Final edits were made by Tokelau in March 2019 during a workshop at Pacific Community (SPC) in Noumea, New Caledonia.

Overview

ABSTRACT
The 2001 census enumerated both de-facto and de-jure populations. It was intended that all information would be collected during an enumeration period of one week, the week from 11th October 2001. Census night for individual households was the night of 11 October 2001. Given the transport difficulties between Apia and Tokelau, and within Tokelau, and in order to restrict the enumeration period to less than one week, 9 interviewers were involved.

It is also obvious that in the conduct of a statistical operation as large and complex as a national census (even for Tokelau), it is inevitable that errors will occur due to questions being misunderstood, replies being incorrect or misinterpreted, etc. In fact, errors could have been introduced at all stages of the census, from planning, field operation stage, non-responses, non-call back to check on households that were missed during the actual enumeration and the training of enumerators (i.e. misunderstanding on the part of enumerators). Also errors could have been introduced at the data processing stage (editing, coding and data entry). In designing and carrying out the field procedures, including training procedures, efforts were made to reduce the effects of such errors on the results. However, it is clear that several errors still occurred.

Questionnaires

Overview

The questionnaire from the Tokelau 2001 census, which was published in English, remained mainly similar to the previous census questionnaire of 1996. An important difference was the inclusion of Tokelau Public Servants (and their families/relatives) living and working in Apia, Samoa. This was reflected in the questionnaire.

The questionnaire is divided into 2 main sections:
- Dwelling: collects information on household characteristics, sanitation, water access, energy, waste disposal, household durables, remittances.
- Individual: collects information on individual characteristics, religion, ethnicity, education, economic activities, fertility.

Data Collection Notes

The Office for Tokelau Affairs in Apia requested for Secretariat of the Pacific Community (SPC) Demography/Population Programme's assistance to design the census, questionnaires, training, collection, processing and reporting. The census preparation began in early January 2001. With the permission and approval of the Tokelau Administration officials, the Pacific Model Census Questionnaire was adopted with minor modification to accommodate Tokelau requirements. A copy of the questionnaire is annexed for reference.

The Office for Tokelau Affairs in Apia appointed census field staffs from the Tokelau Public Service. There were a total of 9 enumerators brought into Apia for training by the two Pacific Community (SPC) population professionals. The SPC Demographer and the Population Specialist acted as trainers/supervisors during the census operation.

The Office of Tokelau Affairs charted a boat from the Cook Island that transported all the census workers from Apia to Nukunonu where all the enumerators visited and administered the census questionnaires in all private dwellings. The census team then boarded the charted boat and traveled to Atafu for enumeration the next day. The two villages in Fakaofo were the last to be enumerated.

Supervision

There were two census trainers / supervisors.

The enumerators work was supervised and checked by the trainers/supervisors in the field as well as when completed questionnaires were returned. If questionnaires were found to contain errors, the concerned enumerator was asked to re-visit dwelling and correct data recording errors or check inconsistencies in responses.

Data Processing

Data Editing

Data processing was done using census and survey processing software called CSPro.

Corrections were made by visual control of the questionnaire.

Variable List

SPC_TKL_2001_PHC_Household_v01

Content	This file is the Household dataset. It contains data collected using the Dwelling questionnaire (first part of the questionnaire provided in the External Resources section).
Cases	241
Variable(s)	19
Structure	Type: relational Keys: atoll(Atoll), village(Village), ea(Enumerated Area), building(Building number), hh(Household number)
Version	Version 01 (March 2019): This is the de-identified, cleaned and labelled version of the Master file.
Producer	Tokelau National Statistics Office.
Missing Data	Some variables are not present in this dataset: - h13 (Does this household own any the following items?); - h14 (Does this household own any animals that produce food?); - h17 (Does this household receive income from any of the following sources ?).

Variables
