Overview

ABSTRACT

The 2002 Marshall Islands (RMI) Household Income and Expenditure Survey was the first complete HIES to be conducted in the RMI. The primary purpose of the survey was to gather more accurate and detailed information on income and expenditure levels and flows in the RMI and to update and revise the RMI Consumer Price Index (a separate series of publications document the CPI revision efforts). The survey was made possible through funding assistance from the US Department of the Interior's Office of Insular Affairs (OIA) and technical assistance from the OIA's Insular Areas Statistical Enhancement Program.
