APPENDIX B: The 2017 CNMI Labor Force Survey Questionnaire	i

INTRODUCTION AND ORGANIZATION

This report presents the findings of the housing characteristics from the 2017 CNMI Labor Force Survey (LFS). Even though the survey was called the 2017 CNMI Labor Force Survey, the survey questionnaire included both housing and population questions. (See [Appendix B](#) for a copy of the survey questionnaire.) The questionnaire included 30 main questions on housing with sub-items under some of them. In this report, the finding on each of these characteristics (variables) is shown for the whole CNMI (CNMI total), by island, and by district. Organizationally, each characteristic is titled and identified by a number to promote independence and ease of reference. The housing characteristics and identifications are in the table below. Note that related items are indicated by decimals; for example, *water heater energy source*, numbered 9.2 is related to *hot and cold water* numbered 9.1.

Housing Characteristic	ID	Housing Characteristic	ID
Building type	1	Trash collection service	18.1
Occupancy type	2	Monthly bill for trash collection service	18.2
Rent	3	Air conditioning	19
Year built	4	Battery operated radio	20
Wall material	5	Television set	21.1
Roof material	6	Cable TV	21.2
Number of rooms	7	Computer at home	22
Number of bedrooms	8	Internet access	23
Hot and cold water	9.1	Landline at home	24
Water heater energy source	9.2	Cellular phone at home	25.1
Complete plumbing	10	Number of persons with cell	25.2
Fuel used most for cooking	11	Number of vehicles	26
Complete kitchen	12	Number of boats	27
Microwave	13	Monthly bill for cooking gas	28
Stand-alone freezer	14	Monthly bill for water	29
Source of water	15	Water from public utility	30
Purchase drinking water	16	Value of owned units	31
Public sewer connection	17		

Each housing characteristic findings are presented in the same table and chart formats for consistency and ease: each table shows the estimated proportion or percentage, both percent within (column) and percent by (row), and the estimated population numbers. The proportions or percentage within are also shown in *100% Stacked Column* chart to facilitate comparisons. The discussion of the findings focuses on the percentages--and on medians and means when appropriate. While the estimated population numbers are not included in the text discussions, and not shown in charts, they are contained in the appropriate table.

While findings are separate and specific to each of the housing characteristics, one important underlying fact is evident across all characteristics: there is a strong correlation between Saipan estimated statistics and those of the CNMI total (CNMI as whole). This is because the total occupied housing units in Saipan comprised 90% of all housing units in the whole CNMI; hence, Saipan's share greatly influences the estimates for the CNMI total. In the discussion of each housing characteristic findings, this underlying fact

is not repeated, but it is evident in *percent within* (column) in the tables and charts. The fact that Saipan's share of total occupied housing units was 90% is shown in the *percent by* (row) in each of the tables.

SURVEY METHODOLOGY

The methodology for the 2017 CNMI LFS has been documented in a prior report and is attached as [Appendix A](#) in this report. Please see Appendix A for detail.

FINDINGS ON HOUSING CHARACTERISTICS

CNMI Occupied Housing Units by Building Type

H1

CNMI Total

One-family house detached from any other house was 45.9% of all occupied housing units in the CNMI in 2017. Units in a building with 2 to 10 apartments was 34.7%; unit in a building with more than 10 apartment units was 10.8%; one-family house attached to one or more houses was 7.4%, other types¹ of units was 1.3%.

Chart H1.1 Occupied Units by Building Type Percent
Distribution by District: CNMI 2017

¹ Other type includes buildings that were used as rooms for rent or for company employee housing (barracks).

By Island

In Saipan, one-family house detached from any other house was 44.0% of all occupied housing units; unit in a building with 2 to 10 apartments was 35.5%; unit in a building with more than 10 apartment units was 12.0%; one-family house attached to one or more houses was 7.4%; while other building types was 1.2%. Single-family house detached from any other house percentage was higher in Rota (69.6%) and Tinian (58.0%). In other words, Saipan has relatively more apartment-type units while Rota and Tinian had relatively more single-family type units. Almost all buildings in the CNMI with more than 10 apartment units (99.7%) were in Saipan.

By Saipan Districts

Within Saipan, single-family house detached from any other house percentage was higher in Districts 5 (79.8%) and 4 (72.4%) and relatively lower in Districts 2 (24.3%) and 3 (27.2%) and was just over half in District 1 (50.6%). See Table H.1.0 and Chart H.1.1 for detail.

CNMI Occupied Housing Units by Occupancy Type**H2**CNMI Total

Units rented for cash was 54.7% of all occupied housing units in the CNMI in 2017; units occupied without cash payment was 20.1%; units owned free and clear was 18.6%; while units owned with a mortgage or loan was about 6.6%.

By Island

The percentage of all occupied housing units rented for cash was highest in Saipan (56.3%), followed by Tinian (48.5%) and lowest in Rota (30.7%). The percentage of all occupied units occupied without cash payment was highest in Rota (32.7%), followed by Tinian (30.9%), and was lowest in Saipan (20.1%). The percentage owned free and clear was highest in Rota (32.7%), followed by Saipan (18.6%), and lowest in Tinian (15.5%). The percentage owned with a mortgage or loan was highest in Saipan (6.8%), followed by Tinian (5.1%), and lowest in Rota (3.9%).

**Chart H2.1 Occupied Units by Occupancy-Type Percent
Distribution by District: CNMI 2017**

By Saipan Districts

Within Saipan, units rented for cash percentage was highest in District 3 (67.4%) followed by District 2 (57.7%) and District 1 (56.6%), while relatively lower in District 5 (39.6%) and District 4 (28.0%). Owner occupied units' percentage was higher in Districts 4 (56.1%) and 5 (49.9%) and lower in Districts 1 (24.9%), 3 (14.6%), and 2 (10.6%). See Chart H2.1 and Table H2.1 for detail.

CNMI Rented Occupied Housing Units by Rent Amount**H3**CNMI Total

The median rent was \$200 and mean rent was \$280, in the CNMI in 2017.

Units with cash rent of less than \$200 was 39% of all rented for cash housing units in the CNMI in 2017; units with cash rent between \$200 and \$399 was 37%; units with cash rent between \$400 and \$599 was 18%; units with cash rent between \$700 and \$999 was 4% and units with cash rent of \$1,000 or more was 2%.

By Island

Median and mean rent amounts were higher in Saipan, \$250 and \$304, respectively; followed by Tinian, \$130 and \$222, respectively; and were lowest in Rota, \$100 and \$131, respectively.

The percentage of all units with cash rent less than \$200 was highest in Rota (83.8%); followed by Tinian 72.4%, and lowest in Saipan (35.6%). The percentage of units with cash rent between \$200 and \$399 was highest in Saipan (38.5%), followed by Tinian (23.2%) and lowest in Rota (14.0%). The percentage of units with cash rent \$400 or more was relatively high in Saipan (26.0%) and low in Tinian (4.4%) and Rota (2.2%).

Chart H3.1 Median and Mean Rent Amount by Island and District: CNMI 2017

By Saipan Districts

Median rent was highest in District 5 (\$300), followed by Districts 1 and 3 (\$250) and lower in Districts 2 and 4 (\$200). Mean rent amount was highest in District 4 (\$337), followed by District 5 (\$332), District 3 (\$313), District 1 (\$292), and lowest in District 2 (\$266).

Within Saipan, percentage of units with cash rent less than \$200 was highest in District 4 (43.5%), followed by District 2 (42.6%), District 1 (35.6%) and District 3 (35.0%); and lowest in District 5 (22.2%). Percentage of units with cash rent between \$200 and \$399 was highest in District 5 (45.3%), followed by District 1 (44.5%), District 3 (35.3%), District 2 (34.4%) and lowest in District 4 (28.6%). Percentage of units with cash rent between \$400 and \$699 was highest in District 5 (25.7%), followed by District 4

(22.9%), District 3 (21.2%), District 2 (18.1%); and lowest in District 1 (15.1%). Percentage of units with cash rent between \$700 and \$999 was highest in District 3 (5.0%), followed by District 2 (4.9%), District 5 (3.6%) and District 1 (3.2%). Percentage of units with cash rent of \$1,000 and above was highest in District 4 (5.1%), followed by District 3 (3.5%), District 5 (3.2%) and District (0.8%). See Chart H3.1 and Table H3.1 for detail.

CNMI Occupied Housing Units by Year Built**H4**CNMI Total

Majority of occupied units in the CNMI in 2017 were built in the 80s, 90s and 00s. Units built in the 1990s was 40.5% of all occupied housing units; units built in the 1980s was 23.0%; units built in the 2000s was 20.4%; units built in the 2010s was 8.9%; units built in the 1970s was 5.7%; while units build prior to 1970 was only 1.5%.

By Island

Relatively less units were built in Tinian and Rota (3%) than in Saipan (9.5%) in the 2010s. Please see chart H4.1 and Table H4.1 below for detail. *(Note that Tinian and Rota were combined, and Saipan districts were not treated separately, under this topic because of low number of cases. The response rate in the survey for this variable (year built) was only 42%.)* See Chart H4.1 and Table H4.1 for detail.

CNMI Occupied Housing Units by Wall Material Type**H5**CNMI Total

Units with concrete block walls was 75.3% of all occupied housing units in the CNMI in 2017; units with poured concrete was 8.3%; units with metal walls was also 7.5%, and units with wood and/or other materials for walls was 8.8%. Combining concrete blocks and poured concrete, 83.7% of all occupied units in the CNMI had concrete walls.

By Island

The percentage of occupied units with concrete walls (block and poured concrete combined) was highest in Rota (88.6%), followed by Saipan (84.6%), and lowest in Tinian (64.4%). The percentage with tin Metal walls was highest in Tinian (14.4%), followed by Rota (7.6%) and lowest in Saipan (7.1%). Wood and other materials walls percentage was highest in Tinian (21.2%), followed by Saipan (8.3%) and lowest in Rota (3.8%).

Chart H5.1 Occupied Housing Units by Wall Material Type
Percent Distribution by District: CNMI 2017

By Saipan Districts

Within Saipan, units with concrete (concrete blocks and poured concrete combined) walls percentage was highest in District 5 (90.0%) followed by District 4 (86.8%), District 3 and District 1 (both 83.8%) and then District 2 (81.9%). Please see Chart H5.1 and Table H5.1 for detail.

CNMI Occupied Housing Units by Roof Material Type**H6**CNMI Total

Units with concrete roof was 56.5% of all occupied housing units in the CNMI in 2017; units with metal roof was 41.8%; while units with wood, thatch, and/or other material roof was 2.0%.

By Island

The percentage of occupied units with concrete roof was highest in Rota (66.7%), followed by Saipan (56.5%), then Tinian (56.2%). The percentage of units with metal roof was highest in Saipan (41.8%), followed by Tinian (40.0%), then Rota (25.5%). The percentage of units with wood, thatch, or other material roof was highest in Rota (7.9%), followed by Tinian (3.9%), then Saipan (1.6%).

By Saipan Districts

Within Saipan, units with concrete roof percentage was highest in District 5 (72.9%) followed by District 4 and District 3 (both 57.0%), District 1 (53.0%) and then District 2 (46.6%). Units with metal roof percentage was highest in District 2 (52.4%), followed by District 1 (44.6%), District 4 (43.4%), District 3 (41.9%), then District 5 (23.9%). See Chart H6.1 and Table H6.1 for detail.

CNMI Occupied Housing Units by Number of Rooms**H7****CNMI Total**

The median number of rooms was 4 and the mean was 3.8 per occupied housing unit in the CNMI in 2017. Housing units with 4 rooms comprised 32.1% of all occupied housing units, followed by units with 5 rooms (18.8%), units with 3 rooms (15.7%), units with 1 room (13.1%), units with 2 rooms (9.5%), units with 6 rooms (6.2%), then units with 7 rooms (3.1%). Units with 8 or more rooms was 1.5% of all occupied housing units.

By Island

There was no difference in the median and mean number of rooms in Saipan, Tinian, and Rota. However, percentages of units with 1 room and units with 8 or more rooms were relatively higher in Saipan (13.1%) compared to Tinian (8.5%) and Rota (8.1%).

By Saipan Districts

Within Saipan, the median number of rooms was identical in all districts while the mean ranged from 3.9 to 4.5 rooms. The number of rooms percent distributions was similar across all 5 districts with a few notable differences: Districts 2 and 3 had relatively higher percentages in the 1 room category; Districts 4 and 5 had relatively higher percentages in the 5 rooms category. See Chart 7.1 and Table H7.1 for detail.

CNMI Occupied Housing Units by Number of Bedrooms**H8**CNMI Total

The median number of bedrooms was 2 and the mean was 2.1 in the CNMI in 2017. Two-bedroom units comprised 36.7% of all occupied housing units in the CNMI in 2017, followed by 1-bedroom units (34.0%), 3-bedroom units (19.5%), 4-bedroom units (6.8%), then 5-bedroom units (2.2%). Units with 6 or more bedrooms was 0.9% of all occupied housing units.

By Island

The median and mean number of bedroom were the same in all three islands. The number of bedrooms percent distributions for Rota and Tinian were similar in all three islands—Saipan, Tinian, and Rota.

By Saipan Districts

The median number of bedrooms was identical (2 bedrooms) in all districts while the mean ranged from 1.8 to 2.9 bedrooms.

Within Saipan, the 1-bedroom units percentage was higher in Districts 3 (44.9%), District 2 (43.0%), and District 4 (31.3%); 2-bedroom units percentage was higher in District 1 (40.0%), District 2 (36.0%), District 3 (37.3%), and District 5 (38.2%); while 3-bedroom units percentage was higher in District 5 (35.6%), and District 4 (28.1%). See Chart H8.1 and Table H8.1 for detail.

CNMI Occupied Housing Units by Hot and Cold Water in Unit**H9.1****CNMI Total**

Units with only cold water was 76.1% of all occupied housing units in the CNMI in 2017; units with both hot and cold water was 23.1%; and units with no piped water was only 0.8%.

By Island

The percentage of occupied units with only cold water was higher in both Rota (84.7%) and Tinian (84.1%) and relatively lower in Saipan (75.2%). Conversely, units with both hot and cold water was relatively higher in Saipan (23.1%) and lower in Rota and Tinian (both 15.3%).

By Saipan Districts

Within Saipan, units with only cold piped water percentage was highest in District 2 (83.5%) followed by District 5 (80.9%), District 1 (75.8%) and District 4 (73.8%) and then District 3 (69.9%). Units with both hot and cold piped water percentage was highest in District 3 (29.4%), followed by District 4 (25.0%), District 1 (22.4%), District 5 (19.1%), then District 2 (16.5%). See Chart H9.1 and Table H9.1 for detail.

CNMI Occupied Housing Units by Hot Water Energy Type**H9.2**CNMI Total

Units with electric hot water heater was 88.1% of all occupied housing units with hot water in the CNMI in 2017 while units with gas or solar water heater was 11.9%.

By Island

The percentage of units with electric hot water heater was higher in Tinian (95.8%) and Rota (94.9%) and relatively lower in Saipan (87.6%). Conversely, the percentage of units with solar or gas water heater was higher in Saipan (12.4%) and lower in Rota (5.1%) and Tinian (4.2%).

By Saipan Districts

Within Saipan, the percentage of units with electric water heater was higher in Districts 3 (90.1%) and Districts 1 (89.8%) and was lowest in District 2 (76.8%). The percentage of occupied units with gas or solar water heater was highest in District 2 (23.2%) and lowest in Districts 3 (9.9%). See Chart H9.2 and Table H9.2 for detail.

CNMI Occupied Housing Units by Complete Plumbing**H10**CNMI Total

Units with complete plumbing was 95.5% of all occupied housing units in the CNMI in 2017 while units with no plumbing was only 4.5%.

By Island

In Saipan, units with complete plumbing was 95.1% of all occupied housing units while units with no plumbing was 4.9%. In Tinian, units with complete plumbing was 99.1% of all occupied housing units while units with no plumbing was only 0.9%. In Rota, all occupied housing units had complete plumbing.

By Saipan Districts

Within Saipan, percentage of units with complete plumbing was highest in Districts 2 (97.2%), and relatively lowest in District 4 (91.5%). The percentage of occupied units with no plumbing was highest in District 4 (8.5%) and lowest in Districts 1 (3.2%). See Chart H10.1 and Table H10.1 for detail.

CNMI Occupied Housing Units by Fuel Cooking Fuel Type**H11**CNMI Total

Units cooking with butane most was 82.8% of all occupied housing units in the CNMI in 2017; units cooking with LP gas most was 11.5%; and units cooking with electricity most was 5.7%.

By Island

The percentage of occupied units cooking with butane most was higher Rota (91.9%) and Tinian (91.7%) and relatively lower in Saipan (81.8%). The percentage of occupied units cooking with LP gas most was higher in Saipan (12.6%) and lower in Tinian (1.7%) and Rota (1.5%). The percentage of occupied units cooking with electricity most was slightly higher in Tinian and Rota (both 6.6%) then in Saipan (5.6%).

By Saipan Districts

Within Saipan, percentage of all units cooking with butane most was highest in District 2 (89.4%) and lowest in District 4 (70.4%). Percentage of all units cooking with LP gas most was highest in District 4 (22.0%) and was lowest in Districts 2 (6.8%). Percentage of units cooking with electricity most was highest in Districts 5 (8.4%) and lowest in District 2 (3.8%). See Chart H11.1 and Table H11.1 for detail.

CNMI Occupied Housing Units by Complete Kitchen**H12**CNMI Total

Units with complete kitchen was 93.2% of all occupied housing units in the CNMI in 2017 while units with no kitchen was 6.8%.

By Island

Almost all occupied units in both Rota (99.3%) and Tinian (98.9%) had complete kitchen. In Saipan, 93% of all occupied housing units had complete kitchen.

By Saipan Districts

Within Saipan, the percentage of units with complete kitchen was highest in Districts 5 (94.9%) and lowest in District 4 (86.5%). The percentage of occupied units with no kitchen was highest in District 4 (13.3%) and lowest in Districts 5 (5.1%). See Chart H12.1 and Table H12.1 for detail.

CNMI Occupied Housing Units by Microwave**H13****CNMI Total**

Units with a microwave was 47.8% of all occupied housing units in the CNMI in 2017 while units with no microwave was only 52.2%.

By Island

The percentage of occupied units with a microwave was highest in Saipan (48.1%), followed by Tinian (45.9%), and lowest in Rota (43.3%). Conversely, the percentage of occupied units with no microwave was 56.7% in Rota, 54.1% in Tinian, and 52.2% in Saipan.

By Saipan Districts

Within Saipan, the percentage of all units with a microwave was highest in Districts 5 (62.0%) and was lowest in District 2 (35.6%). See Chart H13.1 and Table H13.1 for detail.

Table H13.1 Occupied Housing Units by Microwave, by Island, and by District: CNMI, 2017 4th Qtr.

CNMI Occupied Housing Units by Freezer**H14**CNMI Total

Units with a stand-alone freezer was 39.9% of all occupied housing units in the CNMI in 2017 while units with no freezer was 60.1%.

By Island

The percentage of occupied units with a stand-alone freezer was highest in Rota (60.6%), followed by Tinian (46.3%), then Saipan (38.4%).

By Saipan Districts

Within Saipan, the percentage of all units with a stand-alone freezer was highest in Districts 4 (57.5%) and was lowest in District 3 (30.7%). Please see Chart H14.1 and Table H14.1 for detail.

CNMI Occupied Housing Units by Water Source**H15**CNMI Total

Units getting water from a public system only was 85.3% of all occupied housing units in the CNMI in 2017; units getting water from a public system and cistern was 10.2%; units getting water from a cistern, tank or drums only was 3.1%, units getting water from other means was only 1.3%.

By Island

The percentage of units getting water from a public system only was highest in Tinian (98.7%), followed by Rota (93.1%), then Saipan (84.1%). The percentage getting water from both public system and cistern was relatively high in Saipan (11.2%) and lower in Rota (1.6%) and Tinian (0.9%). The percentage getting water from a cistern, tanks or drums only was relatively low: 3.3% in Saipan, 2.2% in Rota, and .04% in Tinian.

By Saipan Districts

Within Saipan, the percentage of all units getting water from a public system only was highest in District 5 (92.7%) and lowest in District 4 (46.7%). The percentage getting water from a public system and cistern was highest in District 4 (43.7%) and lowest in District 5 (3.3%). See Chart H15.1 and Table H15.1 for detail.

CNMI Occupied Housing Units by Trash Collection**H18.1**CNMI Total

Units that subscribed to trash collection service was 40.6% of all occupied housing units in the CNMI in 2017 while units not subscribing was 59.4%.

By Island

The percentage of occupied units that subscribed to trash collection service was higher in Saipan (44.5%), while lower in Tinian (8.9%) and Rota (1.6%). (Note that Tinian and Rota do not have companies that provide trash collection service like in Saipan. Trash collection service in these two islands are likely part of privately arranged landscaping/trash collection services.)

By Saipan Districts

Within Saipan, the percentage of all occupied units that subscribed to trash collection service was highest in Districts 5 (51.7%) and was lowest in District 4 (37.1%). See Chart H18.1 and Table H18.1 for detail.

CNMI Occupied Housing Units by Monthly Trash Collection Bill**H18.2****CNMI Total**

The monthly trash bill median amount was \$25.00 while the mean amount was \$25.06 for all units that subscribed to trash collection service, in the CNMI in 2017. Units with a monthly bill less than \$30.00 was 36.9%; units that paid between \$30 and \$49 was 35.8%; while units that paid \$50 or more was 27.9%.

By Island

In Saipan, the monthly trash bill median amount was \$25.00 while the mean amount was \$25.52 for all units that subscribed to a trash collection service. Units with a monthly bill less than \$30.00 was 36.2%; units that paid between \$30 and \$49 was also 36.1%; while units that paid \$50 or more was 27.7%. Almost all units that subscribed to trash collection service were in Saipan (99%), hence, Saipan's percent distribution was the same as the whole CNMI's.

In Tinian, the monthly trash bill median amount was \$5.00 while the mean amount was \$13.40 for all units that subscribed to a trash collection service. Units with a monthly bill less than \$30.00 was 85.0% while units that paid between \$30 and \$49 was 15.0%.

In Rota, there was only few units that reported paying for a trash collection service and not enough cases to derive reliable monthly bill amount estimate. See Chart H18.2 and Table H18.2 for detail.

Chart H18.2 Units with Trash Collection Monthly Bill Amount
Percent Distribution by District: CNMI 2017

By Saipan Districts

Within Saipan, no difference in the monthly trash bill median amount, it was \$25 in all districts. The mean amount ranged from a low of \$21.87 in District 4 to a high of \$28.68 in District 1. The percentage of units that paid less than \$30 for trash collection was highest in District 3 (49.9%) and was lowest in District 4 (13.3%). The percentage of units that paid between \$30 and \$49 was highest in District 4 (60.3%) and was lowest in District 3 (26.2%). The percentage of units that paid \$50 or more was highest in District 5 (38.9%) and was lowest in District 3 (23.9%).

CNMI Occupied Housing Units by Air Conditioning**H19**CNMI Total

Units with air conditioning (all type of air con combined) was 80.0% of all occupied housing units in the CNMI in 2017 while units with no air conditioning was 20.0%. Units with 1 individual room unit was 42.0% of all occupied units; units with 2 or more room units was 32.8%; and units with central air system was 5.2%.

By Island

The percentage of occupied units with air conditioning was highest in Saipan (81.2%), followed by Rota (70.5%), then Tinian (67.3%).

By Saipan Districts

Within Saipan, the percentage of all units with air conditioning was highest in Districts 3 (85.0%) and was lowest in District 4 (74.4%). See Chart H19.1 and Table H19.1 for detail.

CNMI Occupied Housing Units by Radio**H20****CNMI Total**

Units with a radio was 23.1% of all occupied housing units in the CNMI in 2017 while units with no radio was 76.9%.

By Island

The percentage of occupied units with a radio at home was relatively higher in Saipan (23.6%), followed by Rota (20.5%), then Tinian (16.7%). Conversely, the percentage of units without a radio at home was highest in Tinian (83.3%), followed by Rota (79.5%), then Saipan (76.4%).

By Saipan Districts

Within Saipan, the percentage of all units with a radio was highest in Districts 5 (37.1%) and was lowest in District 2 (14.4%). See Chart H20.1 and Table H20.1 for detail.

Table H20.1 Occupied Housing Units by Radio, by Island, and by District: CNMI, 2017 4th Qtr.

CNMI Occupied Housing Units by Internet**H23**CNMI Total

Units with Internet connection was 70.9% of all occupied housing units in the CNMI in 2017 while units with no Internet 29.1%. Units with a digital subscriber line (DSL) was 42.9% of all occupied units; units with cable modem connection was 7.1%; and units with other type of connection was 21.0%.

By Island

The percentage of units with Internet connection was slightly lower in Saipan (70.7%) than in Tinian (73.3%) and Rota (72.9%). The percentage of units with DSL connections was slightly higher in Rota (44.7%), followed by Saipan (42.9%), then Tinian (41.4%). The percentage of units with cable connections was slightly higher in Rota (9.6%) than in Tinian (8.3%) and Saipan (6.8%). The percentage of units with other than DSL or Cable was slightly higher in Tinian (23.6%) than in Saipan (20.9%) and Rota (18.5%).

By Saipan Districts

Within Saipan, the percentage of all occupied units with Internet was highest in Districts 3 (75.5%) and was lowest in District 4 (54.1%). See Chart H23.1 and Table H23.1 for detail.

CNMI Occupied Housing Units by Cell Phone**H25.1**CNMI Total

Units with a cell phone was 94.3% of all occupied housing units in the CNMI in 2017 while units with no cell phone was only 5.7%.

By Island

The percentage of occupied units with a cell phone was highest in Saipan (94.6%), followed by Tinian (92.6%), then Rota (90.8%).

By Saipan Districts

Within Saipan, the percentage of all occupied units with a cell phone was highest in Districts 5 (96.3%) and was lowest in District 4 (89.9%). See Chart H25.1 and Table H25.1 for detail.

Table H25.1 Occupied Housing Units by Cell Phone, by Island, and by District: CNMI, 2017 4th Qtr.

CNMI Occupied Housing Units by Number of Persons with Cell**H25.2**CNMI Total

The median number of persons with a cell phone was 2.0 while the mean was 2.1 per occupied housing unit in the CNMI in 2017. Units with one person with a cell was 37.0%, units with 2-persons with a cell was 30.8%, units with 3 persons with a cell was 15.3%, units with 4 persons with a cell was 7.1%, and units with 5 or more persons with a cell was 4.1%. Units with no cell was 5.7% of all occupied units.

By Island

The median number of persons with a cell phone per occupied unit was 2.0 in all three islands while the mean was 2.1 in Saipan, 2.0 in Rota and 1.9 Tinian. This means, relatively, more units in Saipan (27.1%) had more than 2 cell phones per unit compared to Tinian (20.3%).

By Saipan Districts

Within Saipan, the median number of persons with a cell (2.0) per occupied unit was the same in all districts while the mean ranged from 1.9 in District 2 and 3 to 2.6 in District 5. In other word, relatively more units in District 5 had 3 or more persons with a cell than in Districts 1 and 2. As shown in Chart H25.2 and Table H25.2, the percentage of all units with 1 person with a cell was highest in District 4 (46.0%) and lowest in District 5 (24.3%). The percentage of all units with 2 persons with a cell was highest in District 5 (34.1%) and lowest in District 4 (19.6%). The percentage of all units with 3 persons with a cell was highest in District 5 (18.9%) and lowest in District 4 (10.8%). The percentage of all units with 4 persons with a cell was highest in District 1 (9.0%) and lowest in District 2 (4.8%). The percentage of all

units with 5 or more persons with a cell was highest in District 5 (10.7%) and lowest in District 3 (1.2%). The percentage of all units with no cell was highest in District 4 (10%) and lowest in District 1 (5%). See Chart H25.2 and Table H25.2 for detail.

CNMI Occupied Housing Units by Number of Vehicle**H26****CNMI Total**

The median number of vehicles was 1.0 and the mean was 1.2 in the CNMI in 2017. Units with 1 vehicle was 45.7% of all occupied housing units, units with 2 vehicles was 22.7%, units with 3 vehicles 6.4%, units with 4 or more vehicles was 2.5%, while units with no vehicles was 22.8%.

By Island

The median number of vehicles per occupied unit was 1.0 in all three islands while the mean was 1.2 in Saipan and 1.1 in both Tinian and Rota which means relatively more units in Saipan had more than 1 vehicle compared to Tinian and Rota. For example, as shown in Table H26.1, 2.7% of all occupied units had 4 or more vehicles in Saipan, compared to 1.1% in Tinian and zero in Rota.

By Saipan Districts

Within Saipan, the mean number of vehicles per occupied units was highest in District 5 (1.5) and lowest in District 2 and 3 (both 1.0). This means more units in District 5 have more than 1 vehicle per unit than in Districts 2 and 3. As shown in Chart H26.1 and Table H26.1, the percentage of all units with 1 vehicle was highest in District 3 (48.6%) and lowest in District 4 (39.9%). The percentage of units with 2 vehicles was highest in District 5 (29.8%) and lowest in District 3 (18.1%). The percentage of units with 3 vehicles was highest in District 5 (11.0%) and lowest in District 2 (3.8%). The percentage of units with 4 or more vehicles was highest in District 1 (4.9%) and lowest in District 2 (1.0%). The percentage of units with no vehicles was highest in District 2 (29.4%) and lowest in District 5 (10.7%).

CNMI Occupied Housing Units by Number of Boat**H27**CNMI Total

Units with a boat was only 3.4% of all occupied housing units in the CNMI in 2017 while units with no boat was 96.6%.

By Island

The percentage of units with a boat was slightly higher in Tinian (5.4%) than in Rota (3.6%) and in Saipan (3.2%).

By Saipan Districts

Within Saipan, the percentage of all occupied units with a boat was highest in Districts 5 (6.9%) and was lowest in District 3 (1.7%). See Chart H27.1 and Table H27.1 for detail.

CNMI Occupied Housing Units by Monthly Cooking Gas Bill**H28**CNMI Total

The monthly cooking gas bill median amount was \$25.00 while the mean amount was \$27.92 for all occupied units that used gas for cooking in the CNMI in 2017. Units with a monthly bill between \$15 to \$29 was 66.8% of all units cooking with gas; units that paid less than \$15 was 20.6%; units that paid between \$30 and \$49 was 9.2%; while units that paid \$50 or more was 3.4%.

By Island

The cooking gas monthly bill median and mean amounts were higher in Rota, \$37.00 and \$35.56, respectively, than in Tinian (\$24.50 and \$28.88, respectively) and Saipan (\$24.00 and \$26.45, respectively). In other words, units in Saipan spent less on cooking gas monthly, on average, than in Tinian and Rota. As shown in Chart H28.1 and Table H28.1, the percentage of all units that paid between \$30 to \$49 was 47.1% in Rota, 14.9% in Tinian, but only 7.0% in Saipan.

Chart H28.1 Occupied Housing Units by Monthly Gas Bill Percent Distribution by District: CNMI 2017

By Saipan Districts

Within Saipan, the cooking gas monthly bill median and mean amounts were higher in Districts 1 and 5 and lowest in District 2. The percentage of all units with cooking gas monthly bill between \$15 and \$29 was highest in District 4 (77.9%) and lowest in District 1 (66.7%). The percentage of all units with cooking gas monthly bill less than \$15 was highest in District 5 (26.7%) and lowest in District 4 (10.0%). The percentage of all units with cooking gas monthly bill between \$30 and \$49 was highest in District 4 (10.0%) and lowest in District 3 (3.3%). The percentage of all units with cooking gas monthly bill \$50 or more was highest in District 5 (5.3%) and lowest in District 4 (2.0%). See Chart H28.1 and Table H28.1 for detail.

CNMI Occupied Housing Units by Monthly Water Bill**H29**CNMI Total

The monthly water bill median amount was \$45.00 while the mean amount was \$61.17 for all occupied units that paid for water in the CNMI in 2017. Units with a monthly bill between \$25 to \$49 was the highest percentage (35.4%) of all units that paid for water; units that paid between \$50 to \$74 was 22.7%; units that paid less than \$25 was 17.7%; units that paid between \$75 and \$99 was 9.7%; units that paid between \$100 and \$149 was 7.0%; units that paid \$150 to \$199 was 4.1%; while units that paid \$200 or more was 3.2%.

By Island

The water monthly bill median and mean amounts were higher in Rota (\$50.00 and \$71.41, respectively) than in Saipan (\$45.00 and \$61.51, respectively) and in Tinian (\$40.00 and \$52.41, respectively). In other words, units in Rota spent more on water monthly, on average, than in Saipan and in Tinian. For example, as shown in Chart H29.1 and Table H29.1, the percentage of all units that paid between \$75 to \$99 was 11.9% in Rota, 9.7% in Saipan, but only 8.8% in Tinian.

Chart H29.1 Occupied Housing Units by Monthly Water Bill Percent Distribution by District: CNMI 2017

By Saipan Districts

Within Saipan, the water monthly bill median was highest in District 3 (\$59) and lowest in Districts 1 and 2 (\$40.00). The mean amount was highest in Districts 5 (\$73.35) and lowest in District 3 (\$54.98). The percentage of all units that paid between \$25 and \$49 was highest in District 1 (41.7%) and lowest in District 4 (22.8%). The percentage of all units that paid between \$50 and \$74 was highest in District 4 (29.3%) and lowest in District 3 (19.8%). The percentage of all units that paid less than \$25 was highest in District 3 (29.3%) and lowest in District 5 (7.0%). The percentage of all units that paid between \$75 and \$99 was the same in Districts 1, 2, and 4 and the same in Districts 3 and 5. The percentage of all units that paid between \$100 and \$149 was highest in District 4 (11.5%) and lowest in District 2 (4.9%). The percentage of all units that paid between \$150 and \$199 was highest in District 4 (7.4%) and lowest in District 3 (2.4%). The percentage of all units that paid between \$200 or more was highest in District 5 (5.5%) and lowest in District 1 (2.5%). See Chart H29.1 and Table H29.1 for detail.

CNMI Occupied Housing Units by Public Utility Water**H30**CNMI Total

Units that paid for water from public utility was 87.6% of all occupied housing units in the CNMI in 2017 while units that did not pay for water from a public utility was 12.4%.

By Island

The percentage of occupied units that paid for water from public utility was highest in Tinian (97.7%), followed by Rota (88.6%) and then Saipan (86.9%).

By Saipan Districts

Within Saipan, the percentage of all occupied units that paid for water from a public utility was highest in Districts 5 (93.2%) and was lowest in District 2 (82.9%).

CNMI Owner-Occupied Housing Units by Home Value**H31**CNMI Total

The home value median amount was \$80,000 while the mean amount was \$143,846 for all owner-occupied units in the CNMI in 2017. Units with a home value between \$50,000 and \$99,999 was the highest percentage (30.9%) of all owner-occupied units; units less than \$50,000 was 24.3%; units between \$100,000 and \$149,999 was 18.5%; units between \$150,000 and 299,999 was 17.8%; while units with \$300,000 or more was 8.5%.

By Island

The home value median amount was highest in Tinian (\$85,000), followed by Saipan (\$80,000), then Tinian (\$75,00). The mean amount was highest in Saipan (\$167,276), followed by Tinian (\$127,350), then Rota (\$92,957). In other words, self-declared home value, in general was lower in Rota than in Saipan and Tinian. As shown, in Chart 31.1 and Table 31.1, percentage of units valued between \$50,000 and \$99,999 was 41.4% in Rota, 38.6% in Tinian and 29.7% in Saipan.

Chart H31.1 Owner-Occupied Housing Units by Home Value Percent Distribution by District: CNMI 2017

By Saipan Districts

Within Saipan, home value median was highest in District 5 (\$100,00) and lowest in District 2 (\$50,000) while the mean amount was highest in District 4 (\$323,914) and lowest in District 2 (\$61,500). The percentage of all units with home value less than \$50,000 was highest District 2 (40.3%) and lowest in District 5 (19.5%). The percentage of all units with home values between \$50,000 and \$99,999 was highest District 2 (38.6%) and lowest in District 5 (20.0%). The percentage of all units with values between \$100,000 and \$149,999 was highest District 5 (31.4%) and lowest in District 2 (10.5%). The percentage of all units with values between \$150,000 and \$299,999 was highest in District 5 (24.5%) and lowest in District 2 (10.5%). The percentage of all units with values \$300,000 or more was highest District 1 (12.8%) and lowest in District 2. See Chart 31.1 and Table 31.1 for more detail.

Appendix A:
The 2017 Labor Force Survey Methodology

THE PURPOSE OF THE SURVEY

The 2017 Commonwealth of the Northern Mariana Islands Labor Force Survey (CNMI LFS) is the latest of several that have been conducted in the CNMI since the 1990s under the CNMI Department of Commerce, Central Statistics Division (CSD). The main purpose of the survey was to collect adequate data to profile labor force participation measures in the Commonwealth. However, the survey went beyond just collecting data on labor force and included other population and housing characteristics. Please see attached questionnaire for details on items included in this survey.

THE TARGET POPULATION AND GEOGRAPHY OF THE LFS

The target population of the 2017 LFS included the entire CNMI population and housing units. Specifically, it included all persons and occupied housing units on the islands of Saipan, Tinian and Rota, but did not cover the Northern Islands.

THE SURVEY TIMELINE

The data collection for the 2017 LFS was conducted in the Fourth Quarter, 2017; it started on September 20, 2017 and ended on December 21, 2017. Data coding began the same week the field work began. Data entry began the second week of October and continued until the last week of December 2017. Data reconciliation and cleaning took place in December 2017 through January 2018.

THE SAMPLING DESIGN OF THE 2017 LFS

The 2017 LFS sampling design was like in prior surveys: a stratified random sampling with proportion to size and with minimum. The sample frame was the Housing Units Listing maintained by Commerce CSD last updated in 2014. Island was the first stratum and Village Group was the second stratum. A minimum of 30 was applied. The goal of the Survey was to produce reliable statistical estimates on the selected characteristics of housing and population in the CNMI.

A total of 1,278 housing units were randomly selected: 878 from Saipan, 200 from Tinian, and 200 from Rota. In addition, 938 additional housing units (724 from Saipan, 100 from Tinian, and 114 from Rota) were randomly selected and used as substitutes for situations where a housing unit was no longer occupied, demolished, converted into a business establishment, a householder refused to complete the survey, or for other reasons. Substitution was done to ensure that enough household data from each of the three islands was collected to adequately profile the population and housing units for the three islands.

THE SURVEY INSTRUMENT

The 2017 LFS questionnaire contained thirty-two (32) main housing questions with related sub-questions and thirty-five (35) main person questions with related sub-questions. The questionnaire is attached as [Appendix B](#). Items in the questionnaires were taken from prior surveys and censuses instruments and adapted to meet the needs of this survey.

THE ADMINISTRATION OF THE SURVEY

The 2017 LFS was conducted out of the Central Statistics Division. CSD hired survey takers and clerks as temporary government worker based within CSD. Under the law, PL 7-35, enacted in 1990, CSD is the CNMI Government Office that is empowered with authority to conduct surveys in the CNMI. The CSD has been conducting similar surveys in the CNMI since the 1990s.

SURVEY TRAINING AND STAFF

The Central Statistics Division hired 30 temporary employees for the Survey: 27 field survey takers and three office clerks. In addition, CSD in-house staff also worked directly on the survey. All field survey field workers and office clerks went through a 9-hour survey training session, spread over a three-day period. The first day focused on properly completing the survey questionnaire. The second day reviewed completing the questionnaire and focused on field work—how to use the CNMI Housing Register and Housing Maps to locate the preselected households in the sample, logistical, and other administrative work involved in the Survey. The third day was a field trial run where each of the enumerators went out to the field, located the houses in his/her assignment area, completed one questionnaire, returned to the Office, and had his/her work verified by the supervisor and the clerks. The three office clerks attended the same training with the field surveyors and were also trained in reviewing forms, coding, and data entry. Training was done separately for Saipan, Tinian and Rota.

THE PRIMARY MODE OF COMPLETING THE SURVEY QUESTIONNAIRE

The primary mode of collecting the data from each of the selected households in the LFS was through a personal visit and interview of the members of the selected households. As stated earlier, survey takers were hired and trained to locate each of the randomly selected housing units in the sample, conduct a personal interview, and complete an LFS questionnaire. In cases where follow-ups were necessary, telephone was also used to complete the questionnaires to minimize the cost and speed-up the follow-up process of completing forms. In all cases the first contact with each household was a personal visit; most questionnaires were completed this way, but telephone follow-up was also commonly used to complete or verify pieces of information. Telephone follow-ups were done by both field survey takers and in-house office clerks, depending on the situation. In situations where an office clerk can call a household and get the required piece of information, this was done; in other situations, the form was returned to the appropriate surveyor to do follow-up and complete the form.

THE TRACKING OF FIELD WORK

To help manage the Survey's daily operations, a database tracking system in MS Access was created to track the progress of each field worker, the entire group, and percentage of work done. Daily, an office clerk entered completed forms into the database tracking system and reports were produced to show the progress of the Survey's field work. Survey supervisors reviewed the progress of the field work, daily, and determined necessary changes, decisions, and actions to take.

QUESTIONNAIRE REVIEW FOR QUALITY CONTROL

Three office clerks were trained to review each questionnaire for completeness and either accepted or rejected each of the questionnaire submitted by the field surveyors. The enumerators were paid on a per completed form basis rather than per hour. To be paid, the questionnaire submitted must pass review. CSD settled on this form of payment based on past survey work experiences. At the beginning of the field work, work was deliberately slowed down to make sure that each enumerator was doing his/her job correctly before being encouraged to increase production. After the training, dates and times were set for field workers to come in to CSD for their field work assignment. As mentioned above, on the third day of training, each enumerator was given only one assignment area (AA) and one questionnaire; each went out to the field and completed that one questionnaire from within that AA; and brought the completed form back to CSD for review. Enumerators who passed the first questionnaire review were given a supply of questionnaires and

enough housing units to increase their field work production in the coming days. Those who did not do so well were re-trained or assisted in their weak areas. Many of the field enumerators have worked with prior censuses and surveys with valuable past experiences doing field survey work.

DATA CODING

Once a questionnaire passed the review stage, it was filed appropriately in a filing cabinet ready for coding. Code books from prior survey were updated and used for coding the 2017 LFS forms. Throughout each day, the clerks would review incoming forms, assisted field workers, and coded completed forms. Code books copies are available at CSD. Codes can also be obtained from the code tables in MS Access database that house the Survey data.

DATA ENTRY

A database in MS Access was created to store the survey data. A form application was created to enter the data from the completed questionnaire into the database. The database tables and form application contained validation rules that allowed only the acceptable set of values (variable domain) into each of the fields. The validation check helped to minimize the amount of keying errors entering the database.

DATA CLEANING AND PROCESSING

As the forms were entered into the database, frequencies and crosstabs were produced and used to look for possible errors and/or anomalies in the database records. Queries were created in MS Access to show what appeared to be possible errors and isolate, appropriately, these set of records. At the completion of data entry, possible errors were isolated and validated against the appropriate hard copy questionnaires.

The resulting clean dataset for the LFS resides in MS Access. It was also exported in SPSS (Statistical Package for the Social Sciences) and into a data model in MS Excel for tabulation and analysis.

SURVEY CHALLENGES

FIELD WORK DATA COLLECTION DELAY IN TINIAN AND ROTA

Saipan's field data collection went relatively smoothly and was completed within the Fourth Quarter, 2017. However, data collection in Tinian and Rota were not completed by the enumerators hired from these two islands and required sending field workers from Saipan to complete field work in those two islands. Although a problem in that Tinian and Rota hired field workers stopped working, Saipan workers sent to those two islands completed field work in these islands in a timely manner, so that data collection was completed with the month of December, as planned. Getting survey field work done in Tinian and Rota have always been problematic. It is important to keep this in mind and have a back-up plan in case field workers hired in these islands fail to complete their assignments.

WORK REASSIGNMENT

Several of the field workers started but either did not complete the areas assigned to them or were making slow progress. This required reassignment of field work to the more productive ones. It is important to keep in mind that going door-to-door completing survey questionnaire is not for everyone and to plan for options to make sure survey takers are able to complete the field work.

DATA ENTRY DELAY

While form reviews, coding, and keying was completed in December they could have been done sooner, before the clerk contracts expired, so that clerks could have worked on data cleaning. Consider changing/refining workflows to make sure clerical support stay on task. Also, it might be time to experiment with electronic devices, such as tablets, for field data collection work.

RESPONSE RATE IN THE LABOR FORCE SURVEY

Of the 1,278 households selected for the 2017 LFS, 1,122 of them were completed, a response rate of about 83% for the CNMI. By island, the response rate was 92% for Saipan; 89% for Tinian, and 68% for Rota. The 1,122 households had 3,491 persons for an average of 3.1 per household CNMI-wide. The average number of persons per household was 3.2 (2,598/809) in Saipan; 3.0 (525/177) in Tinian; and 2.7 (368/136) in Rota.

ESTIMATED POPULATION AND SURVEY WEIGHTS IN THE SURVEY

The estimated total population for the CNM in 2017 was 52,263, according to the US Census Bureau². This total was used in estimating the sub populations in this Survey. Table A.1.0 shows how the survey weights—used to estimate the sub-populations in the Survey—were derived. As discussed earlier, sampling was stratified by island and by village group. Table A.1.0, column 2 (C2), shows the number of

² [United States Census Bureau](https://www.census.gov)

occupied housing units by island and by village group based on the 2014 sample frame; the count of randomly sampled housing units for the Survey in C3; the count of housing units completed in the Survey (C4), the count of persons captured in the Survey (C5), and the average number of persons per housing unit in the Survey (C6). The estimated total population based on the sample frame and survey average are shown in column 7, derived by multiplying C2 and C6; however, the resulting total population of 43,548 is less than the Bureau's estimate of 52,263. To scale the population estimates in C7 to the Bureau's total, C7 was multiplied by 1.2 ($52,263/43,548$). Survey weights by village group were, then, derived by dividing 2017 Population Estimates (C9) by the count of persons in the Survey (C5). These weights were then imputed appropriately to the individual records in the Survey's dataset and used to produce labor force participation measures shown in the body of this report.

2017 CNMI LABOR FORCE SURVEY (LFS)

Notice: Response to this inquiry is required by law (**Public Law 7-35**).

By the same law, **YOUR RESPONSES OR ANSWERS ARE CONFIDENTIAL**
and will only be used for statistical purposes.

The 2016 Labor Force Survey (LFS) of Commonwealth of the Northern Mariana Islands counts each person at his or her "usual residence." The usual residence is the place where the person lives and sleeps most of the time.

Include:

- | | |
|--|--|
| ➤ Everyone who usually lives here such as family members, house mates and roommates, foster children, roomers, boarders, and live-in employees | ➤ Newborn babies still in the hospital |
| ➤ Persons who are temporarily away on a business trip, on vacation, or in a general hospital | ➤ Children in boarding schools below the college level |
| ➤ College students who stay here while attending college | ➤ Persons who stay here most of the week while working even if they have a home somewhere else |
| ➤ Persons in the Armed Forces who live here, including local reservists temporarily deployed | ➤ Persons with no other home who were staying here on September 1, 2017 |

DO NOT Include:

- | | |
|---|--|
| ❖ Persons who usually live somewhere else | ❖ Persons in the Armed Forces who live somewhere else |
| ❖ Persons who are away in an institution such as a prison, mental hospital, or a nursing home | ❖ Persons who stay somewhere else most of the week while working |
| ❖ College students who live somewhere else while attending college | |

1a. Please give me the name of each person living here on September 1, 2017, including all persons staying here who have no other home. If **EVERYONE is staying here temporarily and usually lives somewhere else, give me the name of each person. Begin with the household member in whose name the home is owned, being bought, or rented. If there is no such person, start with any adult household member.**

Print last name, first name, and middle initial for each person .

1.	6.
2.	7.
3.	8.
4.	9.
5.	10.

1b. If EVERYONE listed above is staying here only temporarily and usually lives somewhere else ASK – Where do these people usually live?
Write their address here:

Q#	Question	CSD Office Use
H01A	When you told me the names of persons living here on SEPTEMBER 1, 2017, did you leave anyone out because you were not sure if the person should be listed - for example, someone temporarily away on a business trip or vacation, a newborn baby still in the hospital, or a person who stays here once in a while and has no other home? 1. Yes 2. No	
H01B	When you told me the names of persons living here on SEPTEMBER 1, 2017, did you include everyone even though you were not sure that the person should be listed - for example, a visitor who is staying here temporarily or a person who usually lives somewhere else? 1. Yes 2. No	
H02	Which best describes this building? Include all apartments, flats, etc., even if vacant. 1. A one-family house detached from any other house 4. A building with more than 10 apartments 2. A one-family house attached to one or more houses 5. Other 3. A building with 2 to 10 apartments	
H03	Is this (house/apartment/condominium) - 1. Owned by someone in this household with a mortgage or loan 3. Rented for cash 2. Owned by someone in this household free and clear (without a mortgage) 4. Occupied without payment of cash rent	
H04	If this house is RENTED FOR CASH (3) ASK - What is the total monthly rent? \$	
H05	About what year was this building first built?	
H06	What is the MAIN type of material used for the outside walls of this building? 1. Poured Concrete 3. Metal 5. Concrete & Metal 7. Pre-fabricated 2. Concrete Blocks 4. Wood 6. Concrete & Wood 8. Other	
H07	What is the MAIN type of material used for the roof of this building? 1. Poured Concrete 3. Wood 5. Other 2. Metal 4. Thatch	
H08	How many rooms do you have in this house/apartment? Count living rooms, dining rooms, kitchens, and bedrooms, but do NOT count bathrooms, balconies, foyers, or halls.	
H09	How many bedrooms do you have? That is, how many bedrooms would you list if this (house/apartment) were on the market for sale or rent?	
H10	Do you have hot AND cold piped water? 1. Yes, hot and cold piped water 2. No, only cold piped water 3. No piped water - Skip to H12	
H11	If Yes (1) ASK - What type of energy powers your water heater? 1. Electricity 2. Gas 3. Solar 4. Other	
H12	Do you have complete plumbing? Complete plumbing includes running water, bathtub or shower and flush toilet. 1. Yes 2. No	
H13	Which FUEL is used MOST for cooking in this unit? - If multiple, ASK for the MOST Used cooking fuel. 1. Electricity 2. Gas (LPG) 3. Butane 4. Solar 5. Other Fuels	
H14	Do you have a complete kitchen? A complete kitchen includes stove, refrigerator, and sink with piped water. 1. Yes 2. No	
H15	Do you have a microwave oven? 1. Yes 2. No	
H16	Do you have a stand-alone freezer in this unit? 1. Yes 2. No	
H17	Do you get water from - 1. A public system only 3. A cistern, tanks, or drums only 5. A public standpipe 2. A public system and cistern 4. Village water system 6. Some other source like an individual well or spring	

Q#	Question	CSD Office Use
H18	Do you purchase drinking water? 1. Yes 2. No	
H19	Is this building connected to a public sewer? 1. Yes, connected to public sewer 2. No, connected to septic tank or cesspool 3. No, uses other means	
H20A	Do you pay or subscribe to a solid waste (trash) collection service(s)? 1. Yes 2. No - Skip to H21	
H20B	What was the last monthly bill for solid waste (trash) collection service(s)? \$	
H21	Do you have air conditioning? 1. Yes, a central air-conditioning system 3. Yes, 2 or more room units 2. Yes, 1 individual room unit 4. No	
H22	Do you have a battery operated radio? - Exclude car radio. 1. Yes 2. No	
H23	Do you have a television set? 1. Yes 2. No	
H23A	Do you have Cable TV? 1. Yes 2. No	
H24	Do you have a computer at home? 1. Yes 2. No	
H25	Do you have internet access in your unit? 1. Yes, Digital Subscriber Line (DSL) 3. Yes, other (specify): 2. Yes, Cable Modem 4. No	
H26	Do you have a landline telephone in this unit? 1. Yes 2. No	
H27	Does anyone have a cellular phone in this unit? 1. Yes 2. No	
SKIP	- If No, SKIP to H28 -	SKIP
H27A	How Many household members have a cellular phone in this unit?	
H27B	How Many cellular phones does this unit have?	
H28	How many automobiles, vans, and trucks of one-ton capacity or less are kept at home for use by members of this household?	
H29	How many boats with a motor are kept for use by members of this household?	
H30	If H13 is 2. Gas (LPG) or 3. Butane ASK, What was the last monthly bill for GAS FOR COOKING for this unit? \$	
H31	What was the last monthly bill for water for this unit? \$	
H31A	Do you pay for water from a public utility? 1. Yes 2. No	
SKIP	- ASK ONLY if someone in this household OWNS OR IS BUYING this house; Otherwise SKIP to P01 -	SP
H32	What is the value of this dwelling; that is, how much do you think it would cost to build this dwelling now? \$	

Q#	Question	CSD Office Use
P01A	Name (from Roster List - Page 1)	
P01B	Person Number (from Roster List - page 1)	
P02	Is ... male or female? 1. Male 2. Female	
P03	How is ... related to (Person 1) 01. Householder 03. Natural or adopted son/daughter 05. Brother/sister 07. Grandchild 02. Spouse 04. Stepson/stepdaughter 06. Father/mother 08. Other relative: If not related to Person 1: 09. Roomer, boarder, or foster child 10. Domestic worker/helper 11. Unmarried partner 12. Other nonrelative	
P04	What is ...'s ethnicity? - Do not report more than 2 - 1. 2.	
P05	What is ...'s date of birth? (Month/Day/Year) Month: Day: Year:	
P05A	Age:	
P06	What is ...'s marital status? 1. Now married 2. Separated 3. Widowed 4. Divorced 5. Never married	
P07	Where was ... born? Print the name of the village in CNMI or the name of the U.S. State or territory, island, or foreign country in the space provided.	
P08	Is ... a CITIZEN of the United States? 1. Yes, born in CNMI - Skip to 11 3. Yes, born abroad of US parent(s) 5. No, not citizen (Green card/Legal/FAS) 2. Yes, born in the U.S., Guam, or other US territory 4. Yes, U.S. citizen by naturalization 6. No, not citizen (Other)	
P09	In what year did ... come to CNMI to stay?	
P10	Why did ... come to CNMI the first time? 1. Employment 3. Dependent of employed person 5. Student – attending school/college 7. Medical reasons 9. Other, Specify: 2. Spouse of employed person 4. Family member of employed person 6. Missionary 8. Visiting/vacation	
P11A	Where was ...'s mother born? Print the name of the village in CNMI or the name of the U.S. State or territory, island, or foreign country in the space provided.	
P11B	Where was ...'s father born? Print the name of the village in CNMI or the name of the U.S. State or territory, island, or foreign country in the space provided.	
P12	At any time since September 1, 2017, has .. attended regular school or college? Include only nursery school, kindergarten, elementary school, and schooling which leads to a high school diploma or a college degree. If "Yes," ask -- Public or private? 1. No, has not attended since September 1, 2017 2. Yes, public school / public college 3. Yes, private school / private college	
P13A	How much school has ... COMPLETED? Read categories if person is unsure. Circle the number for the highest level COMPLETED or degree RECEIVED. If currently enrolled, mark the level of previous grade attended or highest degree received. 31. No school completed 01. 1st 04. 4th 07. 7th 10. 10th 32. Nursery school 02. 2nd 05. 5th 08. 8th 11. 11th 33. Kindergarten 03. 3rd 06. 6th 09. 9th 12. 12th, no diploma 13. HIGH SCHOOL GRADUATE DIPLOMA or equivalent (GED) 14. Some college but no degree 18. Bachelor's degree (For example: BA, AB, BS) 15. Vocational Certification 19. Master's degree (For example: MA, MS, Med, MSW, MBA) 16. Associate degree in college Occupational program 20. Professional school degree (For example: MD, DDS, LLB, JD) 17. Associate degree in college Academic program 21. Doctorate degree (For example: PhD, EdD)	
P13B	If HIGHER than Highschool Graduate (14 - 21) ASK - What was ...'s major in academic college or vocational school?	
P13C	Where was this education attained? 1. Northern Mariana Collage (NMC) 2. Northern Marianas Trades Institute (NMTI) 3. Other (Specify)
