NOTES
This dataset consists of the aggregated income and expenditures reported during the survey from either modules or diary.

Overview

ABSTRACT
This Household Income and Expenditure Survey (HIES) is a critical component of the work of the Cook Islands Statistics Office (CISO). The survey provides major indicators of the economic health of the nation and the well being of its people. For example Cook Islands residents (as opposed to businesses, government or tourists) consume a significant proportion of goods and services available in the Cook Islands. Changes in consumer and household spending patterns reflect changes in the economy and in individual and social behaviour. It provides the data which is necessary for the periodic revision of weights for the Office's Consumer Prices Index and other indices.

CISO adopted the Pacific standard HIES methodology developed by the Statistics for Development Division (SDD) of the Pacific Community (SPC) in 2011 to conduct Cook Islands 2015/2016 HIES. These standards, were designed to feed high-quality data to HIES data end users. The field collection spread over a 12 months period (November 2015 to November 2016) to cover seasonality of income and expenditure.

KIND OF DATA
Sample survey data [ssd]

UNITS OF ANALYSIS
The suvey describes 2 different units of analysis:

- The household

- The individual (household members).

Scope

NOTES
Main questionnaire sections:

- Individual sections: demographic, education, health status (including disability), Individual expenditure (clothing, communication, kava tobacco alcoho)l, labor force and individual income,

- Household sections: dwelling characteristics (inc energy), assets, home maintenance, vehicles, private travels, household

services and taxes, financial support given away, household expenditure (textiles...), ceremonies, remittances received, , primary activities (agriculture, fisheries, livestock, handicraft)

- Diary (cash expenditure, gift received, home production - 2 weeks).

KEYWORDS
Cook Islands, HIES, Income, Expenditure, PACCOI, COICOP, Health, Education, Economic activity

Coverage

GEOGRAPHIC COVERAGE
The survey aims at releasing results at the national level and island group level (Rarotonga, Southern Group, Northern group), as well as Urban/rural (Rarotonge and outer islands).

UNIVERSE
The scope of the 2015/2016 HIES was all occupied households in Cook Islands .

HIES covered all persons who were considered to be usual residents of private dwellings (must have been living in Cook Islands for a period of 12-months, or have intention to live in Cook Islands for a period of 12-months in order to be included in the survey).

DDI DOCUMENT VERSION
Version 01 (July 2019): This is the first attempt at documenting the 2015-2016 Cook Islands Household Income and Expenditure Survey. This was jointly done by Cook Islands Statistics Office and Tonga Statistics Department during a South-South mission in Rarotonga, Cook Islands.

Version 02 (July 2019): Review of the existing documentation of the 2015-2016 Cook Islands Household Income and Expenditure Survey. Done by Statistics for Development Division at Noumea, New Caledonia.

Sampling

Sampling Procedure

SAMPLING PROCEDURE:
The sample selection is based on a 2 stages process that differs in Rarotonga and the Outer Islands.
- In Rarotonga the primary sampling unit is the Enumeration Area that were selected using probability proportional to size (the more populated the EA was, the higher the chance of selection was), then in each selected EA, 15 HHs were selected (10 to interview in priority and 5 for replacement in case),
- In Southern and Northern groups, the primary sampling units were the islands, and within each island, the HHs were randomly selected.

In 2005/2006, 913 households (HHs) HHs were selected and 691 sufficiently responded. The 2005/2006 HIES provided solid estimates for expenditure aggregates at the national level (sampling errors for national expenditure estimate is 3.3 percent), however it can be seen from Table 3 that the accuracy of the estimates by domain are variable, especially in the Northern group where the relative sampling error for income (RSE) is greater than 5 percent. This finding was taken into consideration in the 2015/2016 HIES sample allocation and it was recommended that the sample be increased in this domain, however, budget and accessibility were constraining factors.

Similarly to the 2006 HIES, private occupied dwellings were the statistical unit for the 2015/2016 HIES. Institutions and vacant dwellings were removed from the sampling frame.
Some areas in Cook Islands are very difficult to reach due to the cost of transportation and the remoteness of some islands, which is why they are excluded from the sample selection.

SAMPLE SELECTION:
The 2011 Census of Population and Dwellings (CPD) was used to select the islands to interview, and then in each selected islands the HH listing was updated for selection. For budget and logistics reasons the islands of Mauke and Mitiaro were excluded from the Southern group and the islands of Penrhyn, Rakahanga, Palmerston and Nassau were excluded from the Northern group. In total, 6 percent of the HHs were excluded from the sample selection across the Cook Islands, and 36 percent within the Northern Group.

Deviations from Sample Design

Due to low response rate in the Northern group, the decision was made not to release the outputs at this division level, so Northern and Southern division are grouped in 1 rural domain.
For budget and logistics reasons the islands of Mauke and Mitiaro were excluded from the Southern group and the islands of Penrhyn, Rakahanga, Palmerston and Nassau were excluded from the Northern group. In total, 6 percent of the HHs were excluded from the sample selection across the Cook Islands, and 36 percent within the Northern Group.

Response Rate

-The national response rate was: 89.7%. The achieved sample size was 691 out of 770 selected households.
-Rarontonga: The achieved sample size was 270 out of 320 selected households.
-Southern Islands: The achieved sample size was 314 out of 320 selected households.
-Northern Islands: The achieved sample size was 107 out of 130 selected households.

-Rarotonga: 84,4%
-Southern group: 98,1%
Aitutaki: 97,5%
Mangaia: 97,5%
Atiu: 100,0%
-Northern group: 82,3%
Pukapuka: 98,8%
Manihiki: 56,0%

-Total: 89,7%.

Weighting

The sampling weights were derived at the household level then used at the household and individual level for extrapolations and tabulations. The sampling weight computation process was based on the inverse of the probability of selection of each household. Due to different sample design in Rarotonga and Outer Islands, the computation process was then a bit different in both stratas. In Rarotonga it resulted from the inverse of the factor of probability of selection of the Enumeration Area (EA) (=within the strata) and the probability of selection of one household with the EA. In the outer islands, it resulted from the probability of the selection of the islands within the strata and the probability of selection of the household within the island.

Questionnaires

Overview

Four modules are completed by paper-based personal interview, including:
1. Demographic information - characteristics of HH members, including activity and education profile;
2. HH characteristics and expenditure;
3. Individual expenditure; and
4. Individual and HH income.

Depending on the information being collected, a recall period (ranging from the last 7 days to the last 12 months) is applied to various sections of the questionnaire.

The forms were completed in English by face-to-face interviews, usually with the HH head providing most of the information, with other HH members being interviewed when necessary. The interviews took place over a 2-week period such that the household diary, which is completed by the household on a daily basis for 2 weeks, can be monitored while the module interviews take place.

The household diary collects information on the household 's daily expenditure on goods and services; and the harvest, capture, collection or slaughter of primary produce (fruit, vegetables and animals) by intended purpose (home consumption, sale or to give away).

The income and expenditure data from the modules and the diary are concatenated (ensuring that double counting does not occur), annualised, and extrapolated to form the income and expenditure aggregates presented herein.

Data Collection Notes

The fieldwork was carried out by 7 enumeration teams, 2 in Rarotonga, 3 in the Southern Group (Aitutaki, Mangaia and Atiu) and 2 in the Northern Group (Pukapuka and Manihiki).

A main training has been delivered in Rarotonga with the teams that started the field work (both Rarotonga teams, Mangaia, Aitutaki and Pukapuka) and specific trainings have been conducted in Atiu and Manihiki. Each team is made of 2 enumerators (in charge of 5 HHs each) and 1 supervisor. All teams were under the supervision of the HIES Manager from the head office of the Statistics Office in Rarotonga.
The survey period is divided in 16 rounds. A round is a 3 week period in which a team will be in charge of 10 Round 1 started in November 2015 and round 16 finished In November 2016.

The survey was spread over 16 rounds throughout the 12 month enumeration period (November 2015 to November 2016) in order to take adequate account of seasonal fluctuations in income, expenditure and food acquisition (as a proxy to estimate consumption).
Team supervisors were in charge of the data entry for their team (using laptop), data entry occurred on the same day or the day after the interview for the modules, while the first diary was entered in week-two and the second week diary is entered in week-three of each round. In-field data entry was conducted in order to make use of the entry validation checks and to return to the household to verify data where inconsistencies were identified.

Supervision

Each team is made of 2 enumerators (in charge of 5 HHs each) and 1 supervisor. All teams were under the supervision of the HIES Manager from the head office of the Statistics Office in Rarotonga.

Team supervisors were in charge of the data entry for their team (using laptops).

Data Processing

Data Editing

Once the data were clean, verified and consistent, they were recoded to form a final aggregated database, consisting of:
1. Person level record - characteristics of every household (HH) member, including activity and education profile;
2. HH level record - characteristics of the dwelling and access to services;
3. Final aggregated income - all HH income streams, by category and type;
4. Final aggregated expenditure - all HH expenditure items, by category and type.

An additional poverty file was also generated.
Software used for data processing was Stata version 14.

Other Processing

The survey procedure and enumeration team structure allowed for in-round data entry, which gives the field staff the opportunity to correct the data by manual review and by using the entry system-generated error messages. This process was designed to improve data quality.
The data entry system used system-controlled entry, interactive coding and validity and consistency checks. Despite the validity and consistency checks put in place, the data still required cleaning. The cleaning was a 2-stage process, which included manual cleaning while referencing the questionnaire, whereas the second stage involved computer-assisted code verification and, in some cases, imputation.

Software used for data entry was CSPro version 6.1.

Data Appraisal

Estimates of Sampling Error

There is an increased degree of error with finer levels of disaggregation, especially where income and expenditure categories have few transactions and the sample is relatively small (outer islands).

In accordance to the data quality thresholds presented above, it can be seen that total Relative Sampling Errors (RSE) of 3.8 percent (i.e., national income estimates) is good. As this is disaggregated by strata, the total annual household income estimates, by strata, have a range of 5 to 10 percent, making the strata disaggregated total annual household expenditure estimates within being good. Own business and capital income estimates show a very high degree of error and have to be interpreter with cautious.

Some areas in Cook Islands are very difficult to reach due to the cost of transportation and the remoteness of some islands, which is why they are excluded from the sample selection.

Decimals: 0
Range: 1-6

Valid cases: 691
Invalid: 0
Minimum: 1
Maximum: 3

Literal question

What type of living quarter (main house) is this?

Interviewer instructions

The interviewer can once again provide the answer to this question based on observation, but clarification can always be sought from the household head. There are six main options provided for this question, of which only one can be ticked. A brief description of each is as follows:
1. One house detached from any other house: This housing type will be the most common and represents a building that is not attached to any other building for which the household resides.
2. Building with 2 or more apartments: This housing type refers to a block of apartments.
3. Building attached to a business/other non-residential building: This housing type, as its name suggests, will occur if it shares a common wall with a store/shop.
4. Other (note): Any kind of living quarter not fitting to those above. Examples are the multiple-house households - a household that is spread over more than one building or structure. The main house refers to the building in which the people in this household sleep.

20112 Main material for roof (hq20112)

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-5

Valid cases: 691
Invalid: 0
Minimum: 1
Maximum: 3

Literal question

What is the main material used for the roof?

Interviewer instructions

The answers to these questions can be filled in by observing the house yourself, or by asking the household head.
1. "Concrete|: The main material used is made of cement – poured concrete (liquid cement) or cement blocks.
2. "Metal, tin": As the name suggests, the main material is corrugated iron (e.g., metal or tin).
3. "Wood": Main material used is made of wood, e.g., plywood.
4. "Thatched/traditional": All types of thatching – coconut leaves, thatch or any other natural leafy material.
5. "None": As the name suggests, the house does not have any wall.
6. "Coral/sand/gravel": As the name suggests, coral, gravel or material of similar nature is mainly used.
7. "Other (note)": This option is used in case of the main material not among the types listed above.
Always provide a brief description of what that material was or can be "none" if no permanent walls exist. An example of this would be a family summer house without wall that is used for sleeping space.
If more than one material is used, then only tick the box of the material which is most prevalent. In the case that two materials were used equally, tick the box of the item which appears on the answer options list first.

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 1-12

Valid cases: 691
Invalid: 0
Minimum: 1
Maximum: 7
Mean: 4.5

Literal question

How many rooms does your household occupy? (Count living rooms, dining rooms, kitchen and bedrooms separated by walls, but not bathrooms)

Interviewer instructions

Rooms in the context of this question refer to places where a person can sleep or eat. It does not refer to bathrooms or toilets. In order to be qualified as a room, the space needs to be enclosed by walls. Count bedrooms, kitchens, living rooms, dining rooms, studies.... Do not count bathroom, showers, toilets, laundries, hallways or pantries.
Note:
o Count open plan rooms like this: kitchen, lounge and dining = 1 room.
o The room does not need walls that go right from the floor to the ceiling of the house.
o A room which has been split into 2 areas by a curtain should only be counted as one room.

20116 Year of construction (hq20116)
File: SPC_COK_2015_HIES_Household_v01_PUF

Overview

Type: Discrete
Format: numeric
Width: 4
Decimals: 0
Range: 1895-9999

Valid cases: 691
Invalid: 0
Minimum: 1
Maximum: 9999
Mean: 1289.8

Literal question

When was the building constructed? Best guess.

Interviewer instructions

Year main building first constructed is the year in which the main building structure was first built. It is not asking about the year(s) where additions or renovations may have taken place.
Situations will arise when the household head or respondent is not able to provide an accurate answer for this question, especially in cases of renters. In these cases, encourage the household head to provide a best guess as to when the building was constructed. If they have no idea at all, enter "9999" in the box.

20117 Cooking area (hq20117)
File: SPC_COK_2015_HIES_Household_v01_PUF

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-4

Valid cases: 691
Invalid: 0
Minimum: 1
Maximum: 3

Literal question

Does this house have a designated area specifically for cooking?

Interviewer instructions

This question aims to determine if the household has a designated area in the house for cooking. The cooking area does not have to be a physically enclosed room to be considered a cooking area. It can be partially open space or even just a corner of a room with permanent counters on top of which are cooking appliances and a sink and a fridge beside it.
o "Inside and outside": As the name suggest, the household has cooking areas both inside and outside.
o "Inside only": Location of cooking area is inside. The modern houses nowadays would fall under this category.
o "Outside only": Location of cooking area is outside. It is when the cooking area is another house separated from the main house. The cooking house can be enclosed on all sides, partially enclosed,
or open on all sides.
o "No designated cooking area": If the household has no permanent cooking area, then choose this answer option. A household with just a kerosene stove, which they take out to the veranda to cook their food and return it to the corner afterward is considered to have no designated cooking area.

20121 Dwelling connected to power grid (hq20121)

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-2

Valid cases: 691
Invalid: 0
Minimum: 1
Maximum: 2

Literal question

Does this house have access to electricity from the public utility grid?

Interviewer instructions

For this question, note the responses by placing the appropriate code in the box (1 for yes, 2 for no). All respondents should be sequenced to the next question regardless of how they respond to this question.

20122 Access to other energy sources (hq20122)

Format: numeric
Width: 1
Decimals: 0
Range: 1-2

Valid cases: 691
Invalid: 0
Minimum: 1
Maximum: 2

Literal question

Does this house have access to another electricity source?

Post question

If No, go to 20131

Interviewer instructions

This question intends to identify if the household accessed other alternative electricity sources (aside from the public utility system). Once again, note the respondent's answer by placing the appropriate code in the box (1 for yes, 2 for no), and pay attention to the skip pattern "Go to 20131" instruction if the respondent answered "No".

20123 Other energy sources (hq20123)
File: SPC_COK_2015_HIES_Household_v01_PUF

Format: numeric
Width: 2
Decimals: 0
Range: 1-4
Invalid: 11

Valid cases: 84
Invalid: 607
Minimum: 1
Maximum: 4

Literal question

What is the alternative electricity source this house has access to?

Interviewer instructions

This question intends to identify the type of alternative electricity sources the household has access to. Most houses have only 1 alternative power source so that would be easy to determine which answer option to select. But situations will arise where more than 1 alternative source is used - when this happens, mark the highest rank on the answer options list.
For example, if the respondent says they use both a private generator (for their appliances) and solar panel (for their lights), you should note private generator as their answer since it tops the list and enter "1" in the box.

20151 Access to a landline phone (hq20151)
File: SPC_COK_2015_HIES_Household_v01_PUF

Overview

Type: Discrete	Valid cases: 691
Format: numeric	Invalid: 0
Width: 1	Minimum: 1
Decimals: 0	Maximum: 2
Range: 1-2	

Literal question

Does this household have access to a land line phone connection?

Post question

If No, go to 20155

Interviewer instructions

Write the correct answer in the appropriate box and note the "Go to 20155" instruction should household responded "No" to this question. A landline telephone refers to one that is connected, via a telephone line, to the fixed line public telephone system (usually paid), not mobile/cell phone.

Range: 1-2	
Invalid: 11	

Literal question

Do you access the internet through this line, satellite or other physical line?

Post question

If No, go to 20155

Interviewer instructions

This question refers to access to the internet via a physical line, such as the phone line or a satellite disk. Note that a wireless router that is plugged into a physical line but provided a signal to access is considered a physical line, so yes would be the appropriate response in this case.
Write the correct answer in the appropriate box and note the "Go to 20155" instruction should household responded "No" to this question.

Literal question

Can you receive a public or subscription WIFI (wireless excluding 3G) internet signal from your home in which, if needed, you can access the internet legally?

Post question

If No or Don't Know, go to 20157

Interviewer instructions

Simply write the correct answer (1, 2 or 3) in the appropriate box and note the "Go to 20157" instruction should household responded "No" or "Don't know" to this question.
Please note that this refers to accessing the internet through a non-fixed line, such as a public WIFI network, but does not refer to when you illegally access the internet by getting a signal from a business or another household. In addition to this, it does not refer to accessing the internet via the mobile telephone network (e.g., 3G).

Post question

If 1, go to 20212
If 2 or 3, go to 20218
If 4, go to 20219
If 5, go to 20220

Interviewer instructions

Housing tenure refers to the conditions under which the household members are residing in a house (e.g., own house, renting, etc.). There are five main options, and they are provided below with a brief description. All houses selected in the survey must belong to one of these categories.
1. Renting the house - with landlord charges: household lives on rental basis and member(s) of the household pay(s) a rental fee. The rent can be deducted from the salary if the employer owns the house (government, private company, NGO, or Church).
2. Live in the house for free - house provided for free by the employer: household lives in the house on rental basis but does not pay any rental fee. If the house is provided for free by the employer, there is no deduction on the salary.
3. Live in the house for free - house provided by other (relatives, friends): household lives in the house on rental basis but does not pay any rental fee.
4. Own house outright: a member of the household owns the house free of mortgage/loans.
5. Own house with a mortgage: a member of the household owns the house, and the mortgage/loans on the house is not paid yet (i.e., still paying mortgage).
If a homeowner has migrated overseas and have arranged for friends or relatives to live in his house, this cases belongs in category 3 above. If the house belongs to the employer, interviewers need to know whether or not rent is deducted from the salary (if yes, category 1, if not, category 2). If your family pays the rent (another household pays the rent) the appropriate category is 3. If the employer pays the rent, the appropriate category is 2. Only 1 answer is required. Simply place the number denoting the response in the box. Take care in following the "Go to" instructions for each of the responses to avoid asking inappropriate questions.

Literal question

During the past 3 months, what was the main arrangement under which you worked on agricultural land?

Interviewer instructions

This question seeks to determine which form of land arrangement governs the land which the household is using to conduct its agricultural or forestry activities on. Three possible types of land arrangements are provided below:
· "1" Custom ownership: A form of land tenure system where land is administered by customary laws, usually involving inheritance of such lands from past predecessors.
· "2" Own land (freehold): A type of land arrangement where the land and all immovable structures on that piece of land is purchased outright and owned freely with no time requirements on the duration of ownership.
· "3" Rent (lease): A form of land arrangement allowing the tenant/lessee temporary rights to a parcel of land for a given length of time after making regular payment with the lessor.

Literal question

What type of methods were carried out by members of this household for each activity?

Interviewer instructions

This question asks [HM] to specify the types of methods they undertook in the past 3 months. The main methods used are as follows:

-Fishing
a) Gill and other net: Covers several types of net fishing techniques particularly those involving the use of gill nets and cast nets.
b) Vertical long lining: this refers to a long vertical line with several 'branch lines' that is attached to a float and set to drift. The vertical longline has a weight at the bottom, which is usually
positioned to around 200m deep, with branch lines coming off this line at a spacing of about 20m. The branch line has a baited hook on it.
c) Drop lining: this refers to a weighted line (often with a rock) that takes a baited hook deep to capture fish.
d) Hook and line: this refers to fishing with a hook and line, often which is weighted.
e) Trolling: A method of fishing where one or more fishing lines, baited with lures or bait fish, are drawn through the water.
f) Deep-bottom: this refers to fishing in deep water, often to target deep water snapper.
g) Spear fishing: A method of fishing involving the use of spear guns, pole spear or harpoon, often with the aid of a rubberized elastic band to impale the fish on the spear.
h) Flying fishing (Mororo): this method targets flying fish and is practiced at night with a light and scoop net to catch the flying fish.
i) Other: Any other fishing technique used

-Other Sea Gathering
j) Collecting/gathering shells: collecting of seafood from the reef, usually by hand. It is often referred to as gleaning.
k) Other: Any other technique used for gathering seafood

Literal question	

What type of methods were carried out by members of this household for each activity?

Interviewer instructions	

This question asks [HM] to specify the types of methods they undertook in the past 3 months. The main methods used are as follows:

-Fishing
a) Gill and other net: Covers several types of net fishing techniques particularly those involving the use of gill nets and cast nets.
b) Vertical long lining: this refers to a long vertical line with several 'branch lines' that is attached to a float and set to drift. The vertical longline has a weight at the bottom, which is usually
positioned to around 200m deep, with branch lines coming off this line at a spacing of about 20m. The branch line has a baited hook on it.
c) Drop lining: this refers to a weighted line (often with a rock) that takes a baited hook deep to capture fish.
d) Hook and line: this refers to fishing with a hook and line, often which is weighted.
e) Trolling: A method of fishing where one or more fishing lines, baited with lures or bait fish, are drawn through the water.
f) Deep-bottom: this refers to fishing in deep water, often to target deep water snapper.
g) Spear fishing: A method of fishing involving the use of spear guns, pole spear or harpoon, often with the aid of a rubberized elastic band to impale the fish on the spear.
h) Flying fishing (Mororo): this method targets flying fish and is practiced at night with a light and scoop net to catch the flying fish.
i) Other: Any other fishing technique used

-Other Sea Gathering
j) Collecting/gathering shells: collecting of seafood from the reef, usually by hand. It is often referred to as gleaning.
k) Other: Any other technique used for gathering seafood

Literal question

Main fishing mean or mode of transport to fishing site?

Interviewer instructions

Only select one answer.

This question requires household members to list their main mode of transport to the fishing site. The following 4 options are provided to help households select the best one that is applicable to them:
1) Motorized boat: These are boats with an outboard motor attached to it.
2) Non-motorized boat: These are boats with no outboard motor. Rafts and canoes with no engine may also be included here.
3) Walk/Drive: In some locations where the fishing site nearby, walking/driving may be the most appropriate mode of transport.
4) Swim: Similarly, swimming to a fishing site is also quite possible for those areas that are close to the shoreline.

40402 Hired help for livestock activities (hq40402)

Literal question

Apart from the household members, have you paid anyone to work with you in your livestock activities?

Interviewer instructions

This question seeks information on whether the household employed someone outside the household to assist in raising its livestock (payment in cash only). While this is unlikely, it may occur if a household has a large amount of livestock, and has thus been included. If a code of "1" is recorded for this question, make sure labor expenses are provided in the follow-up section (40505) on expenditure. Otherwise, record "2" for no.

Literal question

HH members currently residing in this residence

Interviewer instructions

This question is already filled in and contains the numbers 01-12. It is very important to refer to this number when recording information in other modules which seek a [HM] number. This occurs in both Modules 1 and 3. This prefilled Household Member ID, 10101, will appear in all the sections of this module except for the last section, S1.6.

Only include persons who are: - currently living in this household (even if temporarily away, and they intend to return) - absent for more than 1 month but dependent on household (students overseas and in dorm only, persons in hospital, etc) - absent for more than 1 month, but part of (and supporting) the household (seamen, seasonal workers, etc) - visitors currently living in this household for more than 6 months

SEX

Interviewer instructions

This question simply records the sex of each individual and requires the code at the top of the question to be filled in. The codes are simply "1" for Male and "2" for Female.

If all household members are present, the sex of a person can be determined from observation most of the time. Only when there is an absentee then the question needs to be asked, or when clarification is needed.

AGE IN COMPLETED YEARS

Interviewer instructions

The age at the time of interview of each household member is to be entered for this question (complete age). That is, as of the date of the interview, how old is the person. Some respondents, especially the elderly, may not know their age, so in these cases a best guess will be appropriate. Do not leave this question blank for individuals as a guess is better than no response at all. However, if the age is not known at all, record "999" in the boxes, a code for unknown cases. For babies who are yet to reach their 1st birthday, record the value "0".

Literal question

RELATIONSHIP TO HOUSEHOLD HEAD

Interviewer instructions

This question aims to determine each member's relationship to the household head. As stated above, the household head should be the first person listed on the form. Use the code from the list (1 to 12).

When completing this question, [HM] number 1 should record a response of "01" for this question to indicate he/she is the household head. This must be the case for every household responding to this survey. No other member of the household should be assigned a value of "01" as each household can only have one household head.

For all remaining persons in the household, refer to the code list at the top of the table to indicate their relationship to the household head. All relatives of the household head should be given a code of 02-12, whilst non-relatives should be given a code of 12. Note the relationship code is a 2-digit code, record code accordingly depending on response given.

Spouse-refers to the person reported as the husband or wife of the head of household.

"Non-relative" is anyone NOT related to the household head by blood, marriage, adoption or who cannot be described by the categories given above.

WHERE DO THESE PEOPLE USUALLY LIVE?

Interviewer instructions

This is the same category applied to the listing of household members in the flap. Record the appropriate code that qualifies them for membership of the household, as follows:
1. Usual resident currently here: all household members who currently live in the house.
2. Usual resident temporarily away (might be for work, health reason, or holidays) who will return in less than a month.
3. Absent for more than a month but still dependent on this household (student in dormitory or student compound, at the hospital for long term): Household members who left for more than a month but who will return in the household.
4. Absent for more than a month but supporting the household and expected to return (members who left the household for working reason: seasonal workers, seafarers, but this house is still theirs).
5. Visitors currently living with the household (6 months or more).

Post question

Codes are listed in the box below. Write the appropriate code in the box*
If 01 to 08, go to 10202
If 09 to 13, go to 10206

Interviewer instructions

The first question asks each person 15 years and over what their main activity was last week. There is a prompt in italics for this question in case a person was away from their main activity due to holidays or illness. For these people, state what the person would normally be doing if they weren't on holidays or sick. "Last week" refers to the week before interview week, when you actually conduct this interview. This reference period will vary as this survey spans over a 1 year period. "Main Activities" in this instance includes persons 15 years and over:
1. who work for pay (paid employment or in-kind payment);
2. work without pay (unpaid employment); and
3. not in the labor force.

Literal question

Did ... actively look for work or for a job last week?

Post question

1. Yes, go to 10213
2. No, go to 10212
Write the appropriate code in the box

Interviewer instructions

This question aims to determine if the individual actively looked for work or for another job in the last week. All persons are asked this question, even those who are in full time employment. The main aspect of this question is that the individual has to be actively looking for work, not just wanting work. Examples of actively looking for work include:
· Checking bulletin boards where jobs are advertised
· Following up to radio announcements/advertisements
· Following up to newspaper and TV advertisements
· Checking Facebook or web sites
· Checking State and National Government's Public Information (internet)
· Wandering around to shops/stores and checking employment opportunities
If the response is No (code 2), answer the following question (10212), but if Yes (code 1), skip to 10213.

Literal question

WHY NOT?
(not searching a job)

Interviewer instructions

This question is only asked of persons who did not actively look for work or another job last week. The reason for this question is because we are trying to distinguish between persons who didn't look for work because they weren't interested, and those that didn't look for work because they believed there was none available and they were wasting their time. It is therefore very important the most appropriate response is provided to this question.

Literal question

Has ... ever attended a formal education institution?

Post question

1. Yes, go to 10303
2. No, go to 10302

Interviewer instructions

The key aspect of this question is that the educational institution needs to be formal. In most cases this will be obvious if the person has attended any form of education at a recognized school (primary, secondary, etc.), but in some case it might not be so obvious. The best way to guide people on what constitutes a formal education is to provide example of what is included and excluded.

Interviewer instructions

This question is only asked of persons who reported they have never attended any formal schooling. The part in brackets is also important as there may be numerous reasons a person has reported never attending school, but we are seeking only the main reason, so be sure to enter one code only. For persons of a young age, the main category should be "1.Too young".
In the case that category 8 is entered, please mark the "note id" column in 10399 for that person with a number identifier, and record the details in the "NOTE" box at the bottom of the page.

Literal question

Do you regularly consult a health professional?

Interviewer instructions

A health professional is considered someone with credited qualifications in the field of health. By this definition, it will include General Practitioners (GPs), Specialized Doctors and Qualified Nurses. Traditional Healers may be a more preferred choice for health care by some individuals, and despite not necessarily having credited qualifications, can be treated as a health professional.

The other key aspect of this question is the need for the consultations between patient and health professional being regular. A one off visit for a diagnosis is not regular. The patient should be seeing their health professional at least once a year for consultation on the chronic illness for it to be seen as regular.

Remember to write the code for this question – 1 for Yes, or 2 for No.

Literal question

Do you take medication for any of these illnesses?

Interviewer instructions

This question asks if the person with an ongoing illness is receiving medication from their doctor. In many cases, patients are provided with medication directly when they visit their doctor. Record a code of "1" for Yes if the patient receives medication from the doctor for their chronic illness, or "2" for No if they don't.

Expenses on Health will be covered in Module 3.
