Version

VERSION DESCRIPTION

Version 01: De-identified, cleaned and labelled version of the Master file. This is the first systematic effort in documenting the 2016 Tokelau Census. All output documentation is available on the Tokelau website tinyurl.com/TokelauCensus but any efforts to collate data have been an internal matter so far. The DDI approach aims to make all Census material (albeit anonymised) internationally accessible.

PRODUCTION DATE

2019-03-08

NOTES

The datasets have been removed from the documentation.

Overview

ABSTRACT

The five-yearly Census of Population and Dwellings is a very important item on Tokelau's agenda. Its results provide the most authoritative data on how many people we have, what the composition of their households is, what education level they have, how they contribute to Tokelau's economy, and so on.

As a non-self-governing territory, Tokelau has a special constitutional relationship with New Zealand. This special relationship is strengthened by connections between the tiny Tokelau National Statistics Office (TNSO) and Statistics NZ. It is the latter organisation that has been largely responsible for the excellent Tokelau Censuses in 2006, 2011, and again in 2016.

KIND OF DATA

Census/enumeration data [cen]

UNITS OF ANALYSIS

Individuals and Households.

Scope

NOTES

-HOUSEHOLD: Dwelling age; number of rooms; sources of water; means of cooking; rubbish disposal; household items; access to Sky TV, internet; numbers of pigs and chickens; sources of income; combined annual household income

-INDIVIDUALS: Name (suppressed), sex, age (birthdates suppressed), relationship to household head; living where; ethnicity; life satisfaction; self-assessed health; religion; birth mother and father still alive; language skills: speaking and writing; early childhood education; address 5 years ago; education and qualifications; marital status; paid and unpaid employment; smoking; sense of belonging; social contact; children given birth to

TOPICS

Topic	Vocabulary	URI
PHC		

KEYWORDS

Census, Dwellings, Population, Demography, Employment, Education, Life satisfaction, Housing

Coverage

GEOGRAPHIC COVERAGE

National coverage. Tokelauan employees of the Tokelau Public Service based in Apia (and their immediate families), were also interviewed in Apia on census day.

UNIVERSE

The Census covers residents of the non-self-governing New Zealand territory of Tokelau and includes Tokelau public servants and their families who are employed in Apia, Samoa. While visitors to Tokelau on Census night are also included, the ultimate aim of the Census is to provide an accurate assessment of the de jure population. This has in the Censuses of 2006, 2011 and 2016 been done to an exact definition who is included. Previous definitions have been less precise which makes long-term time series less reliable.

DDI DOCUMENT VERSION

Version 01 (March 2019): This is the first attempt at documenting the 2016 Tokelau Population and Housing Census with the DDI packages Nesstar. All materials other than the raw data have been available since 2017 on the website tokelau.org.nz, specifically at tinyurl.com/TokelauCensus.

Version 02 (March 2019): This version is the review of the existing documentation. Done by Statistics for Development Division at Noumea, New Caledonia.

DDI DOCUMENT ID

DDI_SPC_TKL_2016_PHC_v02_M

Sampling

Sampling Procedure

N/A: Census.

Weighting

Full Census, hence weighting does not apply.

Questionnaires

Overview

Questions matched the previous Censuses' format in Paper Assisted Personal Interview (PAPI) as much as possible. The "skips" in PAPI proved a big time saver, and the internal checks for suitability of answers made quality control much faster.

The questionnaire was published in English with the Tokelauan translation for each question. It was divided into two sections:

- Dwelling questions
- Individual questions.

Data Collection

Data Collection Dates

Start	End	Cycle
2016-10-18	2016-10-18	N/A

Data Collection Mode

Computer Assisted Personal Interview [capi]

Data Collection Notes

On Census day every person in Tokelau was interviewed. Tokelauan employees of the Tokelau Public Service (TPS) based in Apia (and their immediate families), were also interviewed in Apia on census day. The census forms and data collection methodologies used in Tokelau and Apia were different - they were altered to meet local requirements.

A person from their own atoll interviewed Tokelau respondents at their homes in Tokelau. The head of the household completed the household questionnaire and the individual questionnaires were answered by the individual or by the head of the household in the case of young children. Each household nominated their own head of household.

In this census, because of the new quality of life questions, it was particularly important that each individual answered their own individual questionnaire.

Two members of the Tokelau National Statistics Office were responsible for carrying out the collections process at the TPS office in Apia. The interviewer training was completed in one day, and interviews were completed at the Apia TPS office on census day. The TPS employee was asked about each member of their immediate family. We used a shorter version of the full individual questionnaire, which consisted of only basic demographic questions about each member of the household. No dwelling questions were asked in Samoa.

On each of Tokelau's atolls, one of the census management team oversaw field operations and undertook quality monitoring on census day.

Questionnaires

Questions matched the previous Censuses' format in Paper Assisted Personal Interview (PAPI) as much as possible. The "skips" in PAPI proved a big time saver, and the internal checks for suitability of answers made quality control much faster.

The questionnaire was published in English with the Tokelauan translation for each question. It was divided into two sections:

- Dwelling questions
- Individual questions.

Data Collectors

Name	Abbreviation	Affiliation
Statistics New Zealand	SNZ	New Zealand Government
Tokelau National Statistics Office	TNSO	Tokelau Government

Supervision

In Tokelau, SNZ recruited people from each atoll to work as district supervisors and interviewers - there were three district supervisors and 29 interviewers in the field.

Tokelauan employees of the Tokelau Public Service based in Apia (and their immediate families), were interviewed in Apia on census day by TNSO staff.

Data Processing

Data Editing

Thanks to the Computer Assisted Personal Interview (CAPI) data collection method, it was possible to quality check census forms on census day as soon as the interviewers uploaded them. Supervisors helped the census management team to quality check every census form and if there were missing answers or errors found, the forms were sent back to the interviewers to fix. The ability to check the quality of answers was one of the major benefits of using tablets for data collection; it made the checking process faster and more thorough. This checking also ensured that the final population counts were able to be released only three weeks after census.

Other Processing

The Computer Assisted Personal Interview (CAPI) method had checks in place on the data collection software (Survey Solutions) for unrealistic answers and quality-checked the raw data on census day and the day after. If there were any errors that we spotted, they were immediately fixed by the interviewer. This meant that much less editing was needed to be done on the dataset compared to previous censuses.

Any changes that were made were documented. We took this approach to allow a record to be kept of how many changes were undertaken which will be of use when planning the next census.

The main form of editing that took place on the final dataset was the checks around who was a usual resident. This was to make sure the official population count was accurate.

Before entry into Nesstar, some of the text field entries underwent a minor edit to correct mis-spellings and to allow grouping of items that were clearly identical (e.g. Mormons, and LDS/ Latter-days Saints).

Data Appraisal

Estimates of Sampling Error

Not applicable: Census.

Other forms of Data Appraisal

Given the small population size, no post-enumeration survey was done.

Publisher(s)	Statistics New Zealand and Tokelau National Statistics Office
Description	This document describes the usually resident criteria that are used in counts of the population of Tokelau. The criteria were endorsed by the Council for the On-going Government of Tokelau for use in the 2006 Tokelau Census. It has since been used in the 2011 Tokelau Census, the 2007, 2010, and 2013 Population Counts, and again in the 2016 Census.
