Overview

ABSTRACT
Extracted from the Field Work Instruction Manual NRU HIES 2013 (Attached):

1.2 Objectives

The purpose of the HIES survey is to obtain information on the income, consumption pattern, incidence of poverty, and saving propensities for different groups of people in Nauru. This information will be used to guide policy makers in framing socio-economic developmental policies and in initiating financial measures for improving economic conditions of the people.

Some more specific outputs from the survey are listed below:

a) To obtain expenditure weights and other useful data for the revision of the consumer price index;

b) To supplement the data available for use in compiling official estimates of household accounts in the systems of national accounts;

c) To supply basic data needed for policy making in connection with social and economic planning;

d) To provide data for assessing the impact on household living conditions of existing or proposed economic and social measures, particularly changes in the structure of household expenditures and in household consumption;

e) To gather information on poverty lines and incidence of poverty throughout Nauru.

KIND OF DATA

UNITS OF ANALYSIS
- Households

- Individuals

- Expenditure items

Scope

NOTES

Extracted from the Cover pages of the Questionnaire Modules:

Module 1 - Demographic Information:

· Demographic profile

· Labour Force Status

· Occupation History

· Dwelling information

· Dwelling tenure expenditure

Module 2 - Household Expenditure:

· Utilities & Communication

· Utilities & Communication expenditure

· Land & Housing

· Land & Housing expenditure

· Household Assets

· Household Assets expenditure

· Vehicles

· Vehicles expenditure

· Household Services expenditure

· Provision of Financial Support

· Contribution to ceremonies

· Personal Loans

Module 3 - Individual Expenditures:

· Educational status

· Education

· Education expenditure

· Health status

· Health

· Health expenditure

· Private Travel

· Private Travel expenditure

· Clothing

· Clothing expenditure

· Communication

· Communication expenditure

Module 4 - Income:

· Work for wage or salaries

· Wages detailed

· Income from non agriculture business

· Description of agricultural activities

· Income from agriculture business

· Description of handicraft & home processed food activities

· Income from handicraft & home processed food activities

· Description of livestock activities

· Income from livestock activities

· Description of fishing activities

· Income from fishing activities

· Property & Transfer Income and Other Receipts

· Remittances

Weekly Diary - Covering 14 Days (2 weeks):

· Food items bought this day

· Non food items and services bought this day

· Items for free

· Gambling wins & losses

KEYWORDS

Coverage

GEOGRAPHIC COVERAGE
National coverage.

UNIVERSE
The scope of the 2012-2013 Household Income Expenditure Survey (HIES) was all occupied households in Nauru.

HIES covered all persons who were considered to be usual residents of private dwellings, usual residents who were away for a short amount of time and those away for a for a longer amount of time but still financially linked to the household.

Sampling

Sampling Procedure

-SAMPLE DESIGN:
The sample was selected to be representative of the whole country of Nauru. Approximately 37 per cent of households were selected across Nauru, although not all responded to the survey - these details are provided in Section 4 of the Methodology Report (provided as External Resources). The sample fractions applied to each of the eight constituencies (plus Location) within Nauru were roughly the same, although they were slightly modified to create even workloads for interviewers. Whilst a 37 per cent sample seems exceptionally large for even a small country like Nauru, due to the large levels of non-response experienced in the 2006 HIES it was considered necessary.
At the household level the survey is targeting All members of the Household; however, the main respondent will be the Household Head which could be either the Husband or spouse. If both are unavailable during the survey then any responsible adult will become the respondent. Additional information will also be sought from members of the household who are 15 years with respect to their economic activity and income earning activities.

The selection of the households was based on the 2011 Census of Population and Housing. The process for making the selections was to order the households within each constituency by size (number of persons in the household) and running a systematic skip through each constituency list to achieve the desirable sample size. Such a procedure should ensure each constituency is suitably represented as well as each household size type.

-SAMPLE SELECTION:
Yaren: 40 (out of 105);
Boe: 49 (out of 51);
Aiwo: 81 (out of 84);
Buada: 49 (out of 51);
Ubenide: 101 (out of 104);
Ewa/Anetan: 51 (out of 53);
Anabar/Ijuw/Anibane: 51 (out of 53);
Meneng: 86 (out of 89);
Location (phosphate mining barracks): 116 (out of 120).

Response Rate

The HIES 2012/2013 survey response rates were a significant improvement on those achieved for the 2006 HIES, reaching levels more in line with what is considered acceptable. The national response rate of the survey was 74% (460 households responded out of the 624 that were selected).

Yaren: 55%;
Boe: 76%;
Aiwo: 72%;
Buada: 88%;
Ubenide: 68%;
Ewa/Anetan: 92%;
Anabar/Ijuw/Anibane: 77%;
Meneng: 93%;
Location (phosphate mining barracks): 56%.

Weighting

-HOUSEHOLD WEIGHTS:
The household weights for the analysis were derived by dividing the projected population of households for each constituency as at the mid-point of Household Income and Expenditure Survey (HIES) field work, by the final responding sample of households for each constituency.

Weight i (HH)=ProjPop i (HH)/RespondingSample i (HH)

*i: constituency.

-PERSON WEIGHTS:
The person weights for the analysis were derived by dividing the projected population of persons for each constituency, sex and age group as at the mid-point of HIES field work, by the final responding sample of persons for each constituency, sex and age group.
Weight i (Per)=ProjPop i (Per)/RespondingSample i (Per)

*i: each combination of constituency by sex by age group.

Questionnaires

Overview

A Questionnaire consisting of four Modules and a Weekly Diary covering 2 weeks was used for Nauru Household Income and Expenditure Survey (HIES) 2013. Each Module covers distinct but connected portion of the Household.

The Modules are as follows:

- Module 1: Demographic Information (basic demographic information from each member of the household);
- Module 2: Household Expenditure;
- Module 3: Individual Expenditures;
- Module 4: Income
- Diary Week 1: Covering the first 7 Days (1 - 7)
- Diary Week 2: Covering the second 7 Days (8 - 14).

The questionnaires were published in English.

Data Collection Mode

Face-to-face [f2f]

Data Collection Notes

The field work lasted a total of 12 months, which was divided up into 16 rounds with each round lasting three weeks. In the course of each three-week round, interviewers were assigned approximately 10 households each, which meant approximately 40 households were approached each round.

there were two breaks in the field work; one which occurred after Round 1 and another after Round 4. The first break was designed to undertake a review of how the field team was coping with the complexities of the survey. For a survey of this nature, it is extremely difficult to suitably train field staff on all aspects of the survey, prior to the commencement of field work. However, after one round the interviewers were in a far better situation to understand the survey and thus seek guidance on how to address some of the more complicated issues which arose during the first round. The second break was to allow both field staff and households to have a rest from the survey over the Christmas-New Year period.

For the four modules, face-to-face interviews were conducted with the household, with the household head generally providing the majority of information, but also when required, other household members. These interviews took place over a two-week period whilst the household was required to complete the two 1-week diaries. For these diaries, they were delivered just prior to each 1-week period. After instructions were provided by interviewers on how to complete the diaries, they were left with the household for self-enumeration.

Questionnaires

A Questionnaire consisting of four Modules and a Weekly Diary covering 2 weeks was used for Nauru Household Income and Expenditure Survey (HIES) 2013. Each Module covers distinct but connected portion of the Household.

The Modules are as follows:

- Module 1: Demographic Information (basic demographic information from each member of the household);
- Module 2: Household Expenditure;
- Module 3: Individual Expenditures;
- Module 4: Income
- Diary Week 1: Covering the first 7 Days (1 - 7)
- Diary Week 2: Covering the second 7 Days (8 - 14).

The questionnaires were published in English.

Supervision

The structure of the team overseeing the field work consisted of the Household Income and Expenditure Survey (HIES) manager, an assistant coordinator, one supervisor, one quality control officer and four interviewers. The HIES manager was responsible for overseeing the field work, with the aid of the assistant coordinator, both staff of the Bureau of Statistics. In turn the assistant coordinator was the main point of contact for the field supervisor, who provided the guidance and assistance to the four interviewers. The quality control officer was responsible for undertaking the data entry, and at the end of each round, feedback was given to the assistant coordinator about any errors which needed to be further addressed in the field.

Data Processing

Data Editing

Data editing was done using the program: CSPro 5.1.

-DATA CLEANING PHASE 1: MANUAL CLEANING
Although a heads-up interactive system was used in the processing of Household Income and Expenditure Survey (HIES) data, data errors are always inevitable. This can be contributed to a multitude of reasons and additional efforts must be made to have accurate data. Data cleaning Phase 1 was done in-country where access to original questionnaires allowed us to correct data by referencing source documents. Errors were identified using an edit specification program which checks keyed data for:
• missing information
• value specific ranges
• data item relations
• sequencing errors.

Steps were taken to ensure that missing items were not replaced with assumed values from those involved with data corrections. Data items such as these were addressed in Data Cleaning Phase 2.

-DATA RECODING PHASE 1: SUB_RECORDS OF RELATED DATA ITEMS
The objective of this phase was to combine similar data items in the questionnaire into 17 unique databases. The process involved identifying questions and sections in the questionnaire that were related either by subject area, classifications, and transaction types. The advantages of these databases are listed below:
• Simplify data corrections - when the data is organised into liked data items, it makes for easier data corrections when implementing sub-routines to check for further data inconsistencies, outliers and code verifications.
• Allow for area specific analysis - because the data is organised into similar subject areas, classifications and transaction types, the emerging databases then can be used independently or cross-referenced to other databases.
• Simplify the creation of aggregated data - the overall intention of these sub-databases is to create four main databases used in the analysis of HIES data.

-DATA CLEANING PHASE 2: VALIDATION, IMPUTATION AND REMOVAL
Before any data could be properly recoded into the main aggregated income and expenditure databases the information needed to be properly coded. After field collection this activity was very time consuming because each transaction needed to be verified for relevance and completeness. Activities in this process included:
• deletion of households having inefficient amount of diary transactions or missing large amount of data
• data item code validation and correction (e.g. COICOP, ISIC, and ISCO)
• imputation of missing or invalid data items
• deletion of transactions with insufficient data items.

-DATA RECODING PHASE 2: OUTPUT
The final phase was to recode the sub-databases into the four main databases (Income, Expenditure, Person and House). The activities in this phase included quality control measures that checked for consistencies and balancing between:
• categories, reference periods and transaction types
• income and expenditure
• sub-databases and aggregated databases.

Other Processing

Data entry was done using the program: CSPro 5.1.

DATA ENTRY:
As with all surveys it is always better to correct errors in the field and within the smallest lapse of time between enumeration and processing. The field collection methodology allowed for a two-week enumeration window that gave ample time for survey teams to validate data collected. The data entry process took advantage of this window and allowed for questionnaires to be checked manually as well as systematically using the data entry program.
Standard heads-down data entry practices use double-entry to ensure that data entered in the system truly mirrors information collected on the form. Because of the large amount of survey data collected in the Household Income and

Expenditure Survey (HIES), tight project time frame, and a limited budget, a single-entry interactive system was used in the processing of HIES data. This data entry system aided in improved data quality by incorporating standard error checking specifications listed below.

• Validity - This process checked if the data entered in the system fell within established ranges associated with the data item.

• Consistency - This process checked the relation between data items and within acceptable characteristics of the country such as employment, education ages or gender specific expenditures.

Data Appraisal

Estimates of Sampling Error

Many factors contribute to the magnitude of the non-sampling errors associated with survey results. Unfortunately, unlike the sampling error, it is difficult to measure the extent of the impact. In order to better understand the reason behind this, one only needs to look at the different types of non-sampling errors to appreciate why it is difficult to measure their impact. Some of the more significant non-sampling errors which are discussed in the Methodology Report (provided as External Resource):
• Non response bias
• Reporting errors
• Data entry errors
• Changing economy.

Q1411 Material for roof (h1411)
File: SPC_NRU_2012_HIES_Household_v01_PUF

Overview	
Type: Discrete	Valid cases: 460
Format: numeric	Invalid: 0
Width: 1	Minimum: 1
Decimals: 0	Maximum: 5
Range: 1-6	

Literal question

What is the main material used for the roof?

Interviewer instructions

For this question only one box should be ticked, referring to the main material used in the roof. If more than one material is used, then only tick the box of the material which is most prevalent. In the case that two materials were used equally, tick the box of the item which appears on the list first.
This question can be filled in by observing the dwelling yourself, or by asking the household head.
In the case of the main material not being listed, tick the box for "other" and provide a brief description of what that material was.

Q1412 Material for wall (h1412)
File: SPC_NRU_2012_HIES_Household_v01_PUF

Overview	
Type: Discrete	Valid cases: 460
Format: numeric	Invalid: 0
Width: 1	Minimum: 1
Decimals: 0	Maximum: 6
Range: 1-7	

Literal question

What is the main material used for the outer walls?

Interviewer instructions

Once again, for this question only one box should be ticked, referring to the main material used in the outer walls. If more than one material is used, then only tick the box of the material which is most prevalent. In the case that two materials were used equally, tick the box of the item which appears on the list first.
This question can be filled in by observing the dwelling yourself, or by asking the household head.
In the case of the main material not being listed, tick the box for "other" and provide a brief description of what that material was.

Literal question

What is the main material used for the floors?

Interviewer instructions

Once again, for this question only one box should be ticked, referring to the main material used for the floors. If more than one material is used, then only tick the box of the material which is most prevalent. In the case that two materials were used equally, tick the box of the item which appears on the list first.
This question can be filled in by observing the dwelling yourself, or by asking the household head.

Q1414 Type of living quarters (h1414)
File: SPC_NRU_2012_HIES_Household_v01_PUF

Overview	
Type: Discrete	Valid cases: 460
Format: numeric	Invalid: 0
Width: 1	Minimum: 1
Decimals: 0	Maximum: 5
Range: 1-7	

Literal question

What type of house (main house) is this?

Interviewer instructions

The interviewer can once again provide the answer to this question based on observation, but clarification can always be sought from the household head. There are seven main options provided for this question, of which only one can be ticked.

Q1415 Number of rooms (h1415)
File: SPC_NRU_2012_HIES_Household_v01_PUF

Overview

Type: Discrete	Valid cases: 460
Format: numeric	Invalid: 0
Width: 1	Minimum: 1
Decimals: 0	Maximum: 7
Range: 1-7	Mean: 4.7

Literal question

How many separate rooms does your household occupy, including the kitchen?

Interviewer instructions

Rooms in the context of this question refer to places where a person can sleep or eat. It does not refer to bathrooms or toilets. In order to be qualified as a room, the space needs to be enclosed by walls. A room which has been split into 2 areas by a curtain, should still be counted as one room.

Q1416 Year of building construction (h1416)
File: SPC_NRU_2012_HIES_Household_v01_PUF

Overview

Type: Discrete	Valid cases: 460
Format: numeric	Invalid: 0
Width: 4	Minimum: 1
Decimals: 0	Maximum: 9999
Range: 1-9999	

Literal question

When was the building constructed?

Interviewer instructions

Situations will arise when the household head is not able to provide an accurate answer for this question as the dwelling was constructed before they moved in. In these cases, encourage the household head to provide a best guess as to when the dwelling was constructed, and only leave blank if they have no idea at all.

Q1417 Kitchen type (h1417)
File: SPC_NRU_2012_HIES_Household_v01_PUF

Overview

Type: Discrete	Valid cases: 460
Format: numeric	Invalid: 0
Width: 1	Minimum: 1
Decimals: 0	Maximum: 4
Range: 1-4	

Literal question

Do you have a separate kitchen or kitchenette?

Interviewer instructions

This question aims to determine if the household has a separate kitchen or kitchenette in the dwelling. If the household own a separate kitchen then 3 options are available

Q1421 Main source of lighting (h1421)
File: SPC_NRU_2012_HIES_Household_v01_PUF

Overview	
Type: Discrete	Valid cases: 460
Format: numeric	Invalid: 0
Width: 1	Minimum: 1
Decimals: 0	Maximum: 4
Range: 1-4	

Literal question

What is the main source of lighting usd by this household?

Interviewer instructions

Only the main source of lighting should be entered for this question. Quite often households will rely on more than one source for lighting, especially when there are power shortages, but in answering this question, assume power is operational on island.
Most people will be connected to the main electricity supply, so box 1 will be ticked frequently, but situations will arise where other light sources are the main source used.

Q1422 Main cooking method (h1422)
File: SPC_NRU_2012_HIES_Household_v01_PUF

Overview	
Type: Discrete	Valid cases: 460
Format: numeric	Invalid: 0
Width: 1	Minimum: 1
Decimals: 0	Maximum: 6
Range: 1-8	

Literal question

What is the usual method of cooking for this household?

Interviewer instructions

Once again, the main cooking method is required for this question. So despite different cooking techniques being adopted by many households, only record the most commonly used. In the case that two cooking methods are used equally, record the method listed higher in the options provided.

Q1431 Main source of drinking water (h1431)
File: SPC_NRU_2012_HIES_Household_v01_PUF

Overview	
Type: Discrete	Valid cases: 460
Format: numeric	Invalid: 0
Width: 1	Minimum: 1
Decimals: 0	Maximum: 5
Range: 1-5	

Literal question

What is the main source of drinking water your household uses?

Interviewer instructions

For this question, 5 options are provided for the main source of drinking water. A common scenario on Nauru is that a household will rely primarily on their own water tank, filled by rain. However, if there is a shortage of rain for a while, then they will have their tank filled with water from the desalination plant. The best way to address this scenario is to focus on the word "main" and request the household head to best guess in a typical year whether they would use drinking water mostly from the desalination plant or from rain water in their water tank.

Q1432 Same source of cooking water (h1432)
File: SPC_NRU_2012_HIES_Household_v01_PUF

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-2

Valid cases: 460
Invalid: 0
Minimum: 1
Maximum: 2

Literal question

Do you use the same water for cooking, as for drinking?

Post question

If 1 (Yes), go to 1434

Interviewer instructions

This question simply asks if the same water is used for cooking, as for drinking. Simply tick the box which is most appropriate. Make sure the sequencing is followed after this question, as households who respond "Yes" to this question should be sequenced to question 1434.

Q1433 Main source of cooking water (h1433)
File: SPC_NRU_2012_HIES_Household_v01_PUF

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-5

Valid cases: 11
Invalid: 449
Minimum: 1
Maximum: 5

Literal question

Using the codes in Q.1431, what is the main water source for cooking?

Interviewer instructions

This question is only asked of households who reported they use a different main source of water for cooking, compared to what they use for drinking. As specified in the question, the household is directed to refer back to the options provided in question 1431 and provide the most appropriate source from this list for cooking water.

Q1434 Travel for water (h1434)
File: SPC_NRU_2012_HIES_Household_v01_PUF

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-2

Valid cases: 460
Invalid: 0
Minimum: 1
Maximum: 2

Literal question

Do you have to travel for water?

Post question

If 2 (No), go to 1436

Interviewer instructions

This question is targeted at households who have to travel to obtain water on a regular basis. A simple tick in the boxes provided to signify whether there response is a "Yes" or "No" is all that's required.

Q1435a Time to reach the water source (min) (h1435a)
File: SPC_NRU_2012_HIES_Household_v01_PUF

Type: Discrete	Valid cases: 185
Format: numeric	Invalid: 275
Width: 1	Minimum: 1
Decimals: 0	Maximum: 3
Range: 1-3	Mean: 1.3

Literal question

How long does it take to get to water source?

Interviewer instructions

For this question two pieces of information is required. The first part of the question asks how long it takes to get to the water source. For this part only record the time it takes to get to the water source, not a round trip. This answer should be provided in minutes only.
The second part of the question asks how many trips are made to the water source each day. Include trips made by all household members, and add them together. Just a guess of how many trips on average are made each day is all that's required.

Q1435b Number of trips (h1435b)
File: SPC_NRU_2012_HIES_Household_v01_PUF

Overview

Type: Discrete	Valid cases: 185
Format: numeric	Invalid: 275

Age

Interviewer instructions

The age of each individual to be entered for this question is simply the age at the time of interview. Some respondents, especially the elderly, may not be aware of their age, so in these cases a best guess will be appropriate. Do not leave this question blank for individuals, as a guess is better than no response at all. In the cases of babies who have yet to reach their 1st birthday, record the value "0" for these individuals.

Relationship to HH head

Interviewer instructions

This question aims to determine each person on both List 1 and List 2, relationship to the household head. As stated above, the household head should be the first person listed on the form.
When completing this question, [HM] number 1, should record a response of "01" for this question to indicate they are the household head. This must be the case for every household responding to this survey. No other member of the household should be assigned a value of "01" as each household can only contain one household head.
For all remaining persons in the household, refer to the code list at the bottom of the table to indicate their relationship to the household head. All relatives of the household head should be given a code of 02-10, whilst non-relatives should be given a code of 11.

Country of birth

Interviewer instructions

This question requests information about each person's country of birth. The 5 main options are provided in the codes at the bottom of the table which cover:
1) Nauru
2) China
3) Kiribati
4) Tuvalu
5) Other

Whilst this question appears straight forward, situations will arise when the mother giving birth will travel overseas (eg, Australia) to give birth, then return back home to Nauru. In these cases, as the usual residence of the mother is Nauru, record the country of birth of the child as Nauru.

Marital status

Interviewer instructions

This question requests information on the marital status of each individual in the household. The main 6 categories are provided in the codes at the bottom of the table, covering
1) Never married
2) Legally married
3) De facto
4) Separated
5) Divorced
6) Widowed

A person living in a "de facto" relationship is someone who is living with a person they consider to be their partner, but have not been legally married to this person yet.
Also make sure the "current" marital status of each individual is entered for this question. That is, if a person was once married, then widowed, and now living in a de facto relationship, then enter "3" for de facto for this person as it best represents their current status.

Interviewer instructions

This question collects information on the ethnicity of each individual in the household. The vast majority of people covered in the survey will consider themselves Nauruan (code 1), but for people from overseas, they will need to specify what ethnicity they consider themselves to be. For pacific island people who aren't Nauruan, ethnicity has been divided into three categories "2-Micronesian", "3-Polynesian" and "4-Melanesian". The remaining categories are then "5-Chinese", "6-Other Asian", "7-European", and "8-Other".

Did [HM] actively look for work or for another job last week ?

Post question

If 1 = Yes, go to 1214
If 2 = No, go to 1213

Interviewer instructions

This question aims to determine if the individual actively looked for work or for another job in the last week. All persons are asked this question, even those who are in full time employment. The main aspect of this question is that the individual has to be actively looking for work, not just wanting work. Examples of actively looking for work include:
- Checking bulletin boards where jobs are advertised
- Following up to radio advertisements
- Checking Nauru face book site
- Checking Gazette on Nauru Gov (internet)
- Wandering around to shops/stores and checking employment opportunities

This question is only asked of persons who did not actively look for work or another job last week. The reason for this question is because we are trying to distinguish between persons who didn't look for work because they weren't interested, and those that didn't look for work because they believed there was none available and they were wasting their time. It is therefore very important the most appropriate response is provided to this question.

Literal question

Have you ever attended a formal education institution?

Post question

If 2, go to 3104
If 3, go to 3107

Interviewer instructions

The key aspect of this question is that the educational institution needs to be formal. In most cases this will be obvious if the person has attended any form of education at a recognised school (primary, secondary, etc), but in some case it might not be so obvious. The best way to guide people on what constitutes a formal education is to provide example of what is included and excluded. Such examples are as follows:
-Inclusions: Formally recognized schools (primary, secondary, etc), USP in Fiji, USP extension
-Exclusions: Home tutoring Hairdresser course.

Pre question

3102=1 Never attended

Literal question

Why have you never attended school (main reason)?

Interviewer instructions

This question is only asked of persons who reported they have never attended any formal schooling. The part in brackets is also important as there may be numerous reasons a person has reported never attending school, but we are seeking only the main reason, so be sure to enter one code only
For persons of a young age (4-5 in particular), the main category should be "1.Too young", whereas for older age groups the other 6 categories should mostly apply.
In the case that category 7 is ticked, please mark the "obs" column in 3110 for that person with a number identifier, and record the details in the "observations" box at the bottom of the page.

Literal question

Do you have any ongoing health problems (chronic illness)?

Interviewer instructions

The main thing to focus on in defining a chronic illness is that it is something which is an ongoing problem for the individual. Things such as a cold or flu are not ongoing, so should not be recorded here. To also guide you with this question, feel free to refer to the code list for the next question, Q3203, which provides a list of the main types of chronic illnesses expected in Nauru. As can be seen from this list, these are quite serious ailments, which people have long term, so make sure this is how people interpret this question. The question is solely a sequence guide question to determine who should be asked the detailed questions about the chronic illnesses. Remember to write the code for this question - 1 for Yes, and 2 for No. No means skip to Q3209 for that person.

Literal question

What is your main chronic illness?

Interviewer instructions

Having determined that a person has a chronic illness, this question tries to identify the type of chronic illness. Every effort has been made to produce a list of all the common chronic illnesses which a person may have in Nauru. There may be situations where a person has more than one chronic illness - as the question states, only provide information about the main illness. If a person has a chronic illness not listed then categorise it as "10.Other" and mark the "obs" column for that person (code 3207) and provide the details in the observation box at the bottom of the page.

Literal question

Do you regurlarly consult a health professional?

Interviewer instructions

A health professional is considered someone with credited qualifications in the field of health. By this definition, it will include General Practitioners (GPs), Specialised Doctors and Qualified Nurses. Traditional Healers may be a more preferred choice for health care by some individuals, and despite not necessarily having credited qualifications, can be treated as a health professional.
The other key aspect of this question is the need for the consultations between patient and health professional being regular. A one of visit for a diagnosis is not regular. The patient should be seeing their health professional at least once a year for consultation on the chronic illness for it to be seen as regular.
Remember to write the code for this question - 1 for Yes, and 2 for No.

Literal question

Did you have any other health complaints in the last 3 months?

Interviewer instructions

Any other health complaints can cover a wide range of problems with the main ones being skin sores, diarrhea, cold/flu, etc. There is no need to list a range of complaints as the person in question should generally know if they had a complaint recently, although you can use the code listing in Q3210 as a guide if needed. The main issue here is that the complaint needed to be in the last 3 months, so when the respondent is answering this question make sure they are aware of the time frame being referred to. This question is simply a sequence guide question to determine who should get asked the next 7 questions. Remember to write the code for this question - 1 for Yes, and 2 for No. No means skip to 3219 for that person.

Literal question

Did HM undertake any personal travel overseas in the last 12 months?

Post question

If 2, go to 3401

Interviewer instructions

The initial question here is primarily a sequencing question to determine if the remaining questions are relevant. Each household member is asked if they undertook any overseas travel in the last 12 months. For persons not currently a member of the household, the response will be yes if a payment for that travel was made by a household member. That is, for [HM = 90] only mark the box if a person outside the household took an overseas trip which a member of the household contributed towards.
If the answer is yes for that [HM], then proceed to the next question, otherwise skip to 3401 for that [HM].
Make sure only the code of 1 for "yes" and 2 for "no" is entered.

Literal question

What were the sources [HM] used for internet access?
Source 1

Interviewer instructions

The next three questions collect information on what sources of internet each individual used. If the [HM] only used one source for accessing the internet in the last month, only the first question (3503) needs to be filled in. If two sources for accessing the internet were used then both q3503 and q3504 should be filled in, whereas if three sources for accessing the internet were used then all three questions (3503, 3504 and 3505) should be filled in. The codes provided at the bottom of this table should be used to fill in these three questions. If more than one source was used to access the internet then list the source most commonly used first, followed by the second most frequently used, and finally, the third most frequently used.
