area. (Refer Table 6.1.1). This suggests that those in the urban area have the tendency to actively look for work than those in the rural area due to more job opportunities in AUA.

Table 6.1.1: Unemployment Rates by Sector and Sex

| Sector | SAMOA | Male | Female |
|--------------|------------|------------|-------------|
| SAMOA | 8.7 | 7.8 | 10.3 |
| Urban | 10.5 | 10.5 | 10.3 |
| Rural | 8.0 | 6.7 | 10.2 |

The unemployment rates in previous data collection exercises were lower than in 2012 for instance; it was 5.7 per cent in 2011 from the population census. While unemployment could have increased, one major explanation is due to conceptual differences; the LFS 2012 has removed those in subsistence production mainly or only for own consumption, and a number of them were actually found looking for jobs, therefore in unemployment.

6.1.1 Unemployment Rates by Age Group

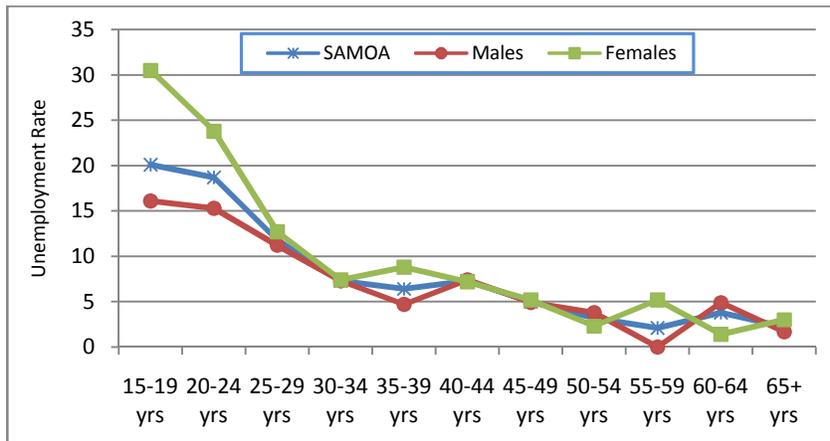

Table 6.1.1.1: Unemployment Rates by Age Group and Sex

| Age Group | SAMOA | Male | Female |
|---------------|------------|------------|-------------|
| SAMOA | 8.7 | 7.8 | 10.3 |
| 15 - 19 years | 20.1 | 16.1 | 30.5 |
| 20 - 24 years | 18.7 | 15.3 | 23.8 |
| 25 - 29 years | 11.8 | 11.2 | 12.7 |
| 30 - 34 years | 7.3 | 7.3 | 7.4 |
| 35 - 39 years | 6.4 | 4.7 | 8.8 |
| 40 - 44 years | 7.3 | 7.4 | 7.2 |
| 45 - 49 years | 5.0 | 4.9 | 5.2 |
| 50 - 54 years | 3.2 | 3.8 | 2.3 |
| 55 - 59 years | 2.1 | 0.0 | 5.2 |
| 60 - 64 years | 3.8 | 4.9 | 1.4 |
| 65 and above | 2.2 | 1.7 | 3.0 |

By age group, the highest rate of unemployment was found in the young population (aged 15-19 years) with 20.1 percent. Conversely, the lowest rate was found in the older population (65 years and above) with only 2.2 percent. People between the ages of 15-19 have the highest unemployment rates with males recording 16.1 percent and females with a rate almost twice as much as those of males at 30.5 percent.

Furthermore, Youth (those aged 15-29 years) have the highest rates of unemployment for both males and females when compared to all the other age groups and while males are better situated than females for all age groups, inequalities are much striking among youth. Overall, the unemployment rates decline steadily as the age groups progresses. (Figure 6.1.1.1)

Figure 6.1.1.1: Unemployment Rates by Age Group and Sex

6.1.2 Unemployment Rates by Region

The following table illustrates the unemployment rates for each region showing that AUA is the worst of all the regions with the highest rate of 10.5 then by SAV with 9.9 percent, both of which are above the national average of 8.7 percent. NWU and ROU have unemployment rates below the national average with 8.0 percent and 5.8 percent respectively. By sex, females in SAV have the highest unemployment rate of 12.9 percent.

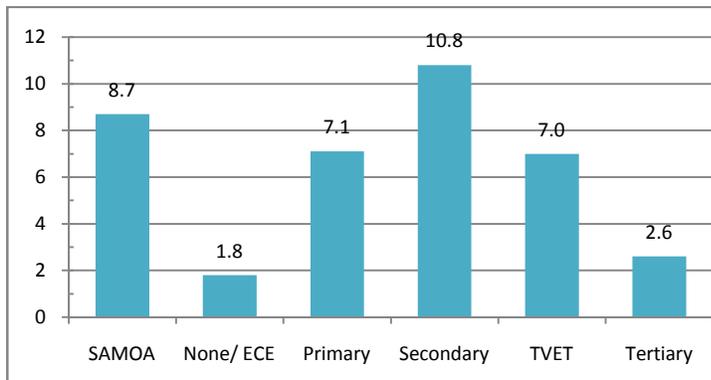

Table 6.1.2.1: Unemployment Rates by Region and Sex

| Region | SAMOA | Male | Female |
|--------------|------------|------------|-------------|
| SAMOA | 8.7 | 7.8 | 10.3 |
| AUA | 10.5 | 10.5 | 10.3 |
| NWU | 8.0 | 6.8 | 9.7 |
| ROU | 5.8 | 4.5 | 8.4 |
| SAV | 9.9 | 8.3 | 12.9 |

6.1.3 Unemployment Rates by Completed Level of Education

The survey revealed that unemployment rate is higher for those who have completed Secondary Level of Education yielding 10.8 percent while the lowest rate was found in those who never completed a level of Education or those who only completed ECE with only 1.8 percent. (Figure 6.1.2.1). This indicates that the severity of unemployment is more concentrated to those who have completed secondary level of education compared to those who completed ECE or who never completed any level of education.

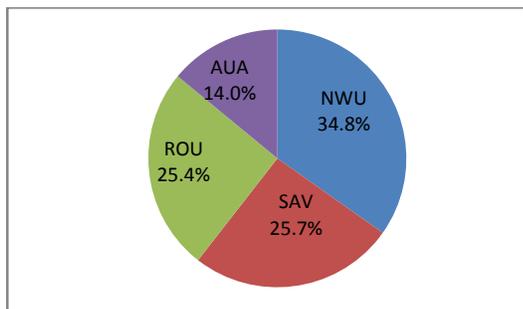

Figure 6.1.2.1: Unemployment Rates by Completed Level of Education

7 SUBSISTENCE PRODUCTION

The survey revealed that a total of approximately 67,190 aged 15 years and above were engaged in production for subsistence purposes, mostly in agriculture and related activities. Of this total, NWU reported 23,375, SAV with 17,289, ROU with 17,094 and AUA reported the least with a distant 9,429. (Figure 7.1). This implies that the majority of persons in the rural area are engaged in subsistence production when compared to the urban area where people tend to be employed. Furthermore, males comprised 60.7 percent of total people engaged in subsistence production while females make up the remaining 36.9 percent.

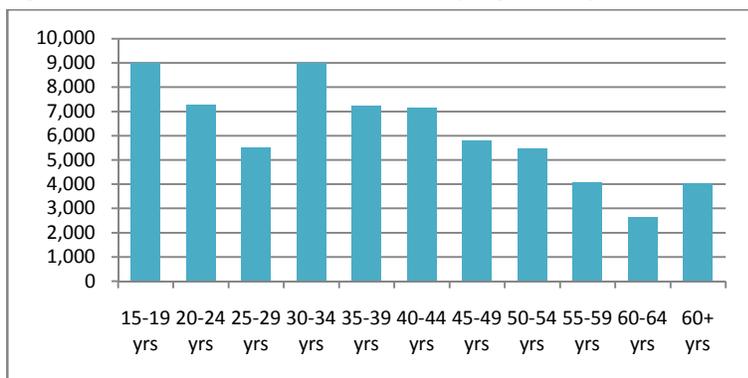

Figure 7.1: Subsistence Production by Region

7.1 Subsistence Production by Age Group

As depicted in Figure 7.1.1, the highest figures of the population aged 15 years and above who engaged in subsistence production are in the age group of 15 – 19 years with 9,003. This is closely followed by the 30 – 34 years age group with 8,972 then by the age group 20 - 24 years with 7,258. Not surprisingly, all the age groups reported some people engaging in subsistence production. A detailed graphical analysis of participation in subsistence production by age group is presented below.

Figure 7.1.1: Subsistence Production by Age Group

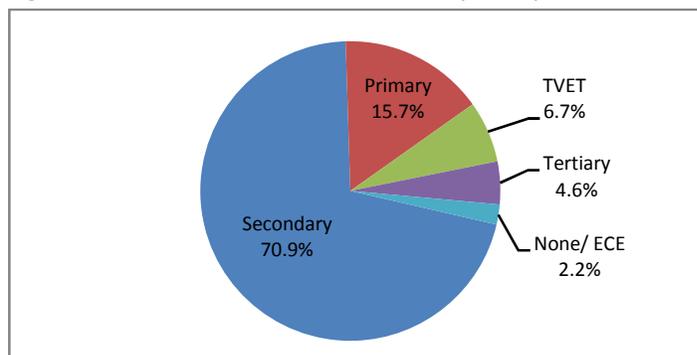

7.2 Subsistence Production by Completed Level of Education

Surprisingly, the majority of those engaged in subsistence production have completed secondary level of education as reported by 47,623 individuals aged 15 and over followed by those who have completed primary education level with a distant 10,528.

Those who have completed only ECE or who never completed any level of education exhibit the lowest number of people with only 1,467. (Figure 7.2.1)

Figure 7.2.1: Subsistence Production by Completed Level of Education

In addition to this, males who completed any level of education have a higher percentage of engaging in subsistence production compared to their female counterpart. It is further noted that the greatest disparity between sexes was reported by the first two completed levels of education where males engaged in subsistence production were more than twice as much as females. (Table 7.2).

Table 7.2: Subsistence Production by Completed Level of Education and Sex

| Completed Level of Ed. | SAMOA | % | Male | % | Female | % |
|------------------------|---------------|--------------|---------------|-------------|---------------|-------------|
| TOTAL | 67,186 | 100.0 | 40,772 | 60.7 | 26,414 | 37.3 |
| ECE/None | 1,467 | 2.2 | 1,035 | 70.6 | 431 | 29.4 |
| Primary | 10,528 | 15.7 | 7,382 | 70.1 | 3,146 | 29.9 |
| Secondary | 47,623 | 70.9 | 27,719 | 58.2 | 19,904 | 41.8 |
| TVET | 4,477 | 6.7 | 2,965 | 66.2 | 1,512 | 33.8 |
| Tertiary | 3,092 | 4.6 | 1,671 | 54.0 | 1,421 | 46.0 |

7.3 Subsistence Production by Activity

The predominant activity of subsistence production reported by the survey was farm production with 50,883 people followed by looking after animals with 32,030 individuals. Fetching water/ collecting firewood activity were reported by 2,556 people while 7,880 people reported engaging in fishing activities.

7.3.1 Subsistence Production by Sex

As shown in Table 7.3.1.1 below, males dominate all types of activities except for the production of clothing, furniture which is more than twice as many females as males produced. On the other hand, males are very dominant in the catching fish activity where they represent more than three quarters of those engaged in fishing activities.

Table 7.3.1.1: Distribution of Subsistence Production by Type of Activity and Sex

| Type of Activity | TOTAL | Male | | Female | |
|-------------------------------|--------|--------|-------|--------|-------|
| Farm Production | 50,883 | 34,837 | 68.5% | 16,047 | 31.5% |
| Look after animals | 32,030 | 19,438 | 60.7% | 12,592 | 39.3% |
| Construction/ repair work | 4,406 | 2,959 | 67.2% | 1,447 | 32.8% |
| Catch fish | 7,880 | 6,018 | 76.4% | 1,862 | 23.6% |
| Fetch water/ collect firewood | 22,556 | 13,446 | 59.6% | 9,110 | 40.4% |
| Produce clothing, furniture, | 2,641 | 673 | 25.5% | 1,967 | 64.5% |

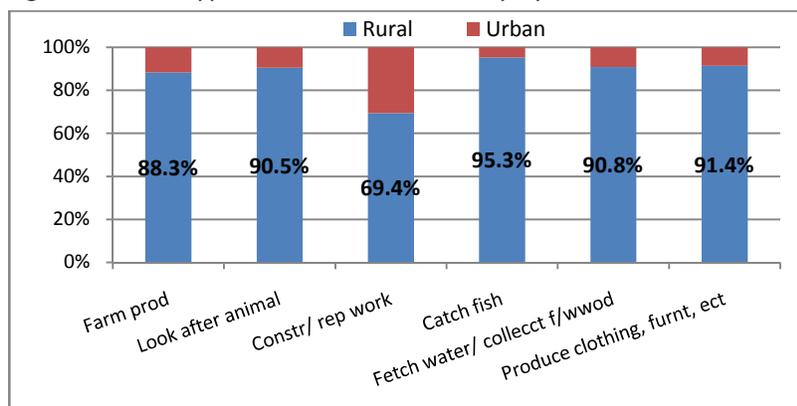

7.3.2 Subsistence Production by Area (Urban- Rural)

It's evident from Table 7.3.2.1 below that most of the subsistence activities occurred in the rural area, the highest being catching fish with nearly all (95.3 percent) of rural people engaged in fishing activities. The least engaged activity in rural areas was construction/ repair work with 69.4 percent engaged in this but in the urban area, this was the most engaged in at 30.6 percent. This is reflective of the current situation in Samoa where those in the rural area tend to engaged more in subsistence production due to the availability and having direct access to land for agricultural purposes. Figure 7.3.2.1 portrays a graphical comparison between urban and rural areas by types of subsistence activities

Table 7.3.2.1: Distribution of Subsistence Production Type of Activity and Area

| Type of Activity | SAMOA | Urban | | Rural | |
|-------------------------------|--------|-------|-------|--------|-------|
| Farm Production | 50,883 | 5,948 | 11.7% | 44,935 | 88.3% |
| Look after animals | 32,030 | 3,044 | 9.5% | 28,986 | 90.5% |
| Construction/ repair work | 4,406 | 1,347 | 30.6% | 3,060 | 69.4% |
| Catch fish | 7,880 | 369 | 4.7% | 7,511 | 95.3% |
| Fetch water/ collect firewood | 22,556 | 2,068 | 9.2% | 20,488 | 90.8% |
| Produce clothing, furniture | 2,641 | 227 | 8.6% | 2,414 | 91.4% |

Figure 7.3.2.1: Type of Subsistence Activity by Area

7.4 Employed Population in Subsistence Production

As defined in chapter two, this refers to those people who were 'economically inactive' or currently unemployed but were engaged in subsistence activities 'mainly for sale' even if it could be for household use.

Based on the above definition, the survey reported a total of 8,093 people to be employed in subsistence production. Of this total, 5,176 were males and 2,196 were females. Most of these people were located in ROU numbering 2,975 which is closely trailed by SAV with 2,916 people. NWU followed next with 1,569 and as expected, AUA had the lowest number of people with a distant 633 reported cases. This clearly indicates the fact that most of the subsistence production activities of the employed population in subsistence production occurred in the rural area.

The age group 30-34 years had the highest number of people employed in subsistence production with 1,078 where SAV constitute almost half or 45.5 percent (490) of this total. The lowest number of people was reported from the older population in the age groups of 60-64 years and 65+ years with 326 and 490 cases respectively. Additionally, AUA had the fewest number of people employed in subsistence production for all the age groups. (Table 7.4.1.1).

Table 7.4.1.1: Employed Population in Subsistence Production by Age Group and Region

| Age Group | SAMOA | Male | Female | AUA | NWU | ROU | SAV |
|---------------|--------------|--------------|--------------|------------|--------------|--------------|--------------|
| Total | 8,093 | 5,176 | 2,916 | 633 | 1,569 | 2,975 | 2,916 |
| 15 - 19 years | 983 | 753 | 230 | 60 | 276 | 306 | 341 |
| 20 - 24 years | 722 | 488 | 234 | 85 | 184 | 239 | 214 |
| 25 - 29 years | 583 | 372 | 211 | 8 | 102 | 252 | 221 |
| 30 - 34 years | 1,078 | 652 | 426 | 105 | 191 | 292 | 490 |
| 35 - 39 years | 775 | 429 | 345 | 67 | 127 | 222 | 359 |
| 40 - 44 years | 862 | 572 | 290 | 15 | 181 | 341 | 325 |
| 45 - 49 years | 821 | 572 | 249 | 49 | 110 | 344 | 318 |
| 50 - 54 years | 865 | 491 | 374 | 83 | 109 | 441 | 233 |
| 55 - 59 years | 586 | 285 | 301 | 69 | 128 | 215 | 174 |
| 60 - 64 years | 326 | 256 | 70 | 13 | 40 | 187 | 87 |
| 65+ | 490 | 305 | 186 | 79 | 121 | 136 | 154 |

7.4.1 Proportion of Employed Population in Subsistence Production

The survey revealed 12.0 percent to be the proportion of employed population in subsistence production in Samoa. At the national level, males seemed to have higher proportion than females with 12.7 percent and 11.0 percent respectively. The rural sector has a proportion of 12.9 which is almost twice as much as the urban sector, with a proportion of only 6.7 percent.

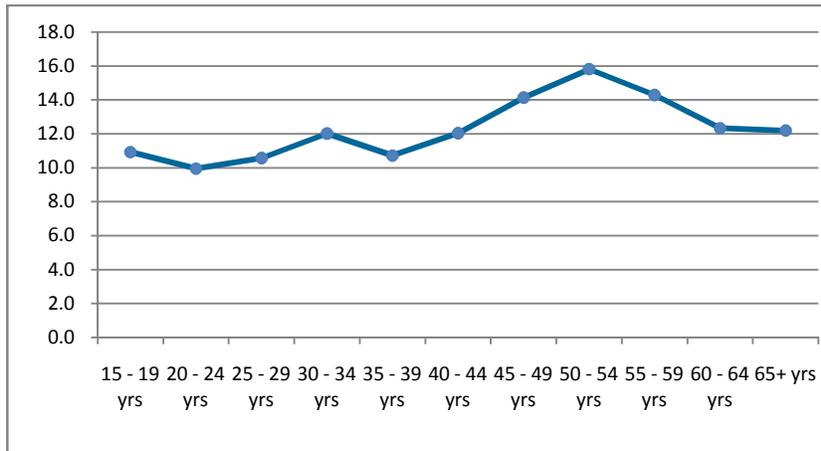

Region wise, AUA and NWU exhibit the lowest proportions with 6.7 percent. On the other hand, SAV and ROU had proportions that are more than twice as the other two regions with 16.9 percent and 17.4 percent respectively. (Table 7.4.1.1).

Table 7.4.1.1: Proportion of Employed Population in Subsistence Production by Age Group, Sex and Region

| Age Group | SAMOA | | | AUA | NWU | ROU | SAV |
|---------------|-------------|-------------|-------------|------------|------------|-------------|-------------|
| | Total | Male | Female | | | | |
| Samoa | 12.0 | 12.7 | 11.0 | 6.7 | 6.7 | 17.4 | 16.9 |
| 15 - 19 years | 10.9 | 13.3 | 6.9 | 5.0 | 8.1 | 14.4 | 15.1 |
| 20 - 24 years | 9.9 | 10.1 | 9.7 | 8.9 | 6.4 | 13.6 | 12.9 |
| 25 - 29 years | 10.6 | 11.4 | 9.4 | 1.1 | 5.0 | 16.6 | 18.2 |
| 30 - 34 years | 12.0 | 12.6 | 11.2 | 9.8 | 5.9 | 12.9 | 20.4 |
| 35 - 39 years | 10.7 | 10.7 | 10.7 | 6.0 | 4.7 | 13.7 | 19.9 |
| 40 - 44 years | 12.0 | 13.0 | 10.5 | 1.4 | 7.5 | 19.8 | 16.5 |
| 45 - 49 years | 14.1 | 16.3 | 10.8 | 6.2 | 5.9 | 22.7 | 19.7 |
| 50 - 54 years | 15.8 | 15.5 | 16.2 | 9.8 | 6.7 | 28.9 | 15.9 |
| 55 - 59 years | 14.3 | 11.3 | 19.2 | 12.3 | 10.5 | 18.3 | 15.2 |
| 60 - 64 years | 12.3 | 14.4 | 8.1 | 3.3 | 4.4 | 25.0 | 14.5 |
| 65 and above | 12.2 | 12.6 | 11.7 | 11.5 | 11.3 | 12.1 | 13.5 |

By age group, the lowest proportions were reported from the age groups of 20-24 years and 15-19 years with 9.9 percent and 10.9 percent respectively. These low proportions are reflective of the fact that the majority of the young youths are attending full time education. The highest proportion was reported by the age group of 50-54 years with 15.8 percent. (Figure 7.4.1.1).

Figure 7.4.1.1: Proportion of Employed Population in Subsistence Production by Age Group

8 INFORMAL EMPLOYMENT

Institutional sector of employment is classified into three categories: formal sector, informal sector and household sector. Out of the 34,530 employed population reported by the survey, 20,000 (57.9 percent) were captured being employed in the formal sector, 13,887 (40.2 percent) employed in the household sector while only 643 (1.9 percent) in the informal sector. (Figure 8.1).

In terms of employment status, the majority were reported to be employees with 22,132 (18,926 employed in the formal sector) followed by own account workers/ self-employed with 10,133 (9,806 employed in the household sector) then by employers with a distant 1,697 (1,032 in the household sector). (Figure 8.2).

Figure 8.1: Institutional Sector of Employment by Type.

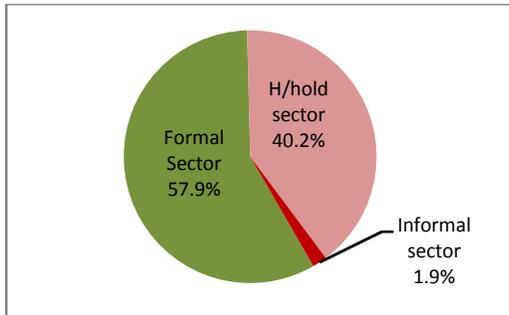

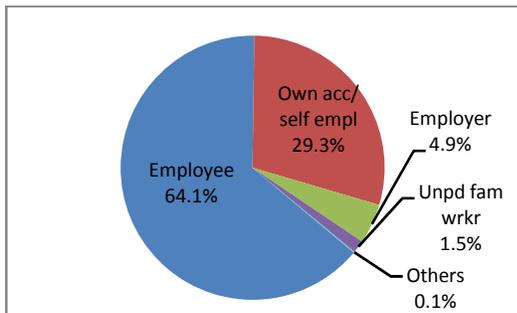

Figure 8.2: Employment Status by Type

8.1 Institutional Sector of Employment by Occupation

In the formal sector, those employed as professionals reported the highest number with 3,932 making up 19.7 percent of total employed in the formal sector and not far off are service and sales workers with 3,283 representing 16.4 percent. Next are craft and related trade workers with 2,991 representing 15.0 percent of total formal sector employment. Furthermore, males make up 62.6 percent while females round up the remaining 37.8 percent of all those occupation in the formal sector. (Table 8.1.1).

From a total of only 643 employed in the informal sector, professionals were surprisingly the predominant type of occupation with 291 or 45.3 percent. The other significant type of occupation within this sector was craft and related trade workers as reported by 99 people thus, representing 15.4 percent of total. All the other types of occupation had contributions of less than ten percent.

By sex, males constitute 78.5 percent while females constitute only 21.5 percent to total occupation in the informal sector. (Table 8.1.1).

As expected with the household, the three significant types of occupation were skilled agriculture, forestry and fishery workers as reported by 8,956 employed people (64.5 percent), craft and related trade workers with 1,639 reported cases (11.8 percent) and service and sales workers with 1,354 people (9.8 percent). All the other occupational types had contributions of less than five percent. Males make up 63.0 percent and females make up 37.0 percent of those in the household sector. (Table 8.1.1).

Table 8.1.1: Institutional Sector of Employment by Occupation

| Occupation | SAMOA | | Formal Sector | | Informal Sector | | Household | |
|---|---------------|--------------|---------------|-------------|-----------------|------------|---------------|-------------|
| | | | | | | | | |
| Total | 34,530 | 100.0 | 20,000 | 57.9 | 643 | 1.9 | 13,887 | 40.2 |
| Managers | 2,433 | 7.0 | 1,820 | 9.1 | 40 | 6.2 | 573 | 4.1 |
| Professionals | 4,323 | 12.5 | 3,932 | 19.7 | 291 | 45.3 | 101 | 0.7 |
| Technicians & associates professionals | 1,915 | 5.5 | 1,743 | 8.7 | 28 | 4.4 | 144 | 1.0 |
| Clerical support workers | 2,211 | 6.4 | 2,035 | 10.2 | 56 | 8.7 | 120 | 0.9 |
| Service & sales workers | 4,651 | 13.5 | 3,283 | 16.4 | 14 | 2.2 | 1,354 | 9.8 |
| Skilled agriculture, forestry & fishery workers | 9,501 | 27.5 | 485 | 2.4 | 59 | 9.2 | 8,956 | 64.5 |
| Craft & related trade workers | 4,729 | 13.7 | 2,991 | 15.0 | 99 | 15.4 | 1,639 | 11.8 |
| Plant & machinery operators and assemblers | 2,621 | 7.6 | 2,108 | 10.5 | 0 | 0.0 | 513 | 3.7 |
| Elementary occupations | 2,135 | 6.2 | 1,592 | 8.0 | 56 | 8.7 | 487 | 3.5 |
| Armed forces occupations | 12 | 0.0 | 12 | 0.1 | 0 | 0.0 | 0 | 0.0 |

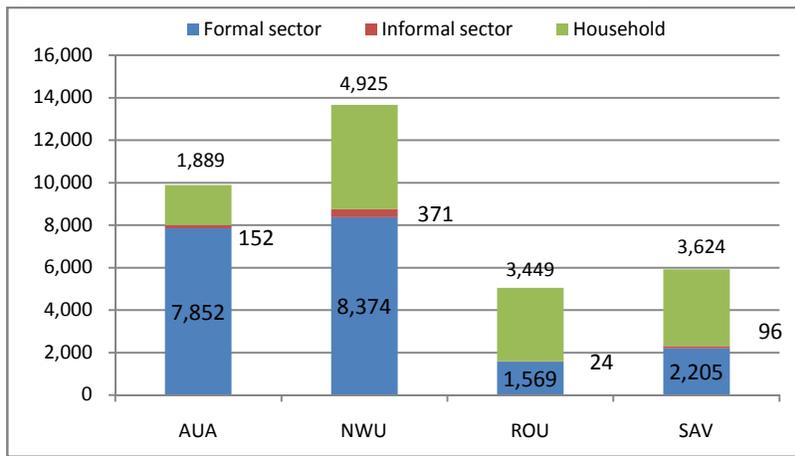

8.2 Institutional Sector of Employment by Region

From a total of 9,893 employed people in AUA, the majority are employed in the formal sector with 7,852 people while the least number of people are employed in the informal sector with only 152.

NWU reported 13,760 employed population where most of them are employed in the formal sector as indicated by 8,374 people. The informal sector in this region employed only 371 people. Furthermore, NWU reported to have the highest number of the employed population in all the institutional sectors.

ROU and SAV both reported household as the main institutional sector of employment as represented by 3,449 and 3,624 people respectively. They further reported that the informal sector employed the least number of people with a mere 24 and 96 respectively.

Figure 8.2.1: Institutional Sector of Employment by Region

8.3 Formal – Informal Employment

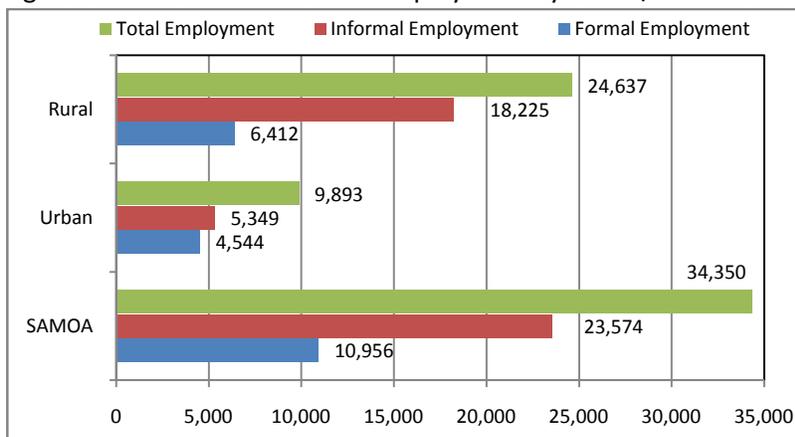

From a total employed population of 34,530, 28.7 percent (9,893 people) were reported to be from the urban area and 71.3 percent (24,637) from the rural area. Furthermore, 31.7 percent (10,956 people) of total employed population are in formal employment while the majority is in informal employment with 68.3 percent (23,574 people). (Table 8.3.1).

The majority of those employed in the urban area reported to be in informal employment as represented by 54.1 percent (5,349 people) while those engaged in formal employment represented the remaining 45.9 percent (4,544 people). Similarly with the urban area, the majority of the employed population in the rural area was found in informal employment as reported by 18,225 people (74.0 percent) while only 6,412 people (26.0 percent) were found to be employed in formal employment. (Figure 8.3.1).

Table 8.3.1: Percentage of Formal/ Informal Employment by Sector (Urban – Rural)

| Sector | SAMOA | | Formal Employment | | Informal Employment | |
|--------|--------|-------|-------------------|------|---------------------|------|
| | Total | % | Total | % | Total | % |
| Total | 34,530 | 100.0 | 10,956 | 31.7 | 23,574 | 68.3 |
| Urban | 9,893 | 28.7 | 4,544 | 45.9 | 5,349 | 54.1 |
| Rural | 24,637 | 71.3 | 6,412 | 26.0 | 18,225 | 74.0 |

Figure 8.3.1: Formal – Informal Employment by Urban/ Rural Sector

8.3.1 Formal – Informal Employment by Age Group

The age group of 30-34 years made up the majority of those people employed in informal employment with 20.1 percent followed by the age group of 40-44 years with 13.5 and 35-39 years with 13.1 percent. The lowest is found in the age group of 15-29 years with only 1.4 percent. Also, people in informal employment decreased steadily after the age group of 40-44 years and then increased slightly in the 65+ year age group.

In formal employment, 16.3 percent were in the age group of 30-34 followed by the age group of 35-39 years with 12.2 percent. The age group of 60-64 years revealed the fewest number of people employed in formal employment with only 847 (3.6 percent). After the age group of 30-34 years, those employed in formal employment declined steadily until the age group of 65+ years where it recorded a slight increase of 0.7 percent over the previous age group. (Table 8.3.1.1).

Table 8.3.1.1: Formal - Informal Employment by Age Group

| Age Group | SAMOA | | Formal Employment | | Informal Employment | |
|---------------|---------------|--------------|-------------------|-------------|---------------------|-------------|
| | | | | | | |
| TOTAL | 34,530 | 100.0 | 10,956 | 31.7 | 23,574 | 68.3 |
| 15 - 19 years | 1,674 | 4.8 | 150 | 1.4 | 1,525 | 6.5 |
| 20 - 24 years | 3,908 | 11.3 | 1,321 | 12.1 | 2,588 | 11.0 |
| 25 - 29 years | 3,579 | 10.4 | 1,374 | 12.5 | 2,206 | 9.4 |
| 30 - 34 years | 6,044 | 17.5 | 2,201 | 20.1 | 3,841 | 16.3 |
| 35 - 39 years | 4,324 | 12.5 | 1,438 | 13.1 | 2,885 | 12.2 |
| 40 - 44 years | 4,241 | 12.3 | 1,477 | 13.5 | 2,764 | 11.7 |
| 45 - 49 years | 3,486 | 10.1 | 1,106 | 10.1 | 2,379 | 10.1 |
| 50 - 54 years | 3,004 | 8.7 | 916 | 8.4 | 2,089 | 8.9 |
| 55 - 59 years | 1,855 | 5.4 | 407 | 3.7 | 1,448 | 6.1 |
| 60 - 64 years | 1,111 | 3.2 | 264 | 2.4 | 847 | 3.6 |
| 65+ yrs | 1,305 | 3.8 | 303 | 2.8 | 1,002 | 4.3 |

Furthermore, 15-19 year olds are most likely to be found in the informal sector with 91.0 percent of total employed 15-19 year olds compared to the Samoa average of 68.3 percent. The likelihood of informal employment is lowest for those aged 25 to 29 with 61.6 percent, but increases again sharply for those aged 55 and over, which is the standard retirement age. (Table 8.3.1.2)

Table 8.3.1.2: Distribution of Formal – Informal Employment by Sex

| Age Group | SAMOA | | Formal Employment | | Informal Employment | |
|---------------|---------------|--------------|-------------------|-------------|---------------------|-------------|
| | | | | | | |
| TOTAL | 34,530 | 100.0 | 10,956 | 31.7 | 23,574 | 68.3 |
| 15 - 19 years | 1,674 | 4.8 | 150 | 9.0 | 1,525 | 91.0 |
| 20 - 24 years | 3,908 | 11.3 | 1,321 | 33.8 | 2,588 | 66.2 |
| 25 - 29 years | 3,579 | 10.4 | 1,374 | 38.4 | 2,206 | 61.6 |
| 30 - 34 years | 6,044 | 17.5 | 2,201 | 36.4 | 3,841 | 63.6 |
| 35 - 39 years | 4,324 | 12.5 | 1,438 | 33.3 | 2,885 | 66.7 |
| 40 - 44 years | 4,241 | 12.3 | 1,477 | 34.8 | 2,764 | 65.2 |

| 65+ yrs | 1,305 | 3.8 | 303 | 23.2 | 1,002 | 76.8 |

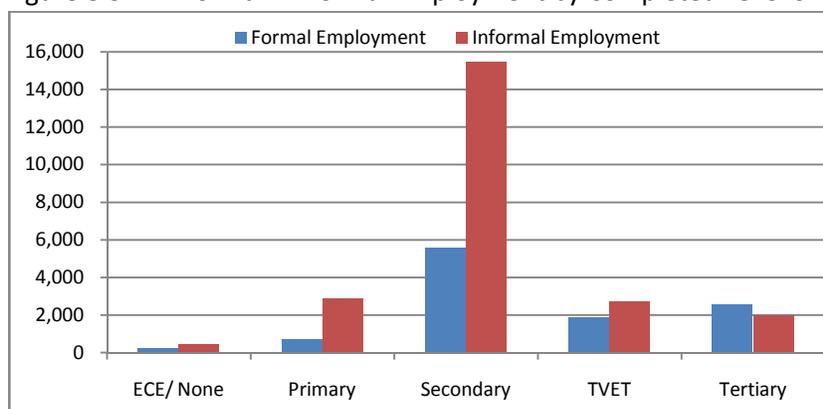

8.3.2 Formal – Informal Employment by Completed Level of Education

As portrayed in Table 8.3.2.1 and Figure 8.3.2.1, those who have completed secondary level of education had the highest number of people in both informal employment (5,568) and formal employment (15,493). Furthermore, those who have completed only ECE or have never completed any level of education reported the fewest number in both informal employment (228) and informal employment (462).

Table 8.3.2.1: Formal - Informal Employment by Completed Level of Education

| Completed Level of Education | SAMOA | | Formal Employment | | Informal Employment | |
|------------------------------|--------|-------|-------------------|------|---------------------|------|
| | | | | | | |
| Total | 34,530 | 100.0 | 10,956 | 31.7 | 23,574 | 68.3 |
| ECE/ None | 690 | 2.0 | 228 | 2.1 | 462 | 2.0 |
| Primary | 3,607 | 10.4 | 712 | 6.5 | 2,895 | 12.3 |
| Secondary | 21,061 | 61.0 | 5,568 | 50.8 | 15,493 | 65.7 |
| TVET | 4,612 | 13.4 | 1,872 | 17.1 | 2,740 | 11.6 |
| Tertiary | 4,559 | 13.2 | 2,576 | 23.5 | 1,984 | 8.4 |

Figure 8.3.2.1: Formal - Informal Employment by Completed Level of Education

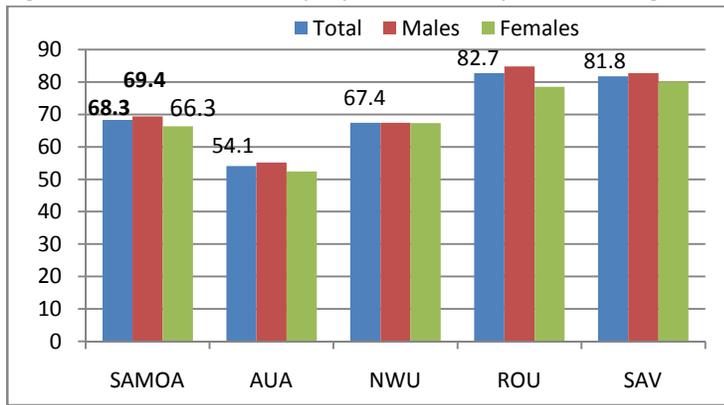

8.4 Informal Employment Rate

The informal employment rate in Samoa was reported to be 68.3 percent indicating that the majority of those employed engage in informal activities. By sex, males have a slightly higher rate of 69.4 percent than females with 66.3 percent. (Refer table 8.4.1). Amongst males, the highest informal employment rate was reported from ROU with 84.8 percent while the lowest was reported from AUA with 55.2 percent. For females, the highest was reported from SAV with 80.2 percent and the lowest being in AUA with 52.4 percent.

At the regional level, ROU reported the highest informal employment rate with 82.7 percent while the lowest was reported from AUA with only 54.1 percent. This gives an indication that informal employment is predominant in the rural areas when compared to the urban area.

Figure 8.3.1: Informal Employment Rate by Sex and Region

9 YOUTH EMPLOYMENT AND UNEMPLOYMENT

As stated in chapter two, the term youth in age definition for the purpose of his survey covers those aged 15 to 29 years.

9.1 Youth Employment

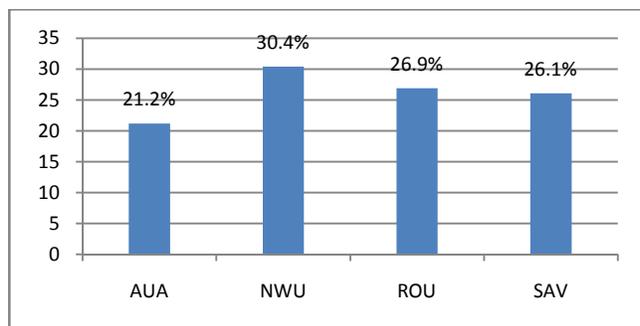

Table 9.1 below revealed that youth employment represents only 26.5 percent of total employment in Samoa. Males have a slightly higher rate than their female counterpart with 26.7 percent and 26.3 percent respectively implying that both sexes are entering the work force with equal opportunities.

NWU has the highest proportion of youth in employment with 30.4 percent implying that the majority of youth employment is from this region, followed by ROU with 26.9 percent, Savaii with 26.1 percent then AUA with the lowest being 21.2 percent. (Figure 9.1).

Table 9.1: Proportion of Youth Employment to Total Employment by Sex and Region

| Sex | SAMOA | | AUA | | NWU | | ROU | | SAV | |
|---------------|---------------|--------------|--------------|-------------|---------------|-------------|--------------|-------------|--------------|-------------|
| Total | 34,530 | 100.0 | 9,893 | 29.2 | 13,670 | 39.3 | 5,042 | 14.1 | 5,925 | 17.4 |
| Youths | 9,162 | 26.5 | 2,101 | 21.2 | 4,154 | 30.4 | 1,357 | 26.9 | 1,549 | 26.1 |
| Males | 5,809 | 26.7 | 1,396 | 23.1 | 2,499 | 29.4 | 919 | 27.3 | 994 | 25.6 |
| Female | 3,353 | 26.3 | 705 | 18.3 | 1,655 | 32.0 | 438 | 26.1 | 555 | 27.2 |

Figure 9.1: Proportion of Youth Employment by Region

9.1.1 Youth Employment by Age Group

It is evident from Table 9.1.1.1 below that the age group of 20-24 years had the highest proportion with 11.3 percent, as this is usually the age group where youths leave school and start to look for work. The age group of 25-29 years is next with a proportion of 10.4 percent and the smallest being 4.8 percent in the age group of 15-19 years and this is the lowest of all largely due to the fact that many young people are studying full time and are therefore neither working nor looking for a job.

Table 9.1.1.1: Proportion of Employed Youth in Total Employment by Age Group

| Age group | Samoa | AUA | NWU | ROU | SAVAII |
|---------------|-------------|-------------|-------------|-------------|-------------|
| Total | 26.5 | 21.2 | 30.4 | 26.9 | 26.1 |
| 15 - 19 years | 4.8 | 2.9 | 4.5 | 6.5 | 7.4 |
| 20 - 24 years | 11.3 | 9.0 | 13.8 | 10.0 | 10.4 |
| 25 - 29 years | 10.4 | 9.3 | 12.0 | 10.4 | 8.3 |

9.2 Youth Unemployment

Almost three quarters or 72.3 percent of total unemployed youths are from the rural area compared to only 27.7 percent from the urban area. This is an indication that there is limited job opportunities in the rural area compared to the urban area where there are numerous jobs available.

By region, unemployed youth is predominant in NWU and AUA with 41.3 percent and 27.6 percent respectively while SAV constituted 18.8 percent to total youth unemployment with ROU contributing only 12.3 percent. (Table 9.2.1).

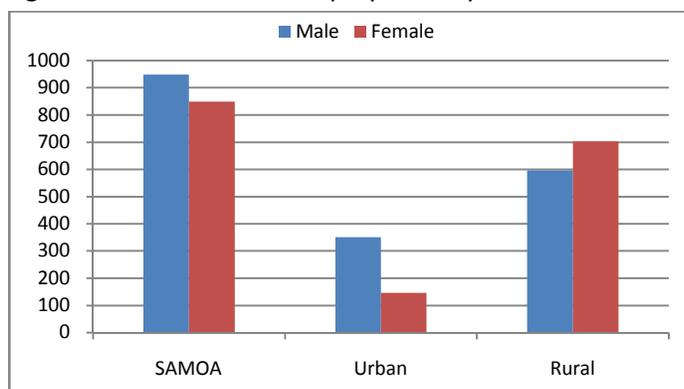

Table 9.2.1: Youth Unemployment by Region and Sector

| Region | Samoa | | Urban | | Rural | |
|--------------|--------------|--------------|------------|-------------|--------------|-------------|
| | Total | Percentage | Total | Percentage | Total | Percentage |
| Total | 1,797 | 100.0 | 497 | 27.7 | 1,300 | 72.3 |
| AUA | 497 | 27.6 | 497 | 100.0 | 0 | na |
| NWU | 741 | 41.3 | 0 | na | 741 | 57.0 |
| ROU | 221 | 12.3 | 0 | na | 221 | 17.0 |
| SAV | 338 | 18.8 | 0 | na | 338 | 26.0 |

9.2.1 Youth Unemployment by Sex

There were more unemployed male youths than females as reported by 948 male youths (52.7 percent) and 849 (47.3 percent) respectively. In the urban area, unemployed male youths totaling 351 (70.6 percent) is almost two and half times more than females totaling only 146 (29.4 percent). The rural area on the other hand showed that 597 males represented 45.9 of total youth unemployment in the rural area while 703 females made up the remaining 54.1 percent. (Figure 9.2.1.1).

Figure 9.2.1.1: Youth Unemployment by Sex and Sector

9.2.2 Youth Unemployment by Completed Level of Education

The table below revealed those youths who have completed secondary level of education had the highest share of total youth unemployment with 81.0 percent. This gives an indication that majority of unemployed youth who have completed secondary level are actively trying to get into the work force, and the same can be said for both sexes. Youths who have completed only ECE or who have never completed any level of education had the lowest share with only a mere 0.7 percent implying that they are not actively looking for work as they do not have the required set of skills or qualifications to be employed. (Table 9.2.2.1).

One may note that with the exception of secondary level, figures for other levels are small and conclusion based on these data should be taken with caution.

Table 9.2.2.1: Youth Unemployment Rate by Completed Level of Education

| Completed Level of Education | Samoa | | Male | | Female | |
|------------------------------|--------------|--------------|------------|-------------|--------------|-------------|
| | | | | | | |
| Total | 1,797 | 100.0 | 497 | 27.7 | 1,300 | 12.3 |
| ECE/ None | 13 | 0.7 | 13 | 2.6 | 0 | 0.0 |
| Primary | 83 | 4.6 | 28 | 5.6 | 55 | 4.2 |
| Secondary | 1,456 | 81.0 | 389 | 78.2 | 1,066 | 82.0 |
| Vocational | 170 | 9.5 | 49 | 9.8 | 121 | 9.3 |
| Tertiary | 76 | 4.2 | 19 | 3.8 | 57 | 4.4 |

9.3 Unemployed Youths in Total Unemployment

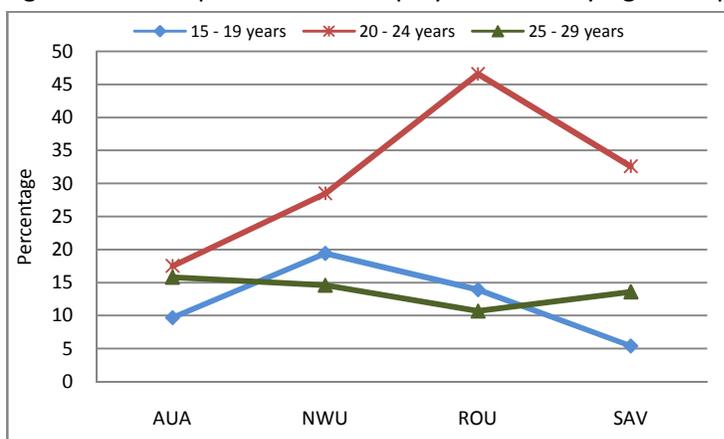

As depicted in Table 9.3.1 below, unemployed youths make up more than half of total unemployment as represented by 54.4 percent and those youths in the age group of 20-24 years represent half of this. By region, the highest proportion of unemployed youths in total unemployment was reported from ROU with 71.2 percent while AUA had the lowest proportion with 43.0 percent. This implies that those in the rural area as represented by NWU, ROU and SAV are finding it hard to find jobs as the majority of jobs are in AUA. (Table 9.3.1).

Table 9.3.1: Proportion of Unemployed Youths in Total Unemployment by Age Group and Region

| Age Group | SAMOA | AUA | NWU | ROU | SAV |
|---------------|-------------|-------------|-------------|-------------|-------------|
| Total | 54.4 | 43.0 | 62.6 | 71.2 | 51.6 |
| 15 - 19 years | 12.7 | 9.7 | 19.4 | 13.9 | 5.4 |
| 20 - 24 years | 27.2 | 17.5 | 28.5 | 46.6 | 32.6 |
| 25 - 29 years | 14.5 | 15.8 | 14.6 | 10.7 | 13.6 |

Figure 9.3.1 gives a graphical impression of proportion of unemployed youths in total unemployment at the regional level clearly depicting that those unemployed youths from all the regions in the age group of 20-24 years had the highest share of total unemployment.

Figure 9.3.1: Proportion of Unemployed Youths by Age Group and Region

9.4 Youth Unemployment Rate

The youth unemployment for Samoa as revealed by the survey stood at 16.4, which is almost twice as high as the national unemployment rate of 8.7 percent, reflecting the difficulties faced by youths in finding jobs. Females had a higher unemployment rate than males as represented by 20.2 percent and 14.0 percent respectively.

9.4.1 Youth Unemployment Rate by Age Group and Sex

Youths in the age group of 15-19 years had the highest unemployment rate with 20.1 percent while those in the age group of 25-29 years had the lowest rate with 11.8 percent. In addition to this, female unemployment rate of 20.2 is much higher than the male rate of 14.0 percent.

Youths from the urban area seemed to be more unemployed compared to those youths in the rural area as represented by unemployment rates of 19.1 percent and 15.5 percent respectively.

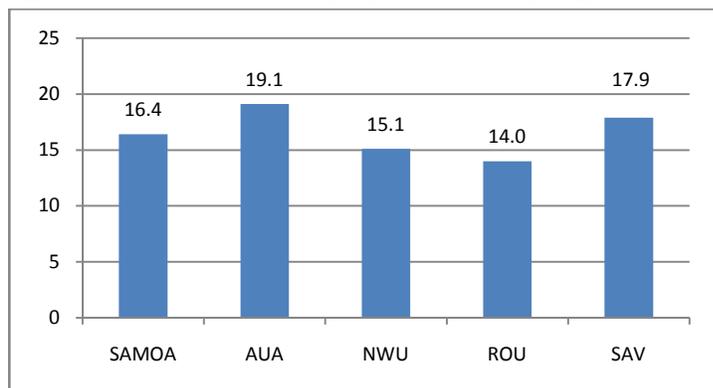

Table 9.4.1.1: Youth Unemployment Rate by Age group and Sector

| Age Group | SAMOA | | | Urban | | | Rural | | |
|---------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|
| | Total | M | F | Total | M | F | Total | M | F |
| Total | 16.4 | 14.0 | 20.2 | 19.1 | 20.1 | 17.2 | 15.5 | 11.9 | 21.0 |
| 15 - 19 years | 20.1 | 16.1 | 30.5 | 28.1 | 25.8 | 38.9 | 18.2 | 13.5 | 29.5 |
| 20 - 24 years | 18.7 | 15.3 | 2.8 | 18.4 | 17.0 | 20.5 | 18.8 | 14.7 | 24.8 |
| 25 - 29 years | 11.8 | 11.2 | 12.7 | 16.6 | 20.3 | 8.4 | 10.0 | 6.7 | 13.7 |

9.4.2 Youth Unemployment Rate by Region

As revealed by Figure 9.4.2.1 below, AUA had the highest youth unemployment rate with 19.1 percent followed by SAV with 17.9 percent, both of which are above the national rate of 16.4 percent. On the other hand, NWU had a youth unemployment rate of 15.1 percent while ROU had the lowest unemployment with 14.0, both of which are below the national youth unemployment rate.

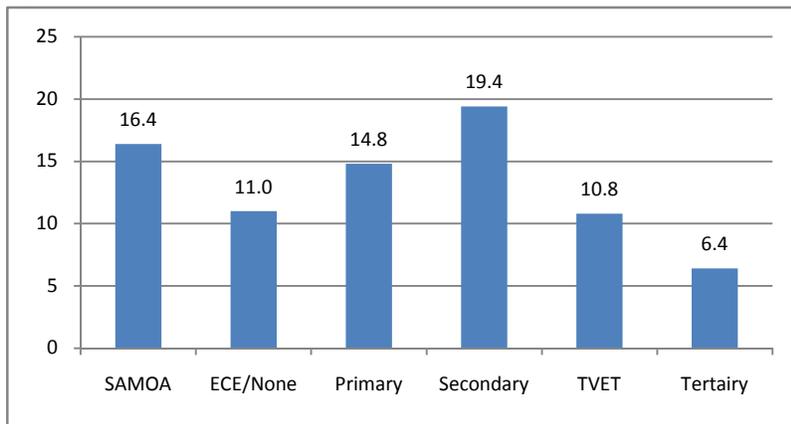

Figure 9.4.2.1: Youth Unemployment Rate by Region

9.4.3 Youth Unemployment Rate by Completed Level of Education

Youths who have completed secondary level of education had the highest unemployment rate with 19.4 percent and is the only completed level of education which is above the national youth unemployment rate of 16.4 percent. Youths with higher qualifications namely TVET and tertiary had the lowest rate implying that youths with higher qualifications seemed to find employment easily compared to those without any qualifications.

Figure 9.4.3.1: Youth Unemployment Rate by Completed Level of Education

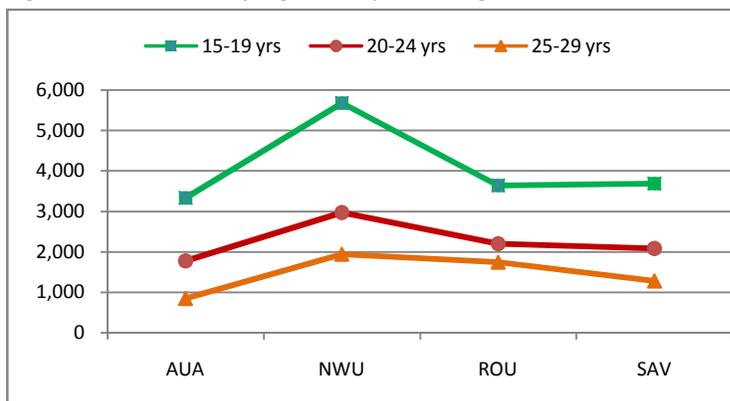

9.5 Youth Not in Employment, Education or Training (NEET)

A total of 31,203 youths were classified to be NEET implying that most of the youths under this classification are engaged in subsistence production. The majority of which are females representing 52.3 percent and the remaining 47.6 percent is represented by males.

By Region, youths from NWU had the highest number of NEET with 10,594 followed by ROU with 7,591, SAV with 7,055 then by AUA with 5,962. (Figure 9.5.1).

Figure 9.5.1: NETT by Age Group and Region

9.5.1 NEET by Age Group

Youths in the age group of 15-19 years make up the majority of NEET, with 52.3 percent followed by 20-24 years age group with 29.0 percent then by 25-29 years age group with 18.6. It's evident from this that NEET decrease as the age group progresses. Moreover, both sexes revealed that the age group of 15-19 years had the highest contribution to NETT, with 54.0 percent reported by males and 50.9 percent reported by females. (Table 9.5.1.1).

Table 9.5.1.1: NEET by Age Group and Sex

| Youth Age Group | SAMOA | | Male | | Female | |
|-----------------|---------------|--------------|---------------|-------------|---------------|-------------|
| | Total | % | Total | % | Total | % |
| Total | 31,203 | 100.0 | 14,866 | 47.6 | 16,336 | 52.3 |
| 15 - 19 years | 16,337 | 52.3 | 8,022 | 54.0 | 8,315 | 50.9 |
| 20 - 24 years | 9,040 | 29.0 | 4,279 | 28.8 | 4,761 | 29.1 |
| 25 - 29 years | 5,826 | 18.7 | 2,566 | 17.2 | 3,260 | 20.0 |

9.5.2 NETT by Completed Level of Education

As tabulated in Table 9.5.2.1 below, 83.7 percent of those who have completed secondary level of education are classified as NEET which is then followed by primary with a distant 7.3 percent. The lowest number of youths in NEET was tabulated from those who have completed only ECE or never completed an education level with only 431 or 1.4 percent.

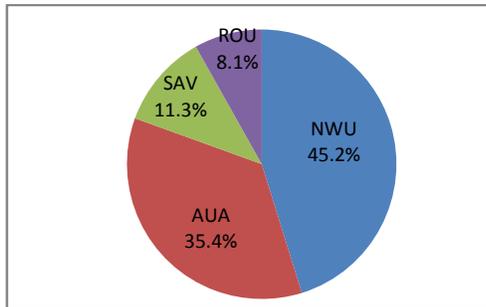

Table 9.5.2.1: NETT by Completed Level of Education by Region

| Completed Level of Education | SAMOA | AUA | NWU | ROU | SAV |
|-------------------------------------|---------------|--------------|---------------|--------------|--------------|
| Total | 31,203 | 5,962 | 10,594 | 7,591 | 7,055 |
| ECE/ None | 431 | 141 | 114 | 126 | 51 |
| Primary | 2,291 | 327 | 877 | 589 | 497 |
| Secondary | 26,124 | 5,111 | 8,908 | 6,159 | 5,946 |
| TVET | 1,416 | 311 | 441 | 322 | 342 |
| Tertiary | 941 | 71 | 255 | 395 | 219 |

10 EARNINGS FROM EMPLOYMENT

From total employment of 34,530 persons, only 22,132 people reported receiving income and the majority of these people are from NWU with 10,000 followed by AUA with 7,831 and SAV with 2,499 then by ROU with 1,803. (Figure 10.1).

Figure 10.1: Earnings from Employment by Region

10.1 Employment by Frequency of Payment

As evidently portrayed in Table 10.1.1 below, the majority of those employed received income last week as represented by 52.7 percent and this is believed to be those working in the private sector. This is followed by last fortnight with 41.3 percent implying that these are the people employed in the public sector. Table 10.1.1 gives a tabulated impression of the frequency of payment received by those employed people that received income.

By sex, males represent almost two thirds (63.6 percent) of those that received income while females represent the remaining 36.4 percent. Furthermore, males reported last week as the most frequent type of payment with 56.3 percent while females reported last fortnight as the most frequent type of payment with 48.5 percent. (Table 10.1.1).

Table 10.1.1: Employed Population by frequency of Payment and Region

| Frequency of payment | Samoa | % | Male | % | Female | % |
|----------------------|---------------|--------------|---------------|-------------|--------------|-------------|
| Total | 22,132 | 100.0 | 14,078 | 63.6 | 8,054 | 36.4 |
| Last month | 860 | 3.9 | 535 | 3.8 | 326 | 4.1 |
| Last f/night | 9,136 | 41.3 | 5,229 | 37.1 | 3,907 | 48.5 |
| Last week | 11,661 | 52.7 | 7,930 | 56.3 | 3,731 | 46.3 |
| Last day | 295 | 1.3 | 261 | 1.9 | 34 | 0.4 |
| Others | 48 | 0.2 | 36 | 0.3 | 12 | 0.1 |
| Not Stated | 131 | 0.6 | 87 | 0.6 | 45 | 0.6 |

10.2 Employment by Frequency of Payment and Occupation

Most of the employed people that received income are professionals as represented by 19.1 percent which is then closely followed by service and sales workers and craft and related trade workers with 17.5 percent and 16.2 percent respectively, as tabulated in Table 10.2.1 below. On the contrary, armed forces occupation had the lowest as reported by approximately 10 people.

Table 10.2.1: Frequency of Payment by Occupation and Sex

| Occupation | TOTAL | Last Month | Last F/night | Last Week | Last Day | Others | Not Stated |
|--|---------------|------------|--------------|---------------|------------|-----------|------------|
| Total | 22,132 | 860 | 9,136 | 11,661 | 295 | 48 | 131 |
| Managers | 1,444 | 84 | 958 | 402 | 0 | 0 | 0 |
| Professionals | 4,226 | 266 | 2,798 | 1,120 | 28 | 0 | 14 |
| Technicians and associates professionals | 1,806 | 73 | 960 | 734 | 13 | 0 | 27 |
| Clerical support workers | 2,173 | 115 | 932 | 1,059 | 38 | 0 | 30 |
| Service and sales workers | 3,874 | 93 | 1,170 | 2,570 | 0 | 12 | 30 |
| Skilled agri. forestry & fishery workers | 666 | 0 | 187 | 444 | 23 | 13 | 0 |
| Craft and related trade workers | 3,576 | 113 | 931 | 2,479 | 53 | 0 | 0 |
| Plant & machinery operators & assemblers | 2,433 | 71 | 510 | 1,756 | 43 | 24 | 30 |
| Elementary occupations | 1,919 | 45 | 678 | 1,098 | 98 | 0 | 0 |
| Armed forces occupations | 12 | 0 | 12 | 0 | 0 | 0 | 0 |

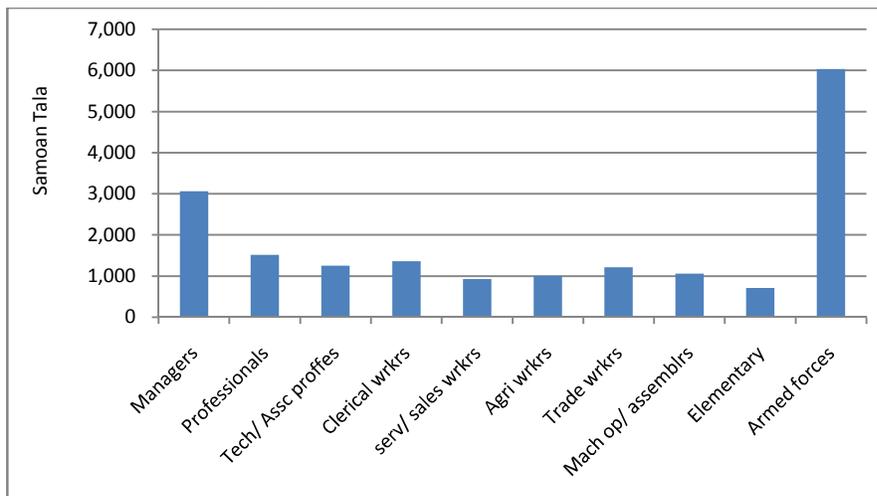

10.3 Average Monthly Income from Employment

The national average monthly income from 22,132 employed people reported by the survey was estimated to be SAT\$1,295.9 (equivalent of US\$546.10). The survey also revealed that males have a higher national monthly average of SAT\$1,336.1 compared to females with SAT\$1,173.2.

10.3.1 Average Monthly Income from Employment by Occupation

Overall, armed forces occupation reported the highest average with SAT\$6,030.3 as reported by males only then followed by managers with SAT\$3,063.2. Elementary occupations reported the lowest average with only SAT\$708.7 per month. Figure 10.3.1.1 portrays the average monthly income for all the occupations as reported by the survey.

Figure 10.3.1.1: Average Monthly Income from Employment by Occupation

10.3.2 Average Monthly Income from Employment by Region

At the regional level, AUA has the highest average monthly income for people that received income with SAT\$1,399.8 with NWU not far off with SAT\$1,374.5 and both regions are above the national average monthly income of SAT\$1,295.9. This is mainly due to the fact that there are more employment opportunities in the urban area where AUA and NWU have easy access to compare to the other two regions.

Apart from armed forces, those employed as managers from AUA, NWU and ROU have the highest average monthly income. SAV on the other hand has technicians and associate professionals as receiving the highest average income. By contrast, those who worked in elementary occupations from NWU, ROU and SAV received the lowest average income on a monthly basis within these regions while those service and sales workers from AUA has the lowest average monthly income.

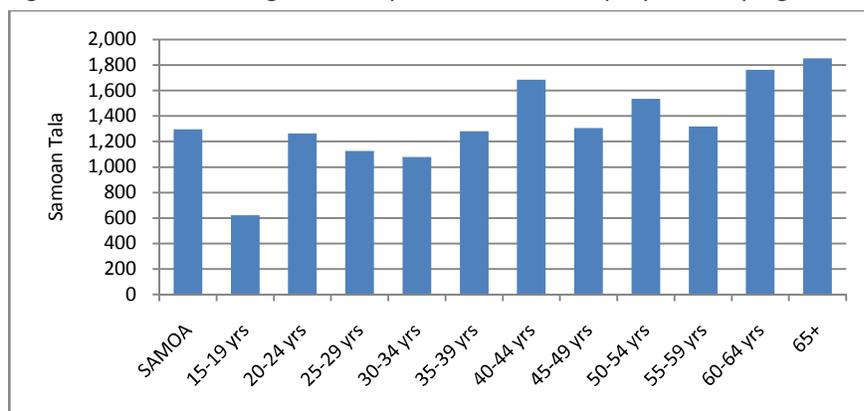

Table 10.3.2.1: Average Monthly Income from Employment by Region (In Samoan Tala).

| Occupation | SAMOA | AUA | NWU | ROU | SAV |
|--|----------------|----------------|----------------|----------------|--------------|
| SAMOA | 1,295.9 | 1,399.8 | 1,374.5 | 1,033.8 | 844.4 |
| Managers | 3,063.2 | 3,388.7 | 3,582.8 | 2,272.6 | 1,069.4 |
| Professionals | 1,518.3 | 1,769.9 | 1,650.4 | 1,212.7 | 891.0 |
| Technicians & associate professionals | 1,256.1 | 1,154.6 | 1,388.9 | 923.0 | 1,340.9 |
| Clerical support workers | 1,364.7 | 1,398.3 | 1,527.1 | 660.4 | 641.1 |
| Service & sales workers | 924.5 | 753.5 | 1,102.6 | 720.4 | 705.1 |
| Skilled agriculture forestry & fishery workers | 1,004.8 | 1,326.3 | 752.4 | 2,195.5 | 669.3 |
| Craft & related trade workers | 1,216.6 | 989.9 | 1,438.6 | 946.0 | 1,009.1 |
| Plant & machinery operators & assemblers | 1,057.9 | 972.9 | 1,158.8 | 928.7 | 726.4 |
| Elementary occupations | 708.7 | 916.6 | 663.9 | 539.7 | 393.2 |
| Armed forces occupations | 6,030.3 | 0.0 | 6,030.3 | 0.0 | 0.0 |

10.3.3 Average Monthly Income from Employment by Age Group

As shown in the graph below, those people in the age group of 65 years and above had the highest average monthly income with SAT\$1,852.2. The age group of 60 - 64 years is next with SAT\$1,763.3 then by 40 - 44 years age group with SAT\$1,685.0. As predicted, the age group of 15 - 19 years revealed the lowest average monthly income with only SAT\$621.0 as they do not have the experience and the necessary skills to be employed in high paid jobs.

Figure 10.3.3.1: Average Monthly Income from Employment by Age Group

11 WORKING HOURS

The survey revealed that an employed person works on average 39.3 hours per week in their paid job, which is just below the normal weekly working hours of forty. At the national level, employed males tend to work for longer hours in their paid job compared with their female counterpart with 40.7 hours and 36.9 hours respectively. In addition to this, employed males from all the four regions worked longer hours in their paid job compared with females. At the regional level, employed people from AUA has the highest average working hours per week with 42.9 hours compared with ROU who had the lowest with 33.1 hours. Notably, AUA and NWU have averages above the national average implying that employed people from these regions tend to work long hours in their paid job as opposed to the other two regions who have their averages below the national average. (Table 11.1).

Table 11.1: Average Working Hours per Week by Sex and Region

| Sex | SAMOA | AUA | NWU | ROU | SAV |
|--------------|-------------|-------------|-------------|-------------|-------------|
| TOTAL | 39.3 | 42.9 | 40.5 | 33.1 | 35.7 |
| Male | 40.7 | 44.1 | 41.9 | 35.0 | 37.9 |
| Female | 36.9 | 41.1 | 38.3 | 29.4 | 31.6 |

11.1 Average Working Hours by Age Group

At the national level, the age groups of 30 - 34 years and 35 - 39 years had the highest averages with 41.6 hours while the lowest average was revealed by those in the age group of 15 - 19 years. The lowest average working hours per week was reported from SAV with only 26.2 hours in the age group of 15 - 19 years. By contrast, the highest average was reported from AUA in the age group of 40 - 44 years. Its noteworthy to observe that all the age groups in ROU have their average working hours below the national averages. This must be due to the fact that most of them are temporary employees. (Table 11.1.1).

Table 11.1.1: Average Working Hours by Age Group

| Age Group | SAMOA | AUA | NWU | ROU | SAV |
|---------------|-------------|-------------|-------------|-------------|-------------|
| Total | 39.3 | 42.9 | 40.5 | 33.1 | 35.7 |
| 15 - 19 years | 30.0 | 35.1 | 30.8 | 29.0 | 26.2 |
| 20 - 24 years | 39.1 | 39.9 | 41.9 | 30.8 | 36.3 |
| 25 - 29 years | 40.3 | 43.0 | 42.8 | 33.0 | 35.1 |
| 30 - 34 years | 41.6 | 44.1 | 42.5 | 37.3 | 37.4 |
| 35 - 39 years | 41.6 | 42.7 | 43.8 | 36.9 | 37.9 |
| 40 - 44 years | 40.7 | 45.9 | 40.3 | 35.0 | 37.7 |
| 45 - 49 years | 40.4 | 47.3 | 39.7 | 35.1 | 36.5 |
| 50 - 54 years | 38.3 | 43.0 | 39.6 | 27.7 | 37.7 |
| 55 - 59 years | 35.8 | 43.1 | 34.2 | 29.4 | 30.8 |
| 60 - 64 years | 36.7 | 38.7 | 39.3 | 32.7 | 34.6 |
| 65+ years | 32.8 | 33.1 | 32.9 | 31.9 | 33.1 |

11.2 Average Working Hours by Completed Level of Education

Its evident from Table 11.2.1 below those with higher qualifications seems to work longer in their paid jobs as shown by those who have completed TVET and tertiary level with averages of 42.9 hours. Those who have completed primary level had the lowest average working hours with 35.8 hours per week. In AUA, only those who have completed only ECE or never completed any level of education have their average working hours below the standard working hours of forty per week.

On the other extreme, ROU revealed that those who have completed tertiary level and those who have completed only ECE or never completed any level of education in SAV have their averages above the standard working hours of forty per week.

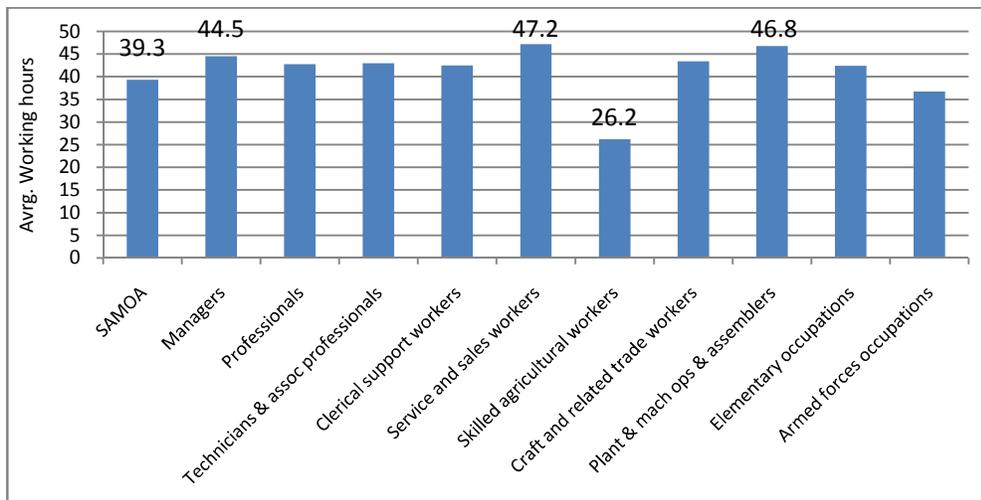

Table 11.2.1: Average Working Hours by Completed Level of Education

| Completed Level of Education | SAMOA | AUA | NWU | ROU | SAV |
|------------------------------|-------------|-------------|-------------|-------------|-------------|
| Total | 39.3 | 42.9 | 40.5 | 33.1 | 35.7 |
| ECE/ None | 36.5 | 38.3 | 36.2 | 30.1 | 43.5 |
| Primary | 35.8 | 41.8 | 36.6 | 28.9 | 32.9 |
| Secondary | 38.4 | 41.9 | 40.1 | 32.9 | 35.0 |
| TVET | 42.9 | 46.1 | 43.7 | 35.3 | 39.3 |
| Tertiary | 42.9 | 44.6 | 42.6 | 40.9 | 38.0 |

11.3 Average Working Hours by Occupation

As can be seen from Figure 11.3.1, those who are employed as service and sales workers had the highest average working hours per week with 47.2 hours. This is followed by those employed as plant and machinery operators and assemblers with 46.8 hours and managers with 44.5 hours. Those people employed as skilled agriculture forestry and fishery workers had the lowest average with only 26.2 hours which is way below the standard weekly working hours of forty. Figure 11.3.1 portrays a graphical impression of hours worked per week in paid job by occupation.

Figure 11.3.1: Average Working Hours by Occupation

12 OCCUPATIONAL SAFETY

The 2012 Labour Force Survey revealed that the total number of reported cases of occupational injuries and illness in the last twelve months was 180. The majority of these cases were reported from the rural area representing 59.4 percent while the urban area represents the remaining 40.6 percent of the total. This is an indication that non compliance rate towards occupational, safety and health measures is vested at the rural areas.

Furthermore, males are more susceptible to injuries than their female counterpart as reported by 158 and 22 cases respectively. The predominant type of injury received by employed people was superficial as reported by 75 cases followed by other injuries with 53 cases, 37 burn corrosion scald frostbite with 37 then by amputation with 15 reported cases. (Figure 12.1).

Table 12.1: Type of Injury Received by Sector and Sex

| Type of Injury Received | Samoa | | | Urban | | | Rural | | |
|--------------------------------|------------|------------|-----------|-----------|-----------|----------|------------|-----------|-----------|
| | Total | M | F | Total | M | F | Total | M | F |
| Total | 180 | 158 | 22 | 73 | 73 | 0 | 107 | 85 | 22 |
| Superficial injury | 75 | 75 | 0 | 28 | 28 | 0 | 47 | 47 | 0 |
| Fracture | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| Dislocation sprain strain | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| Amputation | 15 | 15 | 0 | 15 | 15 | 0 | 0 | 0 | 0 |
| Concussion internal injury | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| Burn corrosion scald frostbite | 37 | 15 | 22 | 15 | 15 | 0 | 22 | 0 | 22 |
| Acute poisoning or infection | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| Other injury | 53 | 53 | 0 | 15 | 15 | 0 | 38 | 38 | 0 |

12.1 Occupational Injury by Sector of Industry

As tabulated below, all reported cases of occupational injuries were reported from the industry and construction sector in the urban area and these cases were reported by males only.

Table 12.1.1: Occupational Injury by Industrial Sector and Sex

| Industrial Sector | Samoa | | | Urban | | | Rural | | |
|-------------------------|-----------|-----------|----------|-----------|-----------|----------|----------|----------|----------|
| | Total | M | F | Total | M | F | Total | M | F |
| Total | 13 | 13 | 0 | 13 | 13 | 0 | 0 | 0 | 0 |
| Agriculture | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| Industry & Construction | 13 | 13 | 0 | 13 | 13 | 0 | 0 | 0 | 0 |
| Services | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |

12.2 Occupational Injury by Age Group

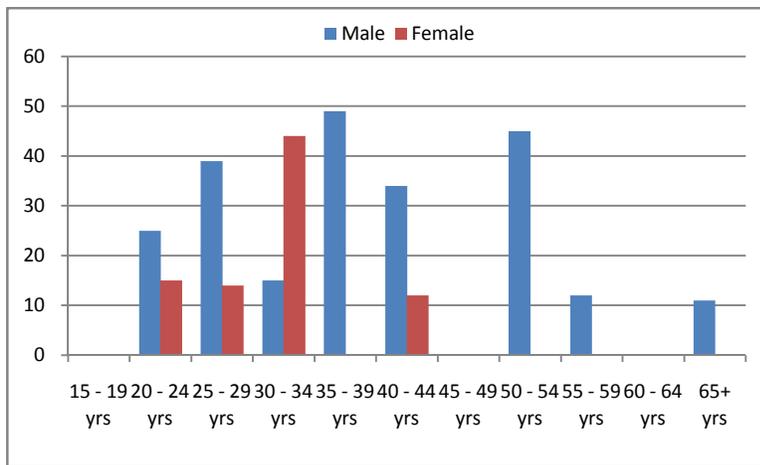

Table 12.2 reveals that the majority of people being affected in terms of injuries and illnesses are from the age group of 30-34 years with 59 reported cases followed, 25-29 years age group with 53 cases then by 35-39 years age group with 49 cases. (Table 12.2.1).

Table 12.2.1: Occupational Injury by Age Group

| Age Group | Samoa | | | Urban | | | Rural | | |
|---------------|-------|-----|----|-------|----|----|-------|-----|----|
| | Total | M | F | Total | M | F | Total | M | F |
| Total | 315 | 231 | 84 | 122 | 88 | 34 | 193 | 143 | 50 |
| 15 - 19 years | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| 20 - 24 years | 40 | 25 | 15 | 15 | 0 | 15 | 25 | 25 | 0 |
| 25 - 29 years | 53 | 39 | 14 | 15 | 15 | 0 | 38 | 24 | 14 |
| 30 - 34 years | 59 | 15 | 44 | 34 | 15 | 19 | 25 | 0 | 25 |
| 35 - 39 years | 49 | 49 | 0 | 15 | 15 | 0 | 34 | 34 | 0 |
| 40 - 44 years | 46 | 34 | 12 | 13 | 13 | 0 | 33 | 22 | 12 |
| 45 - 49 years | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| 50 - 54 years | 45 | 45 | 0 | 30 | 30 | 0 | 14 | 14 | 0 |
| 55 - 59 years | 12 | 12 | 0 | 0 | 0 | 0 | 12 | 12 | 0 |
| 60 - 64 years | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| 65+ years | 11 | 11 | 0 | 0 | 0 | 0 | 11 | 11 | 0 |

Figure 12.2.1 portrays that females in the age group of 30 - 34 years is the only age group where there are more reported cases of female injuries than males. All the other age groups with reported cases of injuries revealed that there were more male injuries than females.

Table 12.3.1: Occupational Injury by Age and Sex

12.3 Occupational Injury by Type of Hazard at Work

As portrayed in Figure 12.3.1 below, the two main common types of hazards reported by people were dust fumes with 52 cases and loud noise off and vibration with 47 reported cases. Furthermore, the urban area depicts that all the reported case were by males. (Table 12.3.1).

Figure 12.3.1: Occupational Injury by Type of Hazard

13 EQUAL OPPORTUNITIES

The government of Samoa under its many programs for economic development has already incorporated Strategies for the Development of Samoa (SDS 2012-2016)) and one of its main focus is the creation of employment with equal opportunities for all.

13.1 Occupational Segregation

As portrayed in Table 13.1, more than a quarter of those employed are skilled agriculture, forestry and fishery workers as represented by 27.5 percent. The second most common type of occupation revealed by the survey is craft and related trades workers with 13.7 percent which is closely trailed by service and sales workers with 13.5 percent. (Figure 13.1).

Figure 13.1: Proportion of Employed Persons by Occupation

Males made up most of the work force with 63.1 percent while females made up the remaining 36.9 percent. Moreover, the survey revealed that the predominant type of occupation that both sexes engaged in is skilled agriculture, forestry and fishery workers. (Table 13.1).

Table 13.1: Proportion of Occupational Segregation by Sex

| Occupation | SAMOA | | | | | |
|--|---------------|--------------|---------------|--------------|---------------|--------------|
| | Total | | Male | | Female | |
| Total | 34,530 | 100.0 | 21,787 | 100.0 | 12,743 | 100.0 |
| Managers | 2,433 | 7.0 | 1,283 | 5.9 | 1,150 | 9.0 |
| Professionals | 4,323 | 12.5 | 1,955 | 9.0 | 2,369 | 18.6 |
| Technicians and associates professionals | 1,915 | 5.5 | 1,215 | 5.6 | 700 | 5.5 |
| Clerical support workers | 2,211 | 6.4 | 940 | 4.3 | 1,270 | 10.0 |
| Service and sales workers | 4,651 | 13.5 | 2,458 | 11.3 | 2,193 | 17.2 |
| Skilled agriculture forestry and fishery workers | 9,501 | 27.5 | 6,215 | 28.5 | 3,286 | 25.8 |
| Craft and related trade workers | 4,729 | 13.7 | 4,037 | 18.5 | 692 | 5.4 |
| Plant and machinery operators and assemblers | 2,621 | 7.6 | 2,234 | 10.3 | 387 | 3.0 |
| Elementary occupations | 2,135 | 6.2 | 1,438 | 6.6 | 697 | 5.5 |
| Armed forces occupations | 12 | 0.0 | 12 | 0.1 | 0 | 0.0 |

At the regional level, the majority of those employed from AUA are professionals as indicated by 16.2 percent. Employed people from the three remaining regions revealed that the main occupation they are employed in is skilled agriculture, forestry and fishery as represented by 17.4 percent from NWU, 61.2 percent from ROU and 54.3 percent from SAV. (Table 13.2).

Table 13.2: Proportion of Occupational Segregation by Region

| Occupation | SAMOA | AUA | NWU | ROU | SAV |
|--|---------------|--------------|---------------|--------------|--------------|
| Total | 34,530 | 9,893 | 13,670 | 5,042 | 5,925 |
| Managers | 7.0 | 12.1 | 6.1 | 3.3 | 4.1 |
| Professionals | 12.5 | 16.2 | 11.4 | 8.3 | 12.7 |
| Technicians and associates professionals | 5.5 | 9.1 | 5.8 | 1.7 | 2.4 |
| Clerical support workers | 6.4 | 9.9 | 7.1 | 2.1 | 2.8 |
| Service and sales workers | 13.5 | 14.8 | 16.9 | 6.7 | 8.9 |
| Skilled agriculture forestry and fishery workers | 27.5 | 8.2 | 17.4 | 61.2 | 54.3 |
| Craft and related trade workers | 13.7 | 15.0 | 17.4 | 7.8 | 8.0 |

| Armed forces occupations | 0.0 | 0.0 | 0.1 | 0.0 | 0.0 |

13.2 Female Share of Employment

Table 13.2.1 shows that more females are employed in the service sector by main industry within the 3 main groups as revealed by 42.5 percent with the majority from AUA with 48.2 percent. In addition to this, the survey revealed that there were no females reported in the agriculture industrial sector. By region, those females from ROU had the highest share of employment with 47.4 percent. (Table 13.2.1).

Table 13.2.1: Female share of Employment by main industry and Region

| Industrial Sector | SAMOA | AUA | NWU | ROU | SAV |
|---------------------------|-------------|-------------|-------------|-------------|-------------|
| Total | 41.3 | 47.2 | 34.5 | 47.4 | 34.7 |
| Agriculture | 0.0 | 0.0 | 0.0 | 0.0 | 0.0 |
| Industry and Construction | 25.0 | 24.1 | 0.0 | 100.0 | 0.0 |
| Services | 42.5 | 48.2 | 37.2 | 31.0 | 34.7 |

In addition to the above, the survey revealed that the share of female in wage employment in the non agricultural sector, a MDG indicator number 3.2, stood at 37.5 percent. At the regional level, ROU depicts the highest share of females with 41.1 percent while NWU had the lowest with 35.4 percent which is below the national share of 37.5 percent.

Table 13.2.2: Proportion and Share of Female in Wage Employment in the Non Agricultural Sector

| Non Agriculture Sector | SAMOA | | AUA | | NWU | | ROU | | SAV | |
|------------------------|---------------|--------------|--------------|--------------|--------------|--------------|--------------|--------------|--------------|--------------|
| Total | 21,023 | 100.0 | 7,643 | 100.0 | 9,473 | 100.0 | 1,563 | 100.0 | 2,344 | 100.0 |
| Male | 13,138 | 62.5 | 4,673 | 61.1 | 6,115 | 64.6 | 920 | 58.9 | 1,430 | 61.0 |
| Female | 7,884 | 37.5 | 2,969 | 38.8 | 3,358 | 35.4 | 643 | 41.1 | 914 | 39.0 |

14 SOCIAL DIALOGUE

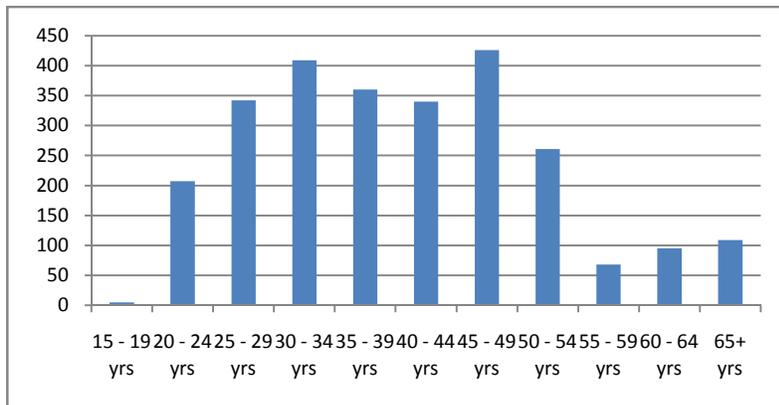

From a total of 34,530 employed people reported by the survey, only 2,622 people reported to belong to a trade union. The majority of these members are from NWU with 1,169 (44.6 percent) followed by AUA and SAV with 658 (25.1 percent) and 527 (20.1 percent) members respectively while ROU reported the least number of members with only 268 (10.2 percent). (Table 14.1.1).

Table 14.1.1: Trade Union Members by Region

| Region | Total | % |
|--------------|--------------|--------------|
| SAMOA | 2,622 | 100.0 |
| AUA | 658 | 25.1 |
| NWU | 1,169 | 44.6 |
| ROU | 268 | 10.2 |
| SAV | 527 | 20.1 |

By age group, most trade union members were found to be in the age group of 45-49 years with 426 reported cases which is closely followed by the age group of 30-34 years with 409 reported cases. Figure 14.1.1 portrays a graphical impression of trade union members by age group as reported by the survey.

Figure 14.1.1: Trade Union Members by Age Group
