Overview

ABSTRACT
The Household Income and Expenditure Survey (HIES) is a field operation which consists of collecting information in the households based on face to face interview.

The questions asked to the households are related to living standard conditions, expenditures, purchases, incomes.... It is the only survey conducted at a national level which deals with households habits in terms of expenditure and income. As the private and public sector, households represent an economic and social actor of the country which needed to be known.

The purpose of the HIES survey is to obtain information on the income, consumption pattern, incidence of poverty, and saving propensities for different groups of people in the Solomon Islands.

This information will be used to guide policy makers in framing socio-economic developmental policies and in initiating financial measures for improving economic conditions of the people.

Some more specific outputs from the survey are listed below:

a) To obtain expenditure weights and other useful data for the revision of the consumer price index;

b) To supplement the data available for use in compiling official estimates of household accounts in the systems of national accounts;

c) To supply basic data needed for policy making in connection with social and economic planning;

d) To provide data for assessing the impact on household living conditions of existing or proposed economic and social measures, particularly changes in the structure of household expenditures and in household consumption;

e) To gather information on poverty lines and incidence of poverty throughout the Solomon Islands.

The previous HIES was conducted in 2005-2006, 7 years ago. All the indicators based on this survey need to be updated now.

a) In the CPI, new items have appeared on the market since 2005, and the purchases habits / consumption habits of the household has changed

b) The poverty assessment of the country has to be updated as well, based on the household living condition in 2012 (job opportunities have changed, income, education level...)

c) In terms of national account, this survey will provide aggregates of 2012 household consumption.

This survey will highlight the level of expenditure and income of the households, situation with employment, equipment,

assets of the households, education and health information, source of income and remittances...

It will derive indicators that would provide Solomon Islands Government and their development partners with a core set of statistics to facilitate evidence-based policy development and planning, to monitor development progress and measure policy performance, and ultimately to describe development impact.

Coverage

GEOGRAPHIC COVERAGE
National coverage of all provinces demarcated by Urban and Rural.

UNIVERSE
This survey is addressed to all the private households:

a) Who has been living in the Solomon for more than 12 months

b) Who has been living in the Solomon Islands less than 12 months ago but plan to stay in the country for more than 12 months

Whatever their origin, ethnicity, composition, activity, occupation, the concept of private household excludes all kind of communities (hospital, boarding school, military compound).

Sampling

Sampling Procedure

The objective is to survey 4608 households. These households interviewed cannot be chosen by the field staff, but have to be randomly selected from all provinces of the Solomon Island.
In order to obtain 4608 households, we have to select a larger sample, in case of replacement.

For this reason the sample size is increased by 50% (2304 households) to 6912 households. This selection comes from a 2 stages process:

STAGE 1: SELECTION OF EAs

An EA (Enumeration Area) is an area defined for the census, delimited by natural or artificial boundaries (river, seaside, road...). In this area, between 50 and 150 households are located. All the EA are classified according to an EA ID of 7 digits:

Each province is divided in wards, and each ward is divided in EAs. The EA's ID is made of province code + ward code + EA code.
a) Province Code - 2 digits
b) Ward Code - 2digits
c) EA code - 3 digits

The HIES sample was made of 384 Enumerations Areas randomly selected with probability proportional to their size in terms of number of households based on the Solomon Islands census 2009.
The stratification allowed a better distribution of the sample across the country as follow. In each province, 4 areas have been designed according to their remoteness:
1. Urban: urban are of all the provinces
a) Honiara city (province1 is all urban
b) No urban are defined in Rennel Belona province
2. Near rural: rural areas with easy access to urban areas
3. Far rural: rural area far from urban areas
4. Remote rural
5. Out of scope: too difficult to reach (Asimae, Luaniua, Pelau and Sika'iana in Malaita and Tikopia, Ynesian and Duff Islands in Temotu).

STAGE 2: SELECTION OF HOUSEHOLDS

The households are selected by the supervisors from the listing of all the households inhabited of the EA. The first task of the team consists in walking into the EA and marking all the households who live within the boundaries of the EA.

The objective is to survey 4608 households in total. In order to complete this task, there was a need to increase the selection by 50%, in case of replacement (refusal, household not available...).

In each EA, 18 households are selected in total:
- 12 households in list A: the one to contact in priority
- 6 households in list B: to contact in case of replacement

If for any reason, some households from list A need to be replaced, supervisors has to select households selected in list B

In total, 4608 are selected in list A, to contact in priority, and 2304 in list B, to contact in case of replacement.

Detailed information of the sample selection could be found in the 'Field Work Instruction Manual' and 'Household Weights Computation Report' attached in the External Resuorces folder..

Deviations from Sample Design

For some extreme reasons, some teams could not reach the selected EA (Enumeration Area) which lead to some EA

replacements.

Major reasons for not reaching these EAs include bad weather, relocation of population, access difficulty and some were not recommended for security reasons.

In total, 7 EAs were replaced due to the above reasons. Both Western and Guadalcanal remote strata could not be reached by the team and have been replaced with EAs from rural2 strata.

There were 9 EAs that were lost and nor replaced due to:
a) Termination of Supervisors due to disciplinary reasons.
b) Tsunami

Details of the specific EAs could be found in the 'Households Weights Computation Report'

Response Rate

The response rate for each stratum were:

-Choiseul - 100%
-Western - 99%
-Isabel - 100%
-Central - 100%
-Rennel Bell - 100%
-Guadalcanal - 96.7%
-Malaita - 99.8%
-Makira - 100%
-Temotu - 74%
-Honiara - 99.5%
-TOTAL - 97.2%

In total, 97.2% of the scheduled sample were interviewed. Temotu province had the lowest completion rate due to the tsunami that hit the province in February 2013. The whole phase 2 (4 rounds out of 16 - from roud5 to round8) of the Temotu province were cancelled. (96 households lost).

Guadalcanal had only 96.7% of completion rate due to the lack of supervision in one of the team. The entire round8 of Guadalcanal team3 were lost when the supervisor of this team was fired as he decided to run away with the laptop and the forms, 12 households lost.

Other province did not complete 100% of the expected schedule due to invalid forms. Some households did not returned the diary or some modules were lost, which made some forms unacceptable for analysis and dropped from the database (see completion report).

Weighting

The weight of one household interviewed is computed using the inverse of its probability of selection.

Solomon Islands Household Income and Expenditure Survey (HIES) 2012/2013 sample is a 2-stages sample selection:
a) Stage1: selection of Primary Sampling Unit (Enumeration Areas or EAs): Prob1
b) Stage2: selection of households within the EAs: Prob2

-Prob1 = Number of HHs in the EA * (number of EAs to select in the strata / total number of households in the strata)
-Prob2 = Number of households to select in the EA / Total number of households listed within the EA

As 18 households per EA have to be randomly selected by the supervisors based on the updated list of households (done by the team the first day of the round) and 12 of them have to be interviewed, Prob2 shows up as:

Prob1 = 18 / Total number of households listed within the EA * (12 / 18)

Prob2 = 12 / Total number of households listed within the EA

Weight = Prob1 * Prob2.

Questionnaires

Overview

The questionnaire is composed of 6 booklets, 4 modules and 2 diaries. In each module /diary is dedicated to different topics and different sections are included.

Module1:
Q1.1: Demographic profile
Q1.2: Occupations during the past 7 days (list 1, 10 years old and more)
Q1.3: History of all occupations over the past 12 months (list 1 and 2, ten years old and more)
Q1.4: Dwelling information
Q1.5: Dwelling tenure expenditure

Module2:
Q2.1.1: Utilities
Q2.1.2: Utilities expenditure
Q2.2.1: Land and housing
Q2.2.2: Land and housing expenditure
Q2.3.1: Household assets
Q2.3.2: Household assets expenditure
Q2.4.1: Vehicle
Q2.4.2: Vehicle expenditure
Q2.5: Household services expenditure
Q2.6: Regular provision / financial support
Q2.7.1: Contribution to ceremonies
Q2.7.2: Ceremonies expenditure
Q2.8: Loans
Q2.9: Insurance taxes and savings

Module3:
Q3.1.1: Education status
Q3.1.2: Education expenditure
Q3.1.3: Education expenditure (continued)
Q3.2.1: Health status of children 5years old and younger
Q3.2.2: Health status of all members
Q3.2.3: Health expenditure
Q3.3.1: Travel
Q3.3.2: Travel expenditure
Q3.4.1: Clothing
Q3.4.2: Clothing expenditure
Q3.5.1: Alcohol, Kava and tobacco
Q3.5.1: Alcohol, Kava and tobacco expenditure
Q3.6.1: Communication
Q3.6.2: Communication expenditure

Module4:
Q4.1.1: Income / Work for wages and salaries
Q4.1.2: Income / Wages and salaries detailed
Q4.2: Income from non agriculture business obtain by the household
Q4.3.1: Description of the agriculture activities
Q4.3.2: Income / Agriculture activities
Q4.4.1: Description of the fishing activities
Q4.4.2: Income / fishing activities
Q4.5.1: Description of livestock activities
Q4.5.2: Income / livestock activities
Q4.6.1: Description of handicraft activities – food processed at home
Q4.6.2: Income / handicraft activities - food processed at home
Q4.7: Property, transfer and other casual income

Q4.8: Income / Remittances

Diary1 (day 1 to day 7):
Q5.1: Food items in stocks on day 1
Q5.2: What did your household buy today? Food or non food items
Q5.3: Other payments for services or donation your household did today
Q5.4: Food items, harvested, caught or received for free as a gift by your household today
Q5.6: Extra food items in stock on day 1
Q5.8: Extra expenditure made this week
Q5.9: Extra items harvested, caught, or received for free as a gift

Diary2 (day 8 to 14):
Q5.2: What did your household buy today? Food or non food items
Q5.3: Other payments for services or donation your household did today
Q5.4: Food items, harvested, caught or received for free as a gift by your household today
Q5.5: Food items in stock at the end of day 14
Q5.7: Extra food items in stocks at the end of day 14
Q5.8: Extra expenditure made this week
Q5.9: Extra items harvested, caught or received for free as a gift

The questionnaires were developped in English and are provided as External Resource in this documentation.

Data Collection Notes

The HIES (Household Income and Expenditure Survey) is a survey based on a rotating sample of 4608 households to interview spread all over the country (all the provinces) and over a 12 month period between October 2012 to October 2013 according to a system of "round of collection".

A round of collection is a period of 3 weeks; during this period:
• The same families are interviewed (1 family required 8 visits).
• The data collected are entered.

In order to complete 1 household, 15 days are required, but other tasks are requested to the field workers, like pre enumeration of the area, data entry, and data checking. That is why the round of collection is extended to 3 weeks (21 days).

In total, the field work is divided in 16 rounds of 21 days each. Each round is a sub sample of 288 households of the total sample.

Day 1:
a) Household listing, GPS mark of each households, and household selection

Day 2-17
a) Interview in the households, the same households are visited several times during this period (8 times each)
b) market and store for price survey
c) data entry

Day 18-21
a) final checks, make sure that all the information are complete in these households, finalize the data entry and move to the next EA.

Data Entry

Once the enumerators have fully completed the enumeration of a household, this then forwarded to the team supervisor for checking and data entry into the entry system.

The interview of 1 household is spread over a 2 weeks period, for 2 reasons:
a) Due to the number of questions, to conduct the interview in 1 visit would be too long and tiring for enumerators and respondents
b) The households have to report their daily expenditure and home production over a 2 weeks period. Enumerators have to check this diary every other day in order to assist the household member to complete it.

Each household surveyed is visited 8 times during a period of 15 days.

Questionnaires

The questionnaire is composed of 6 booklets, 4 modules and 2 diaries. In each module /diary is dedicated to different topics

Supervision

The field workers are organised in teams, 1 team comprises:
a) 1 supervisor (team leader), in charge of:
b) The GPS point of each household
c) The random selection of households
d) The quality of enumerators' work
e) The data entry

2 enumerators in charge of:
a) The pre enumeration of the area before the selection (done by the supervisor)
b) The completion of the 12 questionnaires (6 for each enumerators)
c) Providing assistance for the price survey

HIES Manager and Chief Supervisors

The Manager and the Chief Supervisor will be responsible for the following tasks:
• Ensure the distribution of survey materials takes place in a timely manner
• To immediately assist the field supervisor whenever a problem arises in there respective areas (data collection or data entry)
• To regularly check on the supervisor to find out how they are going in supervising their interviewers
• To make sure all completed questionnaire forms are transported back to the SINSO
• To ensure all completed forms have been checked by supervisors in the field before return to the SINSO
• To ensure forms with irregularities are taken back to the supervisor for correction
• Report to the team all inconsistencies still detected and all error messages still going on
• To ensure all data entry files are regularly sent to SINSO
• To monitor the flow of forms in and out of the office, making sure all are accounted for at the end of the fieldwork
• To provide financial reports on how the project funds are expended on a regular basis
• To carry out other management and administrative tasks as required by the HIES project.

Supervisor

To supervise in accordance with the directions of SINSO, the completion of the 2012/13 HIES for all selections, specifically to:
• Ensure that all schedules and materials are distributed to interviewers according to the instructions of the SINSO staff;
• Ensure that the household listing is properly done the first day of the round
• Randomly selected the 18 households in the EA and allocate 6 households to each enumerator following the instructions in form 1A, 1B and 1C.
• Ensure that the interviewers understand which household he/she is responsible for and that none are left out;
• Visit interviewers regularly during the collection phase to make sure they are carrying out their responsibilities correctly;
• Address any problems encountered in the field to the SINSO chief supervisor.

• Make sure all forms from the interviewers are accounted for at the end of each 3 weeks period;
• Enter the data in the laptop the first week for module 1 to 4 and the rest of the round for the diary.
• Report to enumerators all the error messages detected by the data entry system
• Do spot checks for completeness of questionnaires and deal with any problems that might arise in the field;
• Dispatch all completed questionnaires (in sealed envelopes) and electronic files to the SINSO after he/she is fully satisfied that:
a) all the entries of the questionnaires are properly completed
b) all the households in the sample selected and all members of the household are covered.

Interviewers

An interviewer is responsible for the proper completion of the diary and questionnaire modules for every household as assigned to him/her by the supervisor during the survey period. Specifically, they are required to:
• Do the household listing on day1 (first day of the round)
• Visit each selected household, introduce the survey to the household (via the PAL) and drop off the diary after explaining how it works;
• Visit the household at least every 2 days during the diary keeping period to check on the progress of the diary;
• Conduct face-to-face interviews with the household to complete the following materials the first week:
• Module 1 – Demographics and Dwelling Information
• (ii) Module 2 – Household Expenditure
• Module 3 – Individual Expenditure
• Module 4 - Income
• Make sure all forms have been completed correctly, and accounted for;
• Check the inconsistencies detected by the supervisor and data entry system in the modules and fix them the second week
• Fill in the appropriate details on the back and front of the household envelope;
• Fill in the interviewer agenda, which monitors the interviewer's visits to each of the selected households;
• Return all materials used in the survey to the supervisor;
• Immediately raise any concerns or issues with fieldwork to their supervisor for prompt action.
• Assist the supervisor for the price survey

All the modules have to be completed before day 9, it means during visit 1, 2, 3 and 4. Visit 5, 6, 7 and 8 will be dedicated to correct all the inconsistencies detected by the supervisors or data entry system on modules 1 to 4.

For diary checks reasons, enumerators have to visit the household every other day. The period of the diary is 14 FULL DAYS in each household interviewed. At each visit enumerators have specific tasks to achieve

Visit 1 (day2 and day3):
1. Find the location of the house: making sure it is the correct house. From the pre enumeration and the selection of households made by the supervisor, each enumerator has 6 households list A to interview.
2. Find the appropriate person to talk with (head of household or his wife, or at least an adult in the house), do not start the survey with a children or somebody not responsible for the household,
3. Introduce yourself and the objective of your work, give the letter from the government statistician
4. Explain to them the process of the survey: 2 weeks of collection, 8 visits, 1 diary to fill every day…
5. Convince the person to collaborate and to agree with the survey, get their agreement / permission
6. If possible, complete module 1, 2, 3 and 4. All the modules have to be completed the first week of interview (visit 1 to 4)
7. Explain how to fill in the diary1 by filling in the first day with the interviewee,
8. Take an appointment for the next visit (visit2) in 2 days' time; visits are made every other day.

Visit 2 (day4 and day5):
1. Check the diary1 between day 1 and day3, if the diary is empty; complete it by asking them to remember their expenditure, their home production and all items received for free.
2. As much as possible, complete module 1 to 4
3. Take an appointment for the next visit (visit3) in 2 days' time,

Visit3 (day6 and day7)
1. Check the diary1 between day 3 and day5, if the diary is empty; complete it asking them to remember their expenditure on food and non food items, their home production and all items received for free.
2. As much as possible complete module 1 to 4
3. Take an appointment for the next visit (visit4) in 2 days' time.

Visit4 (day8 and day9)

1. Check the diary1 between day 5 and day 7, if the diary is empty; complete it by asking them to remember their expenditure on food and non food items, their home production and all items received for free.
2. Pickup diary1 and drop diary2
3. As much as possible complete module 1 to 4
4. Take an appointment for the next visit (visit4) in 2 days' time.

Visit5 (day10 and day11)
1. Check the diary2 between day 7 and day9, if the diary is empty; complete it asking them to remember their expenditure on food and non food items, their home production and all items received for free.
2. Feedbacks on modules from data entry – from data entry report, complete inconsistent or missing information asking again the questions in module 1 to 4.
3. Take an appointment for the next visit (visit6) in 2 days' time.

Visit6 (day12 and day13)
1. Check the diary2 between day 9 and day11, if the diary is empty; complete it asking them to remember their expenditure on food and non food items, their home production and all items received for free.
2. Feedbacks on modules from data entry – from data entry report, complete inconsistent or missing information asking again the questions in module 1 to 4.
3. Take an appointment for the next visit (visit7) in 2 days' time.

Visit7 (day14 and day15)
1. Check the diary2 between day 11 and day13, if the diary is empty; complete it asking them to remember their expenditure on food and non food items, their home production and all items received for free.
2. Feedbacks on modules from data entry – from data entry report, complete inconsistent or missing information asking again the questions in module 1 to 4.
3. Take an appointment for the next visit (visit7) in 2 days' time.

Visit8 (day16 and day17)
1. Check the diary2 between day 13 and day14, if the diary is empty; complete it asking them to remember their expenditure on food and non food items, their home production and all items received for free.
2. Pick up diary2 (14 days of observation)
3. Last feedbacks on modules from data entry – from data entry report, complete inconsistent or missing information asking again the questions in module 1 to 4.
4. Final thanks

Extra Visit (last days of the round – day 18 19 20) – if required visit 9
If supervisor / data entry system still detect inconsistencies or missing information in some questionnaires after visit8, supervisor of chief supervisor can ask enumerator to do an extra visit (visit 9)in the household in order to fix the problem asking the question again. During the second week (day9 to day15), even if all the modules are properly completed with no corrections or inconsistencies, enumerators have to come back in the household anyway to check the diary.

Data Processing

Data Editing

The data entry screen was designed in CSPro with in-built logic and inconsistency checks to allow verification of information during data entry.

After completion of a household enumeration, the questionnaire is then returned to the supervisor of the team who then checks the questionnaire to ensure they are properly filled.

Once the checks has been completed, the data is then captured into the data entry screen, via a laptop, and a edit report generated for the enumerators to do their verification and editing.

Completed data are then tarnferred to the head office as well as the data processing specialist for data concatenation, batch editing and storage.

DETAILED EDITING PROCESS ARE FULLY EXPLAINED IN THE 'DATA EDITING PROCESS REPORT' in the the external resource folder of the documentation.

Other Processing

The software used for data entry is CSPro.
Household Income and Expenditure (HIES) Recode Program Documentation: CSpro dictionary made of 7 different records
General Summarization/Reformat Procedure – New CSPro dictionary (id item = HIES household id)
-Type C = Case detail record – all information collected on the cover page
-Type H = Household record – all information collected at household level (Module1, 2 & 4)
-Type P = Personal record – all information collected at individual level (Module1 & 3)
-Type E = Expenditure record – all expenditures collected in modules 1 to 4 (Module1 & 4)
-Type I = Income record – all income collected in module4
-Type D = Diary record – all records collected in both diary1&2
-Type L = Loans record – all loans recorded in the loan section 2.8 (Module2)
The identification item of the file is the household HIES id. A HIES id has been allocated to each household contacted.

Literal question

Has [HM] ever attended a formal education institution?

Post question

1 = go to 3101
2 = skip to 3102
3 = skip to 3105

Interviewer instructions

It refers to the code 3100. The key aspect of this question is that the educational institution needs to be formal. In most cases this will be obvious if the
person has attended any form of education at a recognised school (primary, secondary, etc), but in some case it might not be so obvious. The best way to guide people on what constitutes a formal education is to provide example of what is included and excluded.

Valid cases: 3367
Invalid: 22365
Minimum: 1
Maximum: 9

Universe

Household member aged 2 years and older

Literal question

Why has [HM] never attended school (main reason)?

Interviewer instructions

It refers to the code 3101. This question is only asked of persons who reported they have never attended any formal schooling. The part in brackets is also important as there may be numerous reasons a person has reported never attending school, but we are seeking only the main reason, so be sure to enter one code only. For persons of a young age (2-3 in particular), the main category should be "1.Too young", whereas for older age groups the categories 2 to 8 should mostly apply. In the case that option 9 is ticked, please mark the "obs" column in 3108 for that person with a number identifier, and record the details in the "observations" box at the bottom of the page.

Literal question

What was the highest level [HM] completed?

Post question

if 1,6,7 skip to 3104

Interviewer instructions

These two questions aim to determine what the highest level and grade of education has been achieved (successfully completed). The way this question is
addressed will be different depending on the type of education they finally completed. The best way to tackle answering this question is to split the types of response into three groups:
- Group1 : Infant/kindergarten : if the individual attended only kindergarten, simply report the level 1 and skip the grade
- Group2: Primary – Secondary - College: for individual who completed primary (code level 2) junior secondary (code level 3), senior secondary (code level 4), or college (code level 5) level, specify how many years they have completed.
- Group3: University, USP, vocational: for individual who completed University degree (level code 6) or vocational degree (level code 7) skip the grade.

Literal question

Why did [HM] leave school (main reason)?

Interviewer instructions

Refers to the code 3104. This question is the last remaining question for persons who have attended school and have now left. It simply asks the questions as to why the person has left school. For the high proportion of respondents to this question, the answer will be "1.Completed desirable schooling". Once again some people may have left for numerous reasons but you must only fill in the main reason, so enter only one code as a response for this question.

Literal question

If [HM] generally goes to school with pocket money, how much do you usually give him for 1 typical day (transport fare, lunch...)?

Interviewer instructions

pocket money given to children is an expenses very difficult to catch, in the diary most of the time it is reported. That is why this question is included straightforward in the module, just to have an idea on a typical school day, how much the parent give to the kids? This question is not addressed to boarder
student. In this box, record ($) dollars and (c) cents

Q3113 Main transportation to school (p3113)
File: SPC_SLB_2012_HIES_Person_v01_PUF

Overview

Type: Discrete	Valid cases: 9083
Format: numeric	Invalid: 16649
Width: 1	Minimum: 1
Decimals: 0	Maximum: 6
Range: 1-9	

Universe

Household member aged 2 years and older

Literal question

What is your main mean of transportation to school ?

Interviewer instructions

This question is straight forward and only requests the main method of transport if a student travels by more than one method sometimes. For students overseas, if the answer is unknown then a best guess will be sufficient. For the category "6.Other", remember to mark the "obs" box in 3115 and record the details in the "Observations" box at the bottom of the page. If the student is at boarding school, he might use boat or plane to go to school, few times a year.

Decimals: 0	Maximum: 5
Range: 1-9	Mean: 3

Universe

Household member aged 2 years and older

Literal question

How many hours of classes do you generally attend per week?

Interviewer instructions

The number of hours of classes can differ at times but for most primary and secondary school students it will be the same each week. Base the answer on a typical week which involves no Public Holidays. And remember, use the codes associated with the ranges, do not enter the number of hours. For overseas students where it may be difficult to provide an answer, a best guess will be sufficient.
