Overview

ABSTRACT

The Population and Housing Census 2021 was the 9th census carried out in Tonga since 1956, and the 7th census conducted by the Statistics Department. The Population and Housing Census is a vast and complex undertaking. It is certainly the largest statistical exercise we can contemplate, touching, as it does, every individual and household in the Kingdom. The result of the census has an important role in producing official statistics for Tonga and providing fundamental information for measuring SDG indicators.

The 2021 Tonga Population and Housing Census is the third census undertaken following the 5-year interval census. This census will provide up-to-date information regarding the size, distribution, and structure of the Tonga population as well as other social and economic information.

Periodic national population and housing census are critical to countries' development policy and planning efforts, in that they represent from most countries' only national snapshot of its social, demographic, and economic conditions, as well as information on recent developments in these areas, that impact on the overall well-being of its population.

Population Census provides us with the opportunity to get an accurate, comprehensive and consistent picture of the country's population. The results are invaluable for policy formation, planning and effective targeting of resources. It provides the only source of directly comparable statistics both for small areas and different population groups. It is used as a reference base for many statistical series such as population profiles, infographics and detailed demographic analysis; population estimates, projections and sample survey frame.

The census date was midnight, the 30th of November 2021, everyone in Tonga was counted, so that leaves no one behind through the census. The Census of Population and Housing 2021 Volume 1 is the first of two statistical publications of detailed census results. The report comprises detailed statistical tables to facilitate users carrying out more comprehensive studies and further analyses.

The Census 2021 was conducted under challenging conditions with the evolving COVID - 19 situation and the significant disruptions of the Volcanic Eruption. The success of the 2021 Tonga Population and Housing Census was made possible with by all participating households who had given their full support and co-operation to the Census. Also the continuous commitment of the all the staff of Tonga Statistics Department.

Language	English
Contributor(s)	Pacific Community (SPC) United Nations Tonga Australian AID
Publisher(s)	Tonga Statistics Department
Description	This file is the first report of the 2021 Tongan Population and Housing Census results that consists of basic tables.

Tonga's total population in 2021 was 100,179, which dropped by 0.1 per cent a year between 2016 and 2021. Most Divisions observed similar dropped pattern in the population with the highest drop of 1.6 per cent per year in Ha'apai since the last census while an increase of 0.6 per cent per year in Vava'u between 2016 and 2021. The population that resides in households were of 99,429 while population resides in institutions were of 750. About 98 per cent of the total population in Tonga is of Tongan ethnic origin.

Of the 100,179 people on census night, 48,749 were male and 51,430 were female. This gives a sex ratio of 95 males per 100 females.

Abstract Tonga has a relatively young population, with a median age of 22 years. About 42% of the total population were of children age 0-17 while those of 65 years of age and above were only 6%.

Tongatapu's population was 74,320, constituting of 74% of Tonga's total population.

The urban population was 21,185 which is slightly more than one fifth of the total population. The urban population includes the villages of Kolofo'ou, Ma'ufanga and Kolomotu'a, which make up Nuku'alofa in Tongatapu.

The average population density was 154 people/km². However, this varies widely across island division and districts. For example, the population density in Tongatapu was 285 people/km² compared to only 16 people/km² in Ongo Niua.

Date	2021-10-01
Country	Tonga
Language	English
Publisher(s)	Tonga Statistics Department
Description	This file is the "Training Manual" of the 2021 Population and Housing Census of Tonga. This manual should be used as reference material for all persons involved with the implementation of the 2021 PHC to achieve complete coverage and quality data collection. Accordingly, census officers are required to read this manual thoroughly to guide them to collect, compile and sync data. It is also essential that census officials continuously study this manual alongside other census instruments thoroughly to gain an in-depth understanding of the census work. This manual contains 12 chapters all together. It is important that the instructions in this manual are followed so that all interviews around Tonga consistently follow the same procedures.
