## MESSAGE FROM THE PRESIDENT

This volume presents population and housing statistics from the 2000 Census of Population and Housing for the Republic of Palau. The 2000 census is the second one undertaken and fully funded by the government of the Republic, following the 1995 Census. The U.S. Bureau of Census provided technical assistance for many of the earlier censuses and this recent census. The Office of Insular Affairs, US Department of the Interior provided the services of Dr. Michael Levin for this project.

The successful undertaking of the 2000 Census of Population and Housing is another positive indication that the government is on the way towards self-sustainable development in statistics. As the Republic of Palau has now completed its 11th year of independence, there continues to be urgent needs for more relevant and up-to-date information about our country's people and resources. In many ways, statistics on the demographic, social, and economic characteristics of Palau's population, as well as the housing characteristics in 2000, which are contained in this volume, will fulfill that need. It is hoped that these statistics will be able to assist our planners and decision-makers in government in formulating plans and policies for the economic and social development of the Republic. Population and housing statistics are also useful to the private sector groups, researchers, and other international bodies in the preparation of plans and programs to complement the government's efforts in economic development.

I would like to take this opportunity to congratulate the staff of the Office of Planning and Statistics for a very commendable job and for making this report possible. And to all the people of Palau, I wish to express my gratitude for your wholehearted cooperation in providing valuable information during the census.

KUNIWO NAKAMURA  
President, Republic of Palau  
September 2000

## **MESSAGE FROM THE NATIONAL PLANNER**

The Office of Planning and Statistics (OPS) are responsible for the collection and distribution of the statistics in the Republic of Palau. The office works with the various Palau ministries and agencies as well as agencies in the United States and United Nations.

OPS played the key role in collection and processing the 2000 Census information, and will also be the agency analyzing the data. The Office of Insular Affairs, (OIA), Department of the Interior, was responsible for providing the technical assistance of Dr. Michael Levin to ensure expertise and expedience, and to maintain US Census Bureau conventions. Dr. Levin was invaluable in the formation, compilation, and analysis of the 2000 Census data.

On behalf of OPS and its staff, gratitude is extended to the Olbiil era Kelulau (OEK) for appropriating funds for this 2000 Census of Palau. It is with great pride to report to the OEK and President Kuniwo Nakamura that this 2000 Census of Palau is now completed, and completed in probably record time for a country's full census. As a growing nation, the importance of reliable census data cannot be over-emphasized. It is this census information that the republic is able to gauge the social, economic, and financial performance of the country.

In closing, I want to express my sincere thanks to Francisca Sakuma, Kyonori Tellames, and the staff of OPS. Their dedication and hard work in organizing, processing, reviewing, and formatting the census data contributed to the success of this project. Furthermore, the field supervisors, enumerators, coders, and keyers are appreciated for their roles in organizing the distribution, collection, coding, and keying of the questionnaires. Kyonori Tellames and Visia Alonz also made significant contributions to the editing, tabulation, and census analysis during an OIA-funded work-study at the US Census Bureau during September 2000. We could not have the final Census document without the contributions of all these excellent staff members.

It is certain that other offices, ministries, and agencies in Palau, as well as the private sector will benefit from this 2000 Census of Palau for purposes of planning analysis and policy development.

Koichi L. Wong  
National Planner  
Office of Planning & Statistics, Republic of Palau

## PREFACE AND ACKNOWLEDGMENTS

The 2000 Census of Population and Housing is the second comprehensive data collection of population and housing characteristics taken by the Republic since Compact Implementation in October 1994. The Republic of Palau follows a quinquennial census cycle. This Census follows the 1995 Census, which was our first official mid-decade census. The US Bureau of the Census conducted censuses in Palau in 1970, 1980, and 1990, but no longer includes us because of our Independence. So, besides providing current data for planning and programs, the 2000 Census also maintains a Decennial census to assist in assessing trends. Since Guam, CNMI, and the US also conducted censuses in 2000, eventually our government will be able to compare data on Palauans living inside and outside Palau.

The 2000 Census of Palau has two volumes. This first volume contains the basic tables, which can be used immediately for planning and policy determination. A second volume, the Census monograph, will contain analyses of trends and comparisons of the States. The Census time line follows:

March-April 2000	Preparation of questionnaires, manuals, forms, manuals, forms, selection of Enumerators and office workers, verbatim training of enumerators, development of edit and tabulation program
May-June 2000	Funding from OEK, enumeration of households and group quarters, begin coding
July-August 2000	Finished coding and keying
September 2000	Processing and report writing in Washington, DC

This census cost about \$ 200,000 US. The OEK appropriated \$ 70,000 for the census, and the executive branch of the Republic of Palau provided about \$ 30,000 in in-kind contributions through salaries and services (particularly sea transportation to Kayangel, Peleliu, and Angaur, and land transportation to States north of Airai. The OIA provided about \$ 100,000 in technical assistance, consisting of Dr. Michael Levin's costs, including transportation to Palau, work-study for Kyonori Tellames and Visia Alonz, and DC local work-study for Bradley Patris, a college student from Palau.

THANKS TO THE FOLLOWING PEOPLE: We appreciate the hard work of the enumerators on this project, who had to do almost all of their work before seeing any paychecks – this is real dedication to this project and to the government. Special appreciation is extended to Ms. Cisca Sakuma who served as Field Coordinator for the Census Project, and all the OPS staff. Thanks also to the coders and keyers in the office who completed the office work so efficiently. Finally, thanks to Kyonori Tellames, Visia Alonz, and Bradley Patris, who worked with Michael Levin on the editing and tabulation, and preparation for this report.

Because of constant and continuing commitment to developing and disseminating census and survey data in the Republic of Palau, this 2000 Census volume is dedicated to:

**FRANCISCA SAKUMA**

*Office of Planning and Statistics, Republic of Palau*
